Re: UM 1696 Manufactured Homes Memo

Dear Sir or Madam:

I write to voice my support of the Manufactured Home Replacement Program as an interested party. Our project is a 1965 singlewide Jetstream. It is an "old tin can" in desperate need of replacement. It has original doors and windows which fail to seal and properly insulate. The furnace is also original costing upwards of \$300.00 to run in the winter. To address this problem, we have covered all the windows with 1-inch rigid insulation and use space heaters to only heat the rooms we are using. There is water damage to multiple parts of the home due to several roof leaks that have sense been patched.

We are a growing low-income family of 3 living in the nice quiet cooperatively owned mobile home park community. Mt. View Mobile Estates. We Recently welcomed our beautiful daughter Olivia into the world and are concerned with her health and wellbeing. The thought of raising her in our current home is troubling. Though we are living on a single income leaving our options very limited.

This Program would afford us the possibility to improve our quality of life, lower our carbon footprint, as well as raise the value of our community.

Thank you for your consideration.

Sincerely,

A handwritten signature in cursive script that reads "Jason Sweely".
