		Issue Compliance with OAR 860-025-0030 Filing Requirements	Description OAR 860-025-0005 requires that an application for a CPCN "comply with all other applicable	TPUD Position TPUD has satisifed this condition.	Staff Position	Doris Mast	David Mast	Eric/Loretta	Don Aufdermauer	OFBF/TCFB/ODFA	Kurt Mizee/Tilla-	Kristi Sherer	ORCA Position
		OAR 860-025-0030(1)(b): Information required to be in the Application under OAR 860-025-0005	Commission rules."										
1	0		Tillamook PUD's Transmission Line will be operated at 115 kV and will be sourced from an existing breaker in BPA's Tillamook Substation. The Transmission Line will run 8.6 miles From the Tillamook Substation and terminate at the new Oceanside Substation.	The Application includes a detailed line description.									
1	1	Purpose of proposed transmission line	The purpose is to adequately provide service to existing and new loads in a portion of Tillamook PUD's service territory, and to increase safety and reliability of TPUD's existing system.	The Application includes sufficient information describing the purpose of the line.									
2	1.1	Necessity of proposed transmission line	The necessity is to increase reliability, accommodate load growth by adding system capacity, and address aging infrastructure. RELIABILITY "tull provide a new more reliable source of power to the Netarts/Oceanside areas, will provide a connection to other power sources (normally open looped connection), and substantially reduce the number of customers involved in an outage and the length of the outage. LOAD GROWTH The Wilson River Substation is approaching its capacity due to load growth in the City of Tillamook. Bay City, and the communities of Netarts and Oceanside. AGING INFRASTRUCTURE Approximately two miles of the existing radial distribution line serving the Netarts, Oceanside, and Whiskey Creek Road areas consist of a double-circuit pole line that is more than 50 years old."										
6	1.2	Safety of proposed transmission line	Transmission Line will satisfy the Commission's safety criterion, because it will be constructed, operated, and maintained to meet or exceed all applicable National Electrical Safety Code standards, as well as all applicable federal, state and local laws, regulations, and ordinances.	The Application includes sufficient information demonstrating the safety of the line.									
7	1.3	Practicabilly of propopsed transmission line	Tillamook PUD, in collaboration with the community and its leaders, has developed a route that is practicable and has the least overall impact on the community.	The Application includes sufficient information describing practicability of the line.									
8	1.4	Justification of proposed transmission line	Transmission Line will provide many benefits to Tillamook PUD and its customers and will allow Tillamook PUD to continue to meet its obligation to provide safe and reliable service to all of its existing members and future members.	The Application includes sufficient information demonstrating the justification of the line.									
9	2	OAR 860-025-0030(1)(c): Spatial information	This rule provision requires an application for a CPCN to contain various maps and figures.	The Application includes the spatial information required by this rule.									
10	3	OAR 860-025-0030(1)(d): Cost information	This portion of the Commission's rules requires Tillamook PUD to provide estimated costs of certain components of the Transmission Line.	The Application includes the cost information required by this rule.									
11	4	Financial feasability information required under OAR 860-025-0030(1	The rate impact to existing members from the proposed transmission line is not expected to be significant. Tillamook PUD expects to receive financing for the Transmission Line from RUS.	The Application includes the financial information required by this rule.									
12	5	OAR 860-025-0030(1)(f): Information related to potential condemnation of property	Tillamook PUD is seeking consent, in the form of easements, from landowners along the Transmission Line route. Until easements are obtained, condemnation is a potential for most properties	The Appliction includes sufficient information relating to potential condemnation of property.									
13	6	OAR 860-025-0030(1)(g): Information related to alternate routes	TPUD conducted a thorough analysis of altnernative routes for siting the proposed tansmission line.	The Application includes sufficient information relating to alternate routes.									
14	7	OAR 860-025-0030(1)(h): Additional information	Tillamook PUD has conducted its own investigation into the need for the line and has determined it is in its customers' best interest to construct the line. The Transmission Line is needed to provide safe and reliable service to Tillamook PUD's customers.	TPUD has satisifed this condition.									
15	8	OAR 860-025-0030(2) and (3): Land use information	As noted in the State Agency Cordination Program, all comprehensive plans in the state have been acknowledged to be in compilance with Statewide Planning Goals.	TPUD will rely on local government determinations for land use compatibility of the line and has demonstrated that such approvals are possible.									
16	8.1	Statewide planning goals	The Commission can determine that the application is consistent with Statewide Planning Goals	Independently from local land use approvals, the Application sufficiently describes how the proposed transmission line is consistent with applicable statewide planning goals.
