# PRIORITIZING RELIABILITY AND SERVING CUSTOMERS

Pacific Power remains dedicated to delivering safe, reliable, affordable power now and for years to come. We recognize the impact that price increases have on our customers. As we make needed investments in our system and navigate economic trends, we will continue to take measures to keep our rates low and to capture savings for our customers.

On February 14, 2024, Pacific Power filed a general rate case in Oregon, requesting an overall rate change of \$322.3 million, or 17.9%, to become effective January 1, 2025. The company's requested change will be reviewed by the Oregon Public Utility Commission and if approved, the expected impact on the average monthly bill for an average residential customer using 950 kilowatt-hours per month would be \$30.66 per month. When combined with the proposed decrease in net power costs in the company's Transition Adjustment Mechanism, the proposed overall change would be a net increase of \$304.1 million, or 16.9%.

The primary reason for this filing is to support our efforts to provide resilient, safe, reliable electric service for our customers and communities in the face of extreme weather impacts, including capital investments for transmission and renewable resources, increased insurance costs due to wildfire risk, and vegetation management related costs.
