RE: Docket UM1538 solar extensions

I am asking for an extension for my solar pilot payment program/net metering/VIR. Project #0105T6  
When we made the plan to finish the project this summer. I had too many of my accounts owing me  
hence not enough funds. I had to delay my project until my receivables came in and that time has  
come. I would love to proceed with my solar project immediately, but my solar installer Solar Energy  
Solutions tells me there may not be enough time to certify the project by the deadline date.

Thank You,

Kenneth Hayes
