Monday, March 16, 2015

To: Oregon Public Utility Commission

From: Imagine Energy on behalf of Ganesh Sonpatki, owner of The Downtown Value InnRe: Request for Waiver of OAR 860-084 Installation Requirements

I am requesting a waiver of the rules regarding the 12 month deadline to complete 1 Solar Pilot Program projects for Mr. Ganesh Sonpatki.

The PPL reservation identification is: 21V9A2, awarded on April 14, 2014 The project, called the Downtown Value Inn, is located at 415 SW Montgomery Street, Portland, OR 97201

The deadline for each of these projects is April 14, 2015. We are requesting a 2-month extension until June 14th, 2015.

Our client properly submitted their deposits and the appropriate PGE Interconnection Applications and Agreements within the correct deadlines. He has also signed a contract to install the system on May 16, 2014. This contract included installing solar on 13 properties, 11 of which received VIR reservations. In the summer of 2014, after the reservations were secure, we embarked on securing financing for all of the projects, totaling over \$850,000. We found a bank that specialized in financing solar and Mr. Sonpatki committed with a \$10,000 deposit to finance with this group in October, 2014. However, after an extensive underwriting process, the bank found the financials and ownership of the 13 separate properties too complex to lend in one package. In January 2015, the bank informed Mr. Sonpatki that they would only finance one project.

Mr. Sonpatki began a new process to finance each project separately, and was successful at finding a local bank to approve financing for all of the remaining projects in February, 2015. We prioritized installation based on ease of permitting and installing at each location. 8 out of the 11 VIR projects are underway and will be complete on time for their respective deadlines, but The Downtown Value Inn is last on the list. We have begun the engineering calculations for this commercial project and will submit for permit in the next week. However, Mr. Sonpatki does not want to commit to the equipment costs if we cannot complete the installation before the deadline on April 14th. A 2-month extension would allow us to complete the project easily.

Thank you for your consideration of this request,

Jonathan Cohen Principal, Imagine Energy, LLC Ph: 971.404.9671 Email: j.cohen@imagineenergy.net From: Oregon Solar oregonsolar@PacifiCorp.com

Ganesh Sonpatki 415 SW Montgomery St Portland, OR 97201 Meter # 1424474

We are pleased to inform you that we have approved your application to participate in Pacific Power's Oregon Solar Incentive Program (OSIP). A capacity reservation of **9.99 kW** with an incentive of **\$0.390 per kWh** has been set aside for your project. Your project tracking number is **5895648**. Your Capacity Reservation Start date is: **04/14/2014**.

As a participant in this program, there are certain milestones from the Reservation Start Date that must be met in order to stay in the program and receive incentive payments:

- within 60 days of your Reservation Start Date you must complete the OSIP Interconnection Application; and
- within 12 months of your Reservation Start Date the system must be installed.

In addition, after installation and interconnection of your system and prior to Pacific Power making its first payment to you:

You need to submit a Data Collection Survey available at

www.pacificpower.net/oregonsolar.

- You will be required to complete two additional surveys that will be sent to you at a later date:
 - a survey to measure your satisfaction with Pacific Power's program and solicit ideas for improving the process; and
 - 2. a second survey to solicit feedback on your decision to participate in OSIP as compared to our Net Metering option.

The next step is for you to complete within the next 60 days the OSIP Interconnection Application which is included within the attached Agreement. To expedite the process you are encouraged to complete the entire OSIP Volumetric Incentive Payment and Interconnection Agreement and submit all of the forms together. Also attached to this e-mail are instructions to complete the process.

Thank you for your participation in our program. We are pleased to offer options to help you harness the renewable power of the sun to provide energy for your home or business and look forward to working with you. If you have any questions, please call 1-503-813-5951 or e-mail us at <u>oregonsolar@pacificorp.com</u>

Sincerely,					
Pacific Power					

OS
