Subject: Extension of Time
(Docket No. UM 1538)

Request by PGPV, LLC for a waiver of the 12-month solar photovoltaic system installation requirement pursuant to OAR 860-084-0210 (1)

To Whom it May Concern,

We would like to request an extension for the following project:

City of Dundee Fire; Tracking #: 17W148 ; Size: 10 kw

Original Deadline: 04/15/2014

Extension Requested: 3 months; 7/15/2014

Reasons for Extension:

The new Dundee fire station, where this system will be located, was set to be substantially complete by February 23rd, 2014. Due to weather and SIP panel supplier delays, this date has moved to around mid-May, 2014. We have been assured by Dundee City Administrator Rob Daykin that this new deadline will be met. The installation of the solar system will take Energy Wise 2-3 days time, which would have allowed us ample time to complete the system if the original construction deadline for the fire station had been met. However, the new fire station completion deadline of mid-May takes us past the system deadline of 4/15/14. It is for this reason we would like to ask for a 3-month extension to the 4/15/14 system deadline. This new deadline will allow us sufficient time to complete the installation of the system.

Company Background:

Energy Wise Lighting, Inc. and their sister company PGPV, LLC are the largest owners of solar PV systems on K-12 schools, Boys and Girls Clubs, churches and other nonprofits in the State. We've installed around 75 solar PV systems under the VIR program in Oregon, ranging in size from 10 kW to 300 kW, for a total installed capacity of over 3.5 MW. Over the next 15 years, our systems will inject millions of dollars back into Oregon schools, nonprofits and farmers in the form of host fees.

Sincerely,

/s/ Peter Greenberg
