Pension expenses under Trustee Retirement Plan, originally adopted 1/1/43, as amended:			
Operating contribution Construction contribution	926 182.3		\$ 0 \$ 0
The Retirement Plan of Idaho Power Company is a non-contributory trustee plan providing, in general, benefits of 1.5% of final 5 years average earnings multiplied by the years of credited service. Effective January 1, 2011, the benefit has been reduced to 1.2% for employees hired on or after that date. The 2014 FAS 87 pension expense was \$22.7 million (\$1.0 million Oregon portion), and the estimated 2015 FAS 87 pension expense is \$42.6 million (\$1.9 million estimated Oregon portion). The 2014 service cost component was \$25.3 million, and the estimated 2015 service cost is \$33.8 million. The minimum plan contributions expected to be required during 2015 are \$0 million. It is possible that the Company could fund in excess of the minimum required amount in 2015. Contributions made in 2014 were \$30 million. Idaho Power has differing accounting methodologies between its Oregon and Idaho jurisdictions. In Oregon, pension accounting is on the accrual basis, while in Idaho it is on a cash basis. Because of the difference in timing between the two jurisdictions, Idaho Power now records the construction portion of Oregon pension expense to a regulatory asset in order to simulate the allocation of pension as an overhead cost to construction outside of the Company's fixed asset system.		\$ 0	\$ 0

<u>Supplemental Information - Executive Officer</u> <u>Compensation Other Than Salary</u>

1. <u>Life and Disability Insurance</u>

The amount shown represents the cost of life insurance.

The Company has a self-insured short-term and long-term disability plan for all regular employees.

2. Deferred Compensation

The Company has a non-qualified, deferred compensation plan for certain of its management group, which includes all officers. The Plan provides for deferral of 50% of salary and/or bonuses and the account balance is distributed after the employee leaves IDACORP, or earlier if an early withdrawal is requested. Deferrals earn returns (or losses) in deemed investments, i.e., as if they had been invested in investment choices available under the Idaho Power Company Employee Savings Plan (ESP).

3. Incentive:

Annual Incentive Plan:

Effective January 1, 1998, the Company implemented the Executive Incentive Plan. This incentive plan ties a portion of each executive's annual compensation to achieving certain financial and operational goals. The award opportunities for officers vary by position as a percentage of base salary ranging from 35 percent to 80 percent at target levels. This plan does not permit the payment of awards if there is no payment of awards under the employee incentive plan (a plan for non-executive employees). The amount of incentive to be paid out in 2016, for 2015 performance, has been estimated. When filing a general rate case this portion of officer's incentives are removed in its entirety from the revenue requirement and borne by the Company's Shareholders.

2000 Long-Term Incentive Plan

The Company has established a long-term incentive and compensation plan that includes all officers. This plan permits the grant of various forms of awards, including incentive stock options, nonqualified stock options (NQSOs), stock appreciation rights, restricted stock units, performance units, restricted stock and performance shares (starting in 2004), and other awards. NQSOs were granted in years 2000 through 2005. In 2006 through 2015, performance shares with two separate goals, Cumulative Earnings Per Share, and relative Total Shareholder Return, were granted with three-year performance periods. In 2006 through 2015, restricted stock shares were granted with a time-based three-year restriction. The Compensation Committee of the Board of Directors has the authority to grant awards and make changes to this plan.

Stock options vest and become exercisable on a regular basis; however, the cost of future exercised options per individual officers is not determinable.

4. Other Benefits:

Senior Management Security Plan (SMSP)

This program provides for certain amounts of salary continuation in the event of death or retirement and to supplement existing benefits for each officer covered under this plan. It is designed so that if assumptions made to mortality expectation, policy dividends and other factors are realized, the company will recover the cost of this plan. Investments (primarily life insurance and equities) are held to informally fund this plan. The cost per individual officer is not determinable.

Physical Examination

The Company provides for annual physical examinations for all principal executive officers on an optional basis. It is estimated that the cost ranges up to \$250 for each examination taken.

Compensation Absence

The Company provides a graduated compensation absence program called Flexible Time Off (FTO) for all regular employees based on years of service. FTO is conceptually a combination of sick and vacation leave, which can be used for any purpose. Amounts accrue monthly up to a maximum. Account balances are paid at termination.
