To Whom It May Concern:

Northwest Housing Alternatives (NHA) would like to express our utmost support for extending the Energy Trust New Buildings Whole Building Cost Effectiveness exception through 3/31/2024. This program has been instrumental in assisting with the development of affordable multifamily housing projects in Oregon and we're in agreement with ETO staff that granting this exception will allow the program to continue to provide a range of offerings to building and designers while modifications are being made to the program. We also agree that this exception will lead to increased market acceptance of the range of energy efficiency measures that the ETO would ultimately recommend while also contributing to reduced costs of such measures.

Thank you.

Kind Regards,

Joshua R. Carrillo, MBA, PMP
