Colton Telephone Company 2015

PROGRESS REPORT ON SERVICE QUALITY IMPROVEMENT PLAN

PREAMBLE

This document is an integral part of the Company's 2015 Annual Report, as attached to Form 481. It is in compliance with §54.313(a)(1) adopted in the FCC's USF/ICC Transformation Order (11-161) and incorporates all further clarifications identified in subsequent Reconsideration Orders, as applicable, that were in effect at the time the Annual Report was due by Rule to the requisite regulatory authorities.

Colton Telephone Company advises that the environment in which the Company operates is dynamic, not static. As a result, certain network targets identified in its initial 5 Year Network Improvement Plan filed in 2014, may be modified in response to regulatory decisions that have been subsequently adopted, and as their implication upon the Company's financial viability in providing the required services and service level quality became known.

Modifications to the network plan may also have been taken due to changes in market demand, technology, vendor support, weather, or emergency related contingencies.

Targets not met or changed since the initial 5 Year Plan filing are identified and reasons provided for those changes.

UNIVERSAL SERVICE SUPPORT RECEIVED IN 2015

Per the Universal Service Administrative Company (USAC), as available for the period up to this filing, Colton Telephone received a total of \$518,331 (as of 6/30/15) in USF support funds. The breakdown of the funding to the point of filing is:

- \$224,371 High Cost Loop Support
- \$ 92,585 Connect America Fund-Intercarrier Compensation Support
- \$201,375 Interstate Common Line Support

Universal Service Support funds are used to: 1) maintain, upgrade, and improve the Company's network and, 2) cover operating expenses and debt commitments as necessary to permit it to offer a high level of service for both voice and broadband within the authorized serving area.

USF support will continue to be included in the Company's current revenue accounts and forward-looking projections. Revenues, in the aggregate, are used for both capital expenditures as well as to cover operating expenses and fixed costs incurred to obtain capital from lenders. The Company does not segregate USF separately for purposes of capital and operating expenditures; USF is expended in the same proportion as all other Company revenues.

The proportionate share of USF expenditures in 2015 to date for CAPEX is estimated to be \$57,400 (11%); for OPEX \$460,931 (89%).

In the accompanying 2015 project detail, expenditures for network improvements sometimes involve service quality, coverage and capacity as an integrated improvement project and are not mutually exclusive from one another. In terms of cost, projects involving multiple qualifiers are of equal dollar equivalence. Where a project involves a single qualifier, it is so noted.

PROGRESS REPORT

2015

<u>East Side Fiber Project:</u> Colton Telephone is utilizing unencumbered RUS loan funds as well as operating cash flow to deploy FTTH throughout the east side of the Colton exchange. Detailed information of the service areas affected can be seen on the attached map.

The East Side Fiber Project cost to date is \$3.06M (\$1.86M in 2014 and \$1.2M in 2015). The entire project is scheduled to cost approximately \$4.2M. The project involves placement of approximately 73 route miles of fiber to 674 subscribers currently served over copper. The area has approximately 500 broadband subscribers. As of June 15, 2015 all of the mainline fiber has been installed and approximately 410 homes have been upgraded to FttH connections. The remaining 264 homes are scheduled to be completed by year end. This project was staked in fall 2014 and early in 2015. Existing subscribers were informed at that time of the Company's plans to upgrade their service to FttH.

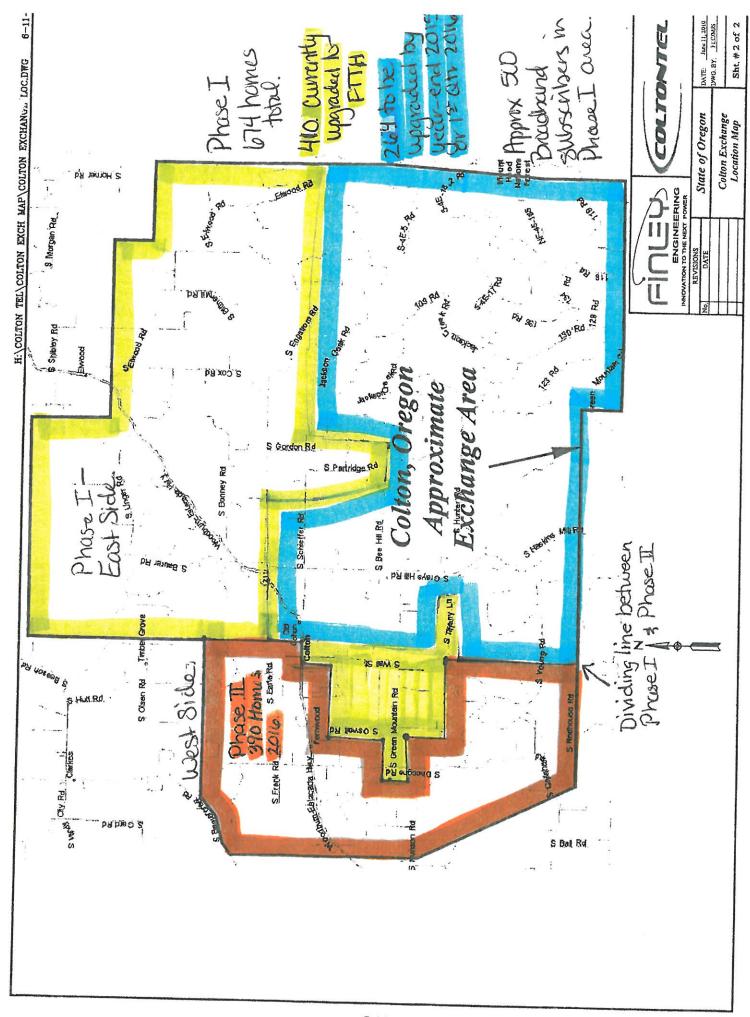

This project provides Service Quality, Coverage and Capacity upgrades.

West Side Fiber Project: In 2015 the Company invested funds in the West Side of the exchange. Costs of \$70,000 include preliminary staking in preparation of the FttH upgrade to begin in the 3rd quarter of 2015. Customers have been notified of the Company's plans to upgrade to FttH, and the majority of homes have been wired by the Company in preparation of supporting the Cyberpower battery system adjacent to the NID. This project will serve 390 homes and is expected to be substantially complete by the end of 2016.

This project provides Service Quality, Coverage and Capacity upgrades.

In 2017, when the East Side and West Side projects are complete, Colton Telephone Company will have a FttH connection to every subscriber in its exchange. The company will be equipped to provide broadband service levels at a minimum of 10M/1M, and will have substantially higher speeds, currently projected to be 75M/25M, available to every subscriber.

General Expenditures: Up through June 2015 the Company will spend \$9,100 in miscellaneous additions.

<u>Line 3012 Documentation – In compliance with 54.313(f)(1).</u>

PER USAC FAQ 72, "In the USF/ICC Transformation Order (FCC 11-161), paragraph 52, it states the following, "We will also require CAF recipients to report on the number of community anchor institutions that newly gain access to fixed broadband services as a result of CAF support." <u>Thus a carrier should include all community anchor institutions to which the carrier has made broadband available, regardless of whether the community anchor institution chooses to subscribe to the service.</u>

Anchor Institutions within Colton Telephone's Territory

The only anchor institution in the Colton Telephone service territory is a single school district with three separate locations: Primary School, Middle School, and High School. There are no libraries, colleges, medical facilities or other community support organizations.

Access to broadband services was available prior to 2014 to all known anchor institutions. All requests for broadband services, and speed, were fulfilled in 2014. Colton Telephone Company continues to monitor customer demand and technological innovation, planning to size its network in anticipation for higher speed broadband services.
