RE: waiver of 12-month installation requirement (OAR 860-084-0210 (1) – **REQUESTING A 4 MONTH EXTENTION.**

To Whom It May Concern:

I am a Portland General Electric (PGE) customer – John Williams of Laurelhurst Dentistry. In October of 2010 I secured a 10KW Solar Payment Option (SPO) allocation.

Due to shading from a neighbor's tree there was uncertainty as to the performance of the solar electric system. We have delayed until we have finally confirmed that the neighbor's tree will come down in the next couple of months.

Requesting Waiver

I request a waiver of the 12-month solar installation requirement pursuant to OAR860-084-0210(1). I previously did not know a waiver option was available or we would have requested one prior to now. I understand the timing is tight on this request but appreciate the commissions consideration. I feel this is a "good cause" for an extension and that the utilities and OPUC want to see more solar systems installed.

Now that I know there will be no tree a professional solar site survey determined an excellent site for solar and have wanted to install a system for several years now. I would hate to miss out on this opportunity and look forward to having the project completed.

Sincerely,

/s/

John Williams

## Capacity Reservation Application for Solar Payment Option

Capacity for Solar Payment Option is reserved on a first-come, first-served basis until the capacity limit is reached for the current reservation period. We will e-mail you when your reservation is approved and provide your reservation start date.

A deposit is required, but it will be refunded with PGE's first solar payment to you. You must meet the following deadlines or your deposit will be forfeited:

- Interconnection Application submitted within two months of your reservation start date.
- Solar system must be fully operational within 12 months of your reservation start date.

### Customer and Facility Information:

Account Type: **Business**  
Business Name: **Laurelhurst Dentistry**  
Customer Email Address: **j.p.williams@earthlink.net**  
Customer Phone Number: **(503) 807-4050**

### PGE account for property where system will be installed (from PGE bill):

PGE Account Number: **1716623-557885-3**

### Site Location:

Address: **2520 East Burnside Street**  
**Portland, OR 97214**  
County: **Multnomah**  
VIR Rate: **\$0.5850 per kWh**

### System Capacity Reservation Size:

Systems applying for participation in the Solar Payment Option must be sized to generate 90% or less than existing service's annual usage. If annual usage is unavailable, it will be estimated by PGE based upon the rolling average of three years' usage by a similarly situated site.

Nameplate Capacity (kW DC): **9.8**  
System Production Estimate (annual): **10000 kWh**

The Eligible System is limited to 90 percent of the electric site's previous usage. You can find information about expected generation at <http://energytrust.org/shared-resources/solar-calculator>

Anticipated date when solar system will be fully operational: **7/1/2011**

Anticipated Level of Interconnection Application: **Level 1 (system sized up to and including 25 kW DC)**

## System Installer Information:

Installer Company Name: **Future City Solar**  
Installer Phone Number: **(503) 407-6820**  
Contact Name: **Jordan Weisman**  
E-Mail: **jordan@futurecitysolar.com**

Systems must be installed by an ETO trade ally in good standing.

### When submitting your capacity reservation, you agreed to the following statements:

#### Capacity Reservation Certification:

I hereby certify that I have read and understand the Solar Photovoltaic Pilot Program and Interconnection Services Agreement ("Agreement"). I acknowledge that the rate paid for the generation the solar system produces over the contract period is provide in PGE Schedule 205 and fixed by the Agreement. I acknowledge that I will receive the rate in place at the time the capacity reservation start date.

#### Interconnection Application Fee:

I hereby attest that an interconnection application fee, if applicable, is required before the interconnection application can be processed. There is no application fee for a Level 1 interconnection. The fee amount for a Level 2 interconnection is \$50 base plus per kW of DC Nameplate Capacity. The Interconnection Application fee is payable to Portland General Electric and will be included with the interconnection application.

#### Appropriate System Size and Quality:

I hereby attest that system size must be sized to generate 90% or less than existing service's annual usage. If my system is oversized in accordance with my annual usage, I will reduce the size of the system. I will attest that I have control of the site where is system is installed.

#### Applicant Signature:

I hereby attest that the information submitted on this application is accurate to the best of my knowledge. I certify that the system will be constructed from new components and compliant with Oregon Public Utility Commission quality and reliability requirements for photovoltaic systems. I also certify the system will use all new equipment and is financed without Energy Trust of Oregon payments under ORS 757.612(3)(b)(B) or Oregon tax credits under ORS 469.160 or ORS 469.185 to 469.225, or Blue Sky program grant.

NOTE: Approval for a Solar Payment Option System is contingent upon the applicant's system passing the Interconnection Application screens and completing the review process set forth in OPUC Administrative Rule Chapter 860, Division 084 and is not granted by the submission of this application form. The Capacity Reservation Deposit will be refunded with the first VIR payment to those systems that do not forfeit.
