**Re: Docket No. UM 1793 - In the Matter of IDAHO POWER COMPANY Application for Approval of Solar Integration Charge.**

Attention Filing Center:

On August 10, 2016, Idaho Power Company (Idaho Power or Company) filed its Application for Approval of Solar Integration Charge in this docket. In that filing, the Company presented its 2016 Solar Integration Study, and asked the Commission to approve the charges derived from the study.

On October 14, 2016, Staff and the intervenors to the docket—Renewable Northwest and Oregon Solar Energy Industries Association—filed comments on the Company's Application. Each of these parties recommended that the Commission approve the Company's Application. In addition, these parties made recommendations for future integration studies and related analysis performed by the Company. In its Reply Comments, filed on October 21, 2016, the Company stated its appreciation for the parties' approval recommendations. Idaho Power also responded to recommendations made by the parties for future IRPs—supporting some and opposing others.

The parties believe that the record in this case is fully developed and the parties' positions on additional issues are clear. All parties agree that the Commission should approve the Company's proposed solar integration rates based on the 2016 Solar Integration Study. In addition, the parties believe that their views on future studies are clear. For these reasons, the parties all agree to waive the hearing and any further briefing in this case.

Very truly yours,

Lisa Rackner
