RE: Docket No. UP 334 Compliance Filing Accompanying Year-End Results of Operations For the Twelve Months Ending December 31, 2015

Attention Filing Center:

Pursuant to Order No. 16-012 issued in Docket No. UP 334, Idaho Power Company ("Company") is providing information in compliance with Item No. 3 on page 1 of Appendix A approved in the above matter. The Commission ordered the Company to include an addendum to its annual report of operations that reviews all coal-related facility investments of greater than \$25,000 initial value and identifies any of such investments that are currently included in rate base but have been taken out of, or are otherwise no longer in, service. As of January 31, 2016, Idaho Power has identified the following two items that meet the criteria above and have been retired and removed from service:

DESCRIPTION	IN-SERVICE DATE	ACQUISITION COST	NET BOOK VALUE	IPC SHARE
DEWATERING WELLS (THREE WELLS)	1-Dec-98	\$90,590.53	\$42,780.61	\$14,258.78
RECLAMATION FENCE	1-Sep-93	\$28,850.00	\$11,130.28	\$3,709.72

The first item identified as retired and removed from service are the dewatering wells. The wells were installed in 1998 and used until 2014 when surface mining progressed through the location and the wells were no longer used. The second item identified is an electric reclamation fence that was installed in 1993 and was removed in 2005. Based on the results of the audit, the two items identified above were written off in March 2016.

If you have any questions regarding this material, please contact Courtney Waites, Senior Regulatory Analyst, at 208-388-5612 or cwaites@idahopower.com.

Sincerely,

Lisa D. Nordstrom
