To Whom It May Concern,

It is Eagle Telephone System, Inc.'s; intention to continue the use of its high cost monies to increase the availability of broadband to its customers, both residential and business alike. We have for the past five years worked diligently to bring Fiber To The Home (FTTH) to it's valued customers with in our own city limits.

Eagle serves a 210 square mile area in one of the most remote areas in Oregon, so with the continuation of our high cost support Eagle intends to continue replacing its legacy copper plant with FTTH. Beginning in 2015 we will move our improvements towards our Eastern end of our plant by replacing the copper plant from Sullivan, Hewitt and Daly Creek areas with FTTH. Along with this upgrade we will also replace/refurbish our Daly Creek head end with the most current equipment we can feasibly purchase and install.

As illustrated in our attached excel spread sheet Eagle intends to continue our fiber build out to every customer we have. This will move us along the Northern end of our plant approximately 35 miles from our Central Office to an area we call Main Eagle. It is this area that we intend to upgrade from copper to fiber beginning in 2016 and continuing into 2017.

If this move is successful and we are able to complete it we will then move to the area of our plant that is located along the Snake River Corridor called Connor Creek and beginning in the spring of 2018 will begin the Connor Creek plant upgrade. In 2018 and 2019 we hope to use the continuing USF support to maintain our existing plant, and attempt any upgrades that we can afford
