C. NVEC is a private, non-profit alliance of more than 100 consumer groups, low-income action agencies and advocacy organizations, good-government groups, environmental organizations and progressive utilities. For the past 24 years, NVEC has promoted equity in ratemaking, and advocated for cost-effective conservation and renewable energy resources, accounting for environmental costs in resource choices, ensuring fair access to NW resources, and actively engaging the public in energy decision making. NVEC's membership draws from the four Northwest states, California and British Columbia.

NRDC is a national environmental organization with 14,000 Oregon members.

D. Besides representing many ratepayers in Oregon, NVEC/NRDC has special interests in these proceedings in ensuring that NW Natural's rates best serve the interests of ratepayers, especially those with limited incomes, and contribute to improvements in the environment. NVEC and NRDC were actively involved in the original NWN Decoupling docket.

NVEC/NRDC's involvement will not unreasonably broaden the issues, burden the record nor delay the proceeding. We offer this process considerable expertise in the area of price signals and decoupling. For the reasons stated above, NVEC/NRDC respectfully requests that we be allowed to intervene in this matter.

Dated this 12th day of May, 2005

Respectfully submitted,

Steven Weiss,
Senior Policy Associate,
NW Energy Coalition
