**RE: Docket UP 251 – Clarification of Application**

On May 22, 2009, PacifiCorp d.b.a., Pacific Power (“PacifiCorp” or “Company”) filed an application for approval of the provision of easements over the Company’s Terminal – Ninety South 345 kV and Terminal – Midvale 138 kV transmission corridor for the E-Center Retail Development project in West Valley City, Utah (“Application”). The Public Utility Commission of Oregon (“Commission”) approved this application in Order No. 09-293 on July 30, 2009. The Company recently conducted an internal review of its property transaction records. Through this review, the Company found additional information that should have been more clearly identified in the Application. The Application stated that there were two easements for the E-Center Retail Development project, one for an access road and one for parking access.<sup>1</sup> However, the Company provided three easements, two for an access road and one for parking access. Attachment A to the Application contained the Access Easement Agreement for the access road, and described both easements granted. The Application stated that the Company received \$387,935.46 total compensation, with the Oregon-allocated portion being \$87,349.77.<sup>2</sup> The Application stated the correct amount for all three easements and noted the correct accounting treatment for all three easements.<sup>3</sup> PacifiCorp takes its legal and regulatory obligations very seriously and now provides this information to ensure the Commission’s records regarding these transactions are accurate.

An original and one copy of this filing will be provided via overnight delivery.
