Subject: OAR 860 Rulemaking
Date: Monday, September 29, 2014 1:32:02 PM

Please add my comments to the rulemaking process for Senate Bill 844; Voluntary Emissions Reduction Program.

Within the definitions found at 860-085-0500 there should be a clear definition of "anthropogenic greenhouse gas". Greenhouse gases, according to Wikipedia, include carbon dioxide. Carbon dioxide is released by the burning of wood, among other carbon based fuels. However, all carbon based fuels are equal. Burning wood emits about double the amount of CO2 as natural gas.
