

**BEFORE THE PUBLIC UTILITY COMMISSION
OF OREGON**

UM 1912

In the Matter of

PORTLAND GENERAL ELECTRIC
COMPANY,

Resource Value of Solar.

**PORTLAND GENERAL ELECTRIC
COMPANY’S CLOSING BRIEF**

PGE appreciates the input and comments from Staff and the other parties to this docket. We note, however, that the scope of this docket is very narrow—specifically, whether PGE’s compliance filing is consistent with the Commission’s Order No. 17-357. Many of the intervenors’ briefs address or attempt to re-argue issues already resolved in that order. Some comments are simply beyond the scope of this docket, in that they discuss the future use and application of the resource value of solar (RVOS). While those comments may be valuable to future administrative processes regarding the RVOS, we do not believe raising these various out-of-scope issues is appropriate in the briefing stages of this straightforward compliance docket. Based on feedback from Staff and upon reviewing intervenors’ briefs and comments, we believe there is a general consensus that PGE’s RVOS submittal is compliant with the Commission’s elements and directives required by Order No. 17-357, and we look forward to future

administrative proceedings where the application of the RVOS may be appropriately evaluated and addressed.

DATED this 9th day of August, 2018.

Respectfully submitted,

James Richard George, OSB No. 974691
Assistant General Counsel
Portland General Electric Company
