

1 Oregon City wire center should be reclassified as Tier 1 and whether the Corvallis wire center
2 should be reclassified as Tier 2.

3 The Stipulating Parties have agreed to the following facts:

4 1. In each of the Oregon City and Corvallis wire centers, CenturyLink includes in its
5 counts of fiber-based collocators one carrier about which the parties agree as to the factual
6 characteristics but do not agree whether it meets the definition of a fiber-based collocator. This
7 carrier is referred to below as the “disputed fiber-based collocator.”
8

9 2. In each of the Oregon City and Corvallis wire centers, the disputed fiber-based
10 collocator: (1) is a carrier that is unaffiliated with CenturyLink; (2) maintains collocation
11 arrangements within CenturyLink’s Oregon City and Corvallis wire centers that each have an
12 active electrical supply; and (3) operates a fiber optic cable that terminates at collocation
13 arrangements within CenturyLink’s Oregon City and Corvallis wire centers.

14 3. The cable operated by the disputed fiber-based collocator in the Oregon City and
15 Corvallis wire centers connects an end-user customer premises outside the wire center but within
16 the CenturyLink wire center exchange boundary to the disputed fiber-based collocator’s
17 collocation space in CenturyLink’s central office.
18

19 4. The disputed fiber-based collocator also leases from CenturyLink, on a non-IRU
20 basis, unbundled dark fiber that connects to its collocation arrangements within CenturyLink’s
21 central offices. The disputed fiber-based collocator connects this fiber to its own fiber network
22 through its collocation spaces in other CenturyLink end offices not at issue in this proceeding.
