Subject: Request for Changes to the Draft Solar Report
Date: Wednesday, August 10, 2016 12:17:50 PM

Commissioners,

I believe that the current draft of the Solar Report is not clear in its assessment of the solar industry as "well-supported" and "relatively robust" without defining those terms. You have also made the recommendations to end net metering and phase out Energy Trust incentives without providing a full understanding of how solar is valued or what above-market costs might be.

I ask that you please change the tone and content of your draft solar report. The current draft will not be helpful to the legislature.

Thank you,

Ben Rousseau
