

RE 45(1) e-FILING REPORT COVER SHEET

REPORT NAME:

PGE's Division 39 Net Metering Report

COMPANY NAME:

Portland General Electric

DOES REPORT CONTAIN CONFIDENTIAL INFORMATION?

No

If known, please select designation:

RE (Electric)

Report is required by:

OAR 860-039-0070(2)

Is this report associated with a specific docket/case?

No

Key words:

2013 Division 39 Net Metering Report

If known, please select the PUC Section to which the report should be directed:

RE: Division 39 Net Metering Report

Pursuant to OAR 860-039-0070(2), PGE hereby submits the Company's annual report on: a) the total number of net metering facilities by resource type and b) the total estimated rated generating capacity of net metering facilities by resource type. This report is based on end of year 2013 information available to the Company.

PGE's installed net metering capacity at the end of 2013 surpassed the 'soft cap' level described in ORS 757.300(6). One-half of one percent of PGE's historic system peak of 4,073 MW equates to 20.4 MW of net metering capacity. PGE currently exceeds the cap at over 27.5 MW of net metered capacity.

PGE reiterates our concern that as the MW total of net metered generation continues to grow, these customers may avoid fair contributions to the fixed costs of PGE's distribution, transmission and generation facilities that, despite the production of the customer-generator, still provide benefits to the net metered customer. As a result, non-participating customers subsidize net metering customers. In Docket No. UM 1673, PGE estimated the size of this subsidy at current levels of interconnected generation to be near \$1.7 million per year. As the net metering program continues to grow substantially, the problem could become more significant and require resolution by the OPUC.

Should you have any questions or comments regarding this filing, please contact Bruce Werner at (503) 464-7481.
