RE: July 11, 2007 Draft MONET Runs for PGE's 2008 AUT (Docket UE 192) and Biglow Canyon (Docket UE 188)

Enclosed are PGE's July 11th Draft MONET runs in UE 192 and UE 188. Attachment 1 provides a hard copy of the Step Change Log, Summary of Changes to MONET, Assumptions Summary without Biglow Canyon, and Assumptions Summary with Biglow Canyon. Attachment 2 is a CD with several electronic files, including the MONET runs. The electronic files are password protected, using the same password as that used for other protected files in these dockets. Attachments 1 and 2 are confidential and subject to the Protective Order issued in UE 192 (Order No. 07-135).

Updated total net variable power costs (NVPC) for 2008 are \$817,995,000 before consideration of Biglow Canyon and \$790,949,000 inclusive of Biglow Canyon.

We note that the draft Monet runs reflect a slightly higher load forecast from PGE's initial filings earlier this year. Forecast 2008 Cost of Service (COS) busbar loads increased slightly, from 2,275 aMW to 2,292 aMW. Since the load forecast work papers are voluminous, we have not included them with this filing. The work papers are available upon request in electronic format (text-searchable CD) only.

If you have any questions, please contact me at (503) 464-7580 or Jay Tinker at (503) 464-7002.

Sincerely,

Patrick G. Hager
