RE: Staff's Motion to Modify Procedural Scheduledule

We support Staff's Motion which was submitted April 10, 2018 in response to the ruling by ALJ Power on April 5, 2018.

Our reason for doing so is based on the following:

1. The CPNC process has a requirement of having land use approval under OAR 860-025-0030 (3) (a). In contrast the Tillamook County Planning Commission proceedings and subsequent appeals *do not* require CPNC approval. Ordering them in this manner is appropriate given that this is established processes for both.
2. As a former County Planning Commissioner I recognize that a determination by the PUC, while not part of the record under consideration, could have bearing on the decision making process. Since, the record is closed to all new testimony at this point it is important to help preserve that body of evidence as presented to this point.

Regards,

/s/ Kurt Mizee
