Event Description

On the weekend of September 28-29, 2013, a severe thunderstorm with substantial winds rolled through Oregon causing damage to electrical facilities and loss of supply to Pacific Power customers. The damage resulted in major events for the company in three reliability regions, primarily due to non-preventable tree caused outages.

Note: Event CAIDI in Willamette Valley and CoastPlus region were below the 300-minute requirement for submitting written filings within 30 days; however, since it occurred on the same day and was due to the same storm as the South region event (which did exceed the 300-minute threshold) the Company has elected to include information for all regions' events in this filing.

Restoration

Restoration crews repaired multiple spans of downed wire and replaced numerous transformer fuses and cutouts. Some customers experienced multiple outages during the storm.
