Subject: PUBLIC UTILITY COMMISSION ON DRAFT SOLAR REPORT

Hi, my name is Brian Branche and I work with Sunset Solar Electric LLC in Portland, OR. and we are OSEIA members. This message is for the commissioners to let them know that the current draft will not be helpful to the legislature, as it characterizes the solar industry as "well-supported" and "relatively robust" without defining what the PUC means by a "robust" industry. It also makes recommendations to end net metering and phase out Energy Trust incentives without providing a full understanding of how solar is valued or what above-market costs might be.

Thank you for your attention to this issue.
