Vitesse is a limited liability company that is wholly-owned by Meta Platforms, Inc. Vitesse owns and operates a large data center in Prineville, Oregon (“Data Center”). The Data Center is within the service territory of Pacific Power & Light Company (“Pacific Power”) and is comprised of one or more facilities.

Pacific Power’s 2024 updated Transition Adjustment Mechanism (“TAM”) could have a direct and substantial impact on Vitesse, which has a direct and substantial interest in the TAM. Pacific Power’s TAM will update PacifiCorp’s net power costs for 2024 and proposes an overall annual rate increase of approximately \$164 million, or an average of 9.5 percent. Pacific Power’s TAM will also set transition credits for direct access customers. Vitesse purchases power for the Data Center from Pacific Power pursuant to the Schedule 48 rate approved by this Commission, and has taken service under Pacific Power’s Schedule 272, Renewable Energy Rider Optional Bulk Purchase Option. Vitesse’s parent corporation, Meta Platforms, Inc., has made a commitment to moving it, and its subsidiaries, to a carbon-free energy portfolio. Without intervention, Vitesse would not have the ability to participate in the proceeding, which could result in material harm.

Vitesse’s intervention will assist the Commission in resolving the issues and will not unreasonably broaden the issues, burden the record, or delay this proceeding. Finally, Vitesse’s interest is not adequately represented by any other party in this proceeding.

WHEREFORE, Vitesse respectfully requests that the Commission grant its petition to intervene with full party status in this proceeding and to appear and participate in all matters as may be necessary and appropriate, and to otherwise fully participate in the proceedings.

Dated this 21st day of April 2023.

Respectfully submitted,
