**RE: Advice No.119, Asotin Telephone Company; PUC Or. No. 2
Remove, Grandfather, or Revise Several Features – Changes to Network
Facilities**

To Whom It May Concern:

Included in this submission are the following tariff pages for Asotin Telephone Company:

| | |
|------------------|---|
| Section V | First Revised Sheet 2.0, 2.1, 7, 10.3C, 10.3D, & 10.3E |
| | Second Revised Sheets 10.3, 10.3A, & 14 |
| | Third Revised Sheet 10.3B |
| | Seventh Revised Sheet 10.4 |
| | Sixth Revised Sheet 20 |

The purpose of this filing is to remove, grandfather, and/or modify certain services and features offered by the Company. The Company will either be updating or will not be offering these services due to changes in network facilities. Services/Features that are being impacted include: Warm Line (CCS), Hot Line (CCS), Pay-Per-Use Repeat Dialing (ACS), Combination Main Service, and Off-Premises Extensions (bridged in the CO).

The Warm Line and Hot Line features are being removed. There are currently no customers subscribing to these services. Pay-Per-Use Repeat Dialing will also be removed. Customers utilizing the Pay-Per-Use Repeat Dialing feature will have the option to subscribe to Repeat Dialing on a monthly basis. Therefore, the removal of this feature does not constitute "abandonment of service".

Combination Main Service and Off-Premise Extensions (bridged in the C.O.) are being grandfathered to existing customers effective June 7, 2016. The services will not be available to new customers after this date.

Asotin Telephone Company
Advice Letter No. 119
Remove, Grandfather, or Revise Several Features
May 31, 2016
Page 2

The proposed effective date is June 7, 2016.

If you have any questions, please contact me at (608) 664-4169.

Sincerely,

A handwritten signature in black ink that reads "Rachelle A. Ladwig". The signature is written in a cursive style with a large initial "R".

MISCELLANEOUS SERVICE ARRANGEMENTS

1. **OFF-PREMISE EXTENSION/ACCESS LOOP**⁽¹⁾

(C)

A. Rates

1) Off Premise Extension Circuit

a) Each extension station line exchange station line:

| | <u>Monthly Rate</u> | <u>S&E Code</u> | <u>NRC</u> |
|--|-------------------------|-------------------------|------------|
| 1. Where the terminals are in different buildings on continuous property, where such buildings are located beyond 200 feet from the primary station: | | | |
| Each ¼ mile or fraction thereof | \$1.25 | MCXLA | * |
| 2. Where the terminals are on non-continuous property: | | | |
| First ¼ mile or fraction thereof | \$2.50 | MCXL1 | * |
| Each additional ¼ mile or fraction thereof | \$1.25 | MCXL2 | * |

*See applicable nonrecurring charge elements in Section VI.

B. Conditions

- 1) Off-Premises Extension Circuit applies to each extension located outside the building in which the primary station is located.
- 2) Off-Premises Extension Circuit may be furnished in connection with all classes and grades of local service except public telephone service.
- 3) Off-Premises Extension Circuit may be terminated on the premises of another customer provided the other customer has separate service at the same location.

⁽¹⁾ Off-Premise Extensions provisioned in or through the Central Office are grandfathered to existing customers effective June 7, 2016. This version of the service will not be available to new customers after this date.

(C)
(C)

MISCELLANEOUS SERVICE ARRANGEMENTS

1. **OFF-PREMISE EXTENSION/ACCESS LOOP**⁽¹⁾ (Continued)

(C)

B. Conditions (Continued)

- 4) All mileage is measured in circuit route miles.
- 5) No mileage charge applies in those cases where the terminals are in the same building or in different buildings on continuous property within 200 feet from the primary station.

C. Unusual or Special Construction

- 1) A departure from the rates and special conditions specified in this schedule may be made when a line extension involves unusual construction or disproportionately large expenditures when compared with the usual types of plant construction.

⁽¹⁾ Off-Premise Extensions provisioned in or through the Central Office are grandfathered to existing customers effective June 7, 2016. This version of the service will not be available to new customers after this date.

(C)
(C)

MISCELLANEOUS SERVICE ARRANGEMENTS

1. **COMBINATION MAIN SERVICE**⁽¹⁾

(C)

A. Rates

- 1) The monthly rate and installation charge for a business or residence one-party service at each location.

B. Conditions

- 1) This service provides for serving separate business and residence locations by bridging the one-party lines.
- 2) All locations must be within the same central office area.
- 3) A separate number will be assigned to the station at each of the locations.
- 4) Additional signals may be required at any one or all locations and arranged so that an indication will be received at any one or all locations when one station at another location is being called. There will not be a charge for these signals required to provide this service. Additional signals over the minimum requirement will be charged for at the rate found elsewhere in this section under signals.

⁽¹⁾ This service is grandfathered to existing customers effective June 7, 2016. The service will not be available to new customer after this date.

(C)

(C)

MISCELLANEOUS SERVICE ARRANGEMENTS

1. **CUSTOM CALLING SERVICE** (Continued)

A. General (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

d) Speed Call 8 -

This service allows the customer to keep a list of eight specified telephone numbers which can be dialed by using a one-digit (2 through 9) access code.

e) Speed Call 30 -

This service allows the customer to keep a list of 30 specified telephone numbers which can be dialed by using a two-digit (20 through 49) access code.

f) Toll Restriction -

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. When a restricted call is attempted from a line/trunk equipped with this service, a dial tone or Company recorded announcement will be heard by the caller.

(D)

(D)

(T)

MISCELLANEOUS SERVICE ARRANGEMENTS

1. **CUSTOM CALLING SERVICE** (Continued)

A. **General** (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

g) Call Transfer¹ -

(T)

This service allows the customer to hold and transfer incoming, out-going and intragroup calls. If the customer has established a three way call, this service will allow the customer to hang up while the other two parties remain connected. Any applicable long distance charges will apply for the duration of the call, even if the customer drops off the call.

h) Call Forwarding-Busy (Customer Programmable) -

(T)

This service routes incoming calls to another telephone number when the customer's dedicated number is busy. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. To deactivate Call Forward - Busy, a customer must dial a special access code. All calls forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

i) Call Forward-No Answer (Customer Programmable) -

(T)

This service redirects incoming calls not answered after a predetermined number of rings to another telephone number. The number of rings is determined and set by the Company unless otherwise specified by the customer. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. To deactivate Call Forward - No Answer, a customer must dial a special access code. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

¹ As of January 19, 2004, this service will no longer be available to new customers. Once current customers disconnect this service, they will not be able to reestablish it.

MISCELLANEOUS SERVICE ARRANGEMENTS

1. **CUSTOM CALLING SERVICE** (Continued)

A. **General** (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

j) Call Hold -

(T)

This service allows a customer to place a current caller on hold, which frees the line so the customer can initiate another call. To activate Call Hold, the customer depresses the switchhook to receive a dial tone and then dials a specific code. Only one call per access line can be placed on hold at a time. The held call cannot be added to another call, however, the customer can toggle between each call.

k) Call Transfer Enhanced -

(T)

This feature enables a customer to transfer multiple incoming or outbound calls to a third party with either a Screened Transfer or a Blind Transfer. A Screened Transfer enables the transferring party to announce a call to the third party prior to completing the transfer. If the third party chooses not to take the call, the transferring party may disconnect the third party and return to the caller. Otherwise, the transferring party may disconnect, completing the transfer and returning the line to an idle state. A Blind Transfer enables the transferring party to immediately disconnect after dialing the third party, prior to the third party answering the call. After disconnecting, the transferring party may either originate or receive a new call, even though the transferred call is still in progress. In addition, this feature enables a customer to establish a 3-way conference call while enabling any party (including the originator of the call) to drop out of the conference while leaving the other two parties connected. The customer is responsible for all applicable long distance charges for originating or terminating calls that will apply for the duration of the call, even if the customer drops off the call.

MISCELLANEOUS SERVICE ARRANGEMENTS

1. **CUSTOM CALLING SERVICE** (Continued)

A. **General** (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

l) Call Forward-Busy (Programmed by Telco)

(T)

This service automatically redirects incoming calls to a predesignated telephone number or voice mail service when the customer's line is busy. The customer activates the service by contacting the telephone company and designating the number to which all calls will be forwarded when the line is busy. The telephone company then establishes the fixed forward-to telephone number within the switch. To cancel the service or change the forward-to telephone number, the customer must contact the telephone company. All call forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

m) Call Forward-No Answer (Programmed by Telco)

(T)

This service automatically redirects incoming calls to another telephone number or voice mail service when the customer's telephone is not answered in a predetermined number or rings. The number of rings is determined and set by the Company unless otherwise specified by the customer. The customer activates the service by contacting the telephone company and designating the number to which all calls will be forwarded when the telephone is not answered within an established period of time. The telephone company then establishes the fixed forward-to telephone number within the switch. To cancel the service or change the forward-to telephone number, the customer must contact the telephone company. All calls forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

n) Call Forwarding-Remote Access

(T)

This service is an additive to the Call Forwarding service and allows the customer to activate and deactivate Call Forwarding from a telephone in another location. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

MISCELLANEOUS SERVICE ARRANGEMENTS

1. **CUSTOM CALLING SERVICE** (Continued)

A. General (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

o) 6-Way Calling (T)

This service allows a customer to call up to five parties and establish a six-way conference call. To activate this service, the customer dials an access code, dials the desired telephone number (calling party must answer), depresses the switchhook to add the calling party to the line, then depresses the switchhook again to receive a new dial tone. If the called party line is busy or there is no answer, the customer must dial a special access code to drop the line. This process needs to be repeated until all parties (up to five) have been connected to the customer's line. All 6-Way Calls are subject to transmission limitations and all applicable local and long distance charges.

p) Long Distance Call Waiting (T)

This service is additive to Call Waiting and uses a special tone signal to indicate to the customer that the incoming call is long distance. The tone is different than the Call Waiting tone signal received for a local call. The long distance caller will receive the usual ringing tone.

q) Home Intercom-Basic (T)

This service allows customers to redial their own directory number in order to talk to another party at a different extension. To activate this service, customers redial their own directory number and then hang-up. After a short interval, the phone will ring back. Once both parties pick-up the phone, they will be able to have a two-way conversation. This service is also known as Revertive Ringing.

r) Home Intercom-Enhanced (T)

This service allows customers to establish a talking path between two or more of their extensions. To activate this service, the customer dials one of the access code numbers predetermined by the Company, receives an announcement, and then hangs up the phone. The phone will ring back in one of the distinctive patterns, depending on the access code dialed. Also included in this package is dialable hold, where one extension can transfer an outside call to another extension.

MISCELLANEOUS SERVICE ARRANGEMENTS

1. **CUSTOM CALLING SERVICE** (Continued)

A. **General** (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

s) Personal Ringing

This service allows the customer to have up to four distinct telephone numbers on a single line. The second, third and fourth number will each have a distinctive ringing pattern so the customer can identify which number has been called. If a customer also subscribes to Call Waiting, each phone number will have a distinctive Call Waiting tone. If a customer also subscribes to Call Forward, the main directory number or all four telephone numbers can be forwarded.

t) Call Reminder

This service allows a customer to program a time at which a reminder call is desired. At the programmed time, the customer will receive a call placed by the Central Office Equipment. When the call is answered, the customer will hear a tone or a Company recorded announcement.

u) Toll Restriction with PIN Override

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. In addition, the customer will have the ability to override the restriction on a per call basis by using a Personal Identification Number (PIN). To activate the override, the customer dials a code, the PIN, waits for a dial tone and then dials the toll number. When a restricted call is attempted without the PIN, from a line/trunk equipped with this service, a dial tone or Company recorded announcement will be heard by the caller.

MISCELLANEOUS SERVICE ARRANGEMENTS

ADVANCED CALLING SERVICES (Continued)

B. Service Description (Continued)

3. **CALL RETURN** (Continued)

Call Return is available on a flat monthly rate and a pay-per-use basis. Pay-per-use Call Return will have a per activation rate and a monthly price cap. After the monthly price cap has been reached, each activation thereafter will be at no charge.

4. **PREFERRED CALL FORWARDING**

This service enables the subscriber to forward up to a maximum of six (6) preselected incoming telephone numbers to another telephone number. To forward a telephone number, the subscriber dials an activation code and then constructs or modifies a telephone number screening list. The Company's equipment will screen incoming calls against the subscriber's list and forward only those telephone numbers on the list. Calls forwarded by this service are subject to all applicable local and long distance charges. These calls are also subject to transmission limitations.

5. **PRIORITY RINGING**

This service allows the subscriber to provide up to a maximum of six (6) preselected incoming telephone numbers with a distinctive alerting signal or ring (or a distinctive Call Waiting tone if the subscriber has subscribed to Call Waiting), when the subscriber receives calls from them. To program a telephone number, the subscriber dials a unique code and then constructs or modifies a telephone number screening list. The Company's equipment will screen incoming calls against the subscriber's list and provide the Priority Ringing service for the preselected telephone numbers on the subscriber's list.

6. **REPEAT DIALING**

This service enables the subscriber to automatically redial the last outgoing telephone number dialed from that line. When the recalled telephone number is busy, the Company's equipment will make repeated attempts to establish the call for approximately a thirty (30) minute period, beginning with the subscriber's activation.

7. **SPECIAL CALL ACCEPTANCE**

This service enables a subscriber to allow up to a maximum of six (6) preselected incoming telephone numbers to be accepted. To select a telephone number to be accepted, the subscriber dials a unique code and then constructs or modifies a telephone number screening list. The Company's equipment will screen incoming calls against the subscriber's list and allow only those calls on the list to be completed. Calls from all other numbers will be routed to a Company recorded announcement.

MISCELLANEOUS SERVICE ARRANGEMENTS

APPROVED

1. CUSTOM CALLING SERVICE (Continued)

A. General (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

d) Speed Call 8 -

This service allows the customer to keep a list of eight specified telephone numbers which can be dialed by using a one-digit (2 through 9) access code.

e) Speed Call 30 -

This service allows the customer to keep a list of 30 specified telephone numbers which can be dialed by using a two-digit (20 through 49) access code.

f) Warm Line -

This service allows a call to be automatically placed to a pre-assigned number determined by the customer. The call will be placed once the customer's phone has been off-hook for a predetermined time-out period. The time-out period may be set at 1 to 14 seconds. During the time-out period the customer will receive a normal dial tone and can originate calls. Once the time-out period has expired, a call is automatically placed to the pre-assigned number as programmed by the Company.

f g) Toll Restriction -

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. When a restricted call is attempted from a line/trunk equipped with this service, a dial tone or Company recorded announcement will be heard by the caller.

MISCELLANEOUS SERVICE ARRANGEMENTS

1. CUSTOM CALLING SERVICE (Continued)

APPROVED

A. General (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

j k) Call Hold -

This service allows a customer to place a current caller on hold, which frees the line so the customer can initiate another call. To activate Call Hold, the customer depresses the switchhook to receive a dial tone and then dials a specific code. Only one call per access line can be placed on hold at a time. The held call cannot be added to another call, however, the customer can toggle between each call.

(T)

k m) Call Transfer Enhanced -

This feature enables a customer to transfer multiple incoming or outbound calls to a third party with either a Screened Transfer or a Blind Transfer. A Screened Transfer enables the transferring party to announce a call to the third party prior to completing the transfer. If the third party chooses not to take the call, the transferring party may disconnect the third party and return to the caller. Otherwise, the transferring party may disconnect, completing the transfer and returning the line to an idle state. A Blind Transfer enables the transferring party to immediately disconnect after dialing the third party, prior to the third party answering the call. After disconnecting, the transferring party may either originate or receive a new call, even though the transferred call is still in progress. In addition, this feature enables a customer to establish a 3-way conference call while enabling any party (including the originator of the call) to drop out of the conference while leaving the other two parties connected. The customer is responsible for all applicable long distance charges for originating or terminating calls that will apply for the duration of the call, even if the customer drops off the call.

MISCELLANEOUS SERVICE ARRANGEMENTS

1. CUSTOM CALLING SERVICE (Continued)

APPROVED

A. General (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

l ~~n~~) Call Forward-Busy (Programmed by Telco)

This service automatically redirects incoming calls to a predesignated telephone number or voice mail service when the customer's line is busy. The customer activates the service by contacting the telephone company and designating the number to which all calls will be forwarded when the line is busy. The telephone company then establishes the fixed forward-to telephone number within the switch. To cancel the service or change the forward-to telephone number, the customer must contact the telephone company. All call forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

m ~~o~~) Call Forward-No Answer (Programmed by Telco)

This service automatically redirects incoming calls to another telephone number or voice mail service when the customer's telephone is not answered in a predetermined number or rings. The number of rings is determined and set by the Company unless otherwise specified by the customer. The customer activates the service by contacting the telephone company and designating the number to which all calls will be forwarded when the telephone is not answered within an established period of time. The telephone company then establishes the fixed forward-to telephone number within the switch. To cancel the service or change the forward-to telephone number, the customer must contact the telephone company. All calls forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

n ~~p~~) Call Forwarding-Remote Access

This service is an additive to the Call Forwarding service and allows the customer to activate and deactivate Call Forwarding from a telephone in another location. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

MISCELLANEOUS SERVICE ARRANGEMENTS

APPROVED

1. CUSTOM CALLING SERVICE (Continued)

A. General (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

o q) 6-Way Calling

This service allows a customer to call up to five parties and establish a six-way conference call. To activate this service, the customer dials an access code, dials the desired telephone number (calling party must answer), depresses the switchhook to add the calling party to the line, then depresses the switchhook again to receive a new dial tone. If the called party line is busy or there is no answer, the customer must dial a special access code to drop the line. This process needs to be repeated until all parties (up to five) have been connected to the customer's line. All 6-Way Calls are subject to transmission limitations and all applicable local and long distance charges.

P r) Long Distance Call Waiting

This service is additive to Call Waiting and uses a special tone signal to indicate to the customer that the incoming call is long distance. The tone is different than the Call Waiting tone signal received for a local call. The long distance caller will receive the usual ringing tone.

g s) Home Intercom-Basic

This service allows customers to redial their own directory number in order to talk to another party at a different extension. To activate this service, customers redial their own directory number and then hang-up. After a short interval, the phone will ring back. Once both parties pick-up the phone, they will be able to have a two-way conversation. This service is also known as Revertive Ringing.

r t) Home Intercom-Enhanced

This service allows customers to establish a talking path between two or more of their extensions. To activate this service, the customer dials one of the access code numbers predetermined by the Company, receives an announcement, and then hangs up the phone. The phone will ring back in one of the distinctive patterns, depending on the access code dialed. Also included in this package is dialable hold, where one extension can transfer an outside call to another extension.

First Revised Sheet 10.3E

MISCELLANEOUS SERVICE ARRANGEMENTS

APPROVED

1. CUSTOM CALLING SERVICE (Continued)

A. General (Continued)

11) Custom Calling Services are optional telephone service arrangements that provide one or more of the following features: (Continued)

u) Hotline

This service allows a call to be automatically placed to a pre-assigned number determined by the customer as soon as the customer's phone goes off-hook. The Company will program the pre-assigned number for the customer.

S v) Personal Ringing

This service allows the customer to have up to four distinct telephone numbers on a single line. The second, third and fourth number will each have a distinctive ringing pattern so the customer can identify which number has been called. If a customer also subscribes to Call Waiting, each phone number will have a distinctive Call Waiting tone. If a customer also subscribes to Call Forward, the main directory number or all four telephone numbers can be forwarded.

T w) Call Reminder

This service allows a customer to program a time at which a reminder call is desired. At the programmed time, the customer will receive a call placed by the Central Office Equipment. When the call is answered, the customer will hear a tone or a Company recorded announcement.

U x) Toll Restriction with PIN Override

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. In addition, the customer will have the ability to override the restriction on a per call basis by using a Personal Identification Number (PIN). To activate the override, the customer dials a code, the PIN, waits for a dial tone and then dials the toll number. When a restricted call is attempted without the PIN, from a line/trunk equipped with this service, a dial tone or Company recorded announcement will be heard by the caller.

MISCELLANEOUS SERVICE ARRANGEMENTS

ADVANCED CALLING SERVICES

APPROVED

B. SERVICE DESCRIPTION (continued)

3. CALL RETURN (continued)

Call Return is available on a flat monthly rate and a pay-per-use basis. Pay-per-use Call Return will have a per activation rate and a monthly price cap. After the monthly price cap has been reached, each activation thereafter will be at no charge.

4. PREFERRED CALL FORWARDING

This service enables the subscriber to forward up to a maximum of six (6) preselected incoming telephone numbers to another telephone number. To forward a telephone number, the subscriber dials an activation code and then constructs or modifies a telephone number screening list. The Company's equipment will screen incoming calls against the subscriber's list and forward only those telephone numbers on the list. Calls forwarded by this service are subject to all applicable local and long distance charges. These calls are also subject to transmission limitations.

5. PRIORITY RINGING

This service allows the subscriber to provide up to a maximum of six (6) preselected incoming telephone numbers with a distinctive alerting signal or ring (or a distinctive Call Waiting tone if the subscriber has subscribed to Call Waiting), when the subscriber receives calls from them. To program a telephone number, the subscriber dials a unique code and then constructs or modifies a telephone number screening list. The Company's equipment will screen incoming calls against the subscriber's list and provide the Priority Ringing service for the preselected telephone numbers on the subscriber's list.

6. REPEAT DIALING

This service enables the subscriber to automatically redial the last outgoing telephone number dialed from that line. When the recalled telephone number is busy, the Company's equipment will make repeated attempts to establish the call for approximately a thirty (30) minute period, beginning with the subscriber's activation.

Repeat Dialing is available on a flat monthly rate basis and a pay-per-use basis. Pay-per-use Repeat Dialing will have a per activation rate and a monthly price cap. After the monthly price cap has been reached, each activation thereafter will be at no charge.

7. SPECIAL CALL ACCEPTANCE

This service enables a subscriber to allow up to a maximum of six (6) preselected incoming telephone numbers to be accepted. To select a telephone number to be accepted, the subscriber dials a unique code and then constructs or modifies a telephone number screening list. The Company's equipment will screen incoming calls against the subscriber's list and allow only those calls on the list to be completed. Calls from all other numbers will be routed to a Company recorded announcement.
