RE: UM 1631 PGE Compliance Report for Partial Waiver of 860-039-0030(3) Requirements for Net Metering Level 1 Applications

Portland General Electric Company (PGE) hereby submits this compliance filing pursuant to Order No. 22-502 approving PGE's request to waive OAR 860-039-0030(3) requirement that a Level 1 net metering customer's application be rejected if it fails to meet one or more of the applicable criteria. PGE was directed by Order No. 22-502 to file a report on the results of the waiver by July 1, 2023.

Below are the results PGE's use of the waiver between January 15, 2023, to June 15, 2023.

Net Metering- Level 1 Applications- January 15, 2023, to June 15, 2023		
Total Level 1 Applications	Failed Level 1 Screen	Required additional study under Level 2 or Level 3
2,688	277	0

Reason For Failure: 860-039-0030(2)	
(2)(a) Exceed 10% of maximum fault current	0
(2)(b) Interconnect to transmission line	0
(2)(c) Exceed 10% (15% if solar) of circuits annual peak load	277
(2)(d) Exceed 20 kilovolt-amps on single phase shared secondary	0
(2)(e) Cause current imbalance more than 20% of nameplate rating of service transformer	0

Rationale for waiver: In each case it was determined that despite failure of the 15% threshold of annual peak load, the projects could be interconnected without risk to the safety and reliability of the distribution system. Thus, none of the projects failed and required to conduct additional study.

Should you have any questions or comments regarding this filing, please contact Christopher Pleasant at christopher.plesasant@pgn.com Please direct all formal correspondence and requests to the following email address pge.opuc.filings@pgn.com
