Re: Bi-Annual Filing pursuant to Condition(1) of Advice No. 14-14, Schedule 320 Meter Information Services Tariff

The purpose of this filing is to satisfy the Commission approved conditions set forth by Staff during the filing of Advice No. 14-14. The condition stated:

 PGE is directed to provide a report to staff, every six months, beginning November 1, 2014, containing a copy of any new custom contracts entered into with the customers or substantive amendment (terms and pricing changes) to an existing contract.

For the reporting period between November 1, 2015 and May 1, 2016, under Schedule 320, PGE has entered into two new custom contracts during this period. The contracts are attached under Attachment A with customer sensitive information redacted.

PGE also submits a template, as Attachment B, that details the types of legacy custom contracts currently in effect, the description of these custom services, pricing differences from the Schedule 320 tariff in effect, the number of legacy customers in each custom contract type, the number of customers entering into custom contracts during the reporting period, and the total number of customers under custom contracts.

Please direct any questions regarding this filing to me at (503) 464-8718. Please direct all formal correspondence and requests to the following email address pge.opuc.filing@pgn.com

Sincerely,

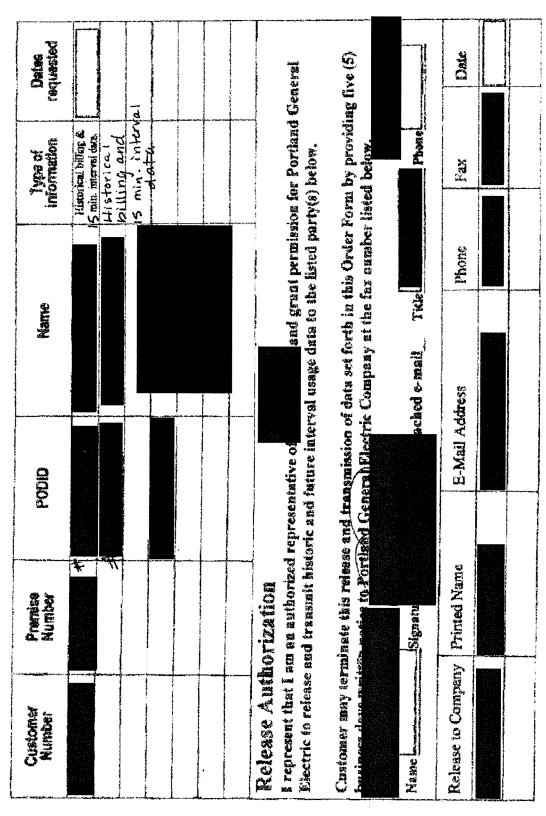

Karla Wenzel

Manager, Pricing & Tariffs

Bi-Annual Filing pursuant to Condition (1) of PGE's Advice No. 14-14, Schedule 320 Meter Information Services Tariff

Attachment B

Custom Services	Description of Service	Pricing diffeerences From Schedule 320	Legacy Customers	New Customer since October 1, 2015	Customer Total
SFTP (Secure File Transfer Protocol)	PGE transfers customer meter data to 3rd party software vendor approved by the customer.	The Schedule 320 monthly fee per meter (\$70) is reduced by an amount equal to the vendor hosting fee (\$32) and some administrative labor (\$8) because customer no longer uses PGE Energy Expert Product.	17	2	19
Gas Data	A SFTP of NW Natural gas Meter data, if possible, to PGE Energy Expert Product enables customer to monitor both electric and gas usage.	The same incremental monthly and setup fees in the current tariff apply for assembling the gas meter data.	īV	0	ľ
Sub-Metering/monitoring	Set-up and procurment of additional equipment to monitor electric subloads, water, and/or gas. Installation of equipment on customer premises performed by customer or a contractor of customer's choice.	Price is negotiated depending on the type of device, the number of channels (i.e. sub-monitoring levels), and other custom circumstances. TC-65 or Hobo devices necessitate a \$50 communication fee. This fee accounts for the cost of cell charges the vendor passes on to PGE. Devices such as a \$300 do not necessitate a fee because they use a hardline connections instead of cell communication. Monthly and PGE set-u fees also apply.	Ŋ	0	Ŋ
Substation Feeder Data	Instead of customer premise meter data, customer may monitor its meter data at the feeder level from PGE's Scada System. This data is nonvalidated and thus at a lower standard of quality than premise meter data.	The monthly meter fee is reduced to \$30 to reflect the reduction in costs to validate data. The setup fee is also reduced to %50 to reflect the reduction in the costs assembling data at the feeder level instead of the premise level.	H	0	7
