OF OREGON

UW 149

STAFF TESTIMONY
OF

KATHY WILLIS

In the Matter of
CROOKED RIVER RANCH WATER COMPANY
Request for a General Rate Revision.

September 28, 2012

CASE: UW 149
WITNESS: Kathy Willis

PUBLIC UTILITY COMMISSION
OF
OREGON

STAFF EXHIBIT 100

Testimony in Support of the Stipulation

September 28, 2012

Q. PLEASE STATE YOUR NAME, OCCUPATION, AND BUSINESS ADDRESS.

A. My name is Kathy Willis. I am the Senior Water Utility Analyst in the Economic Research and Financial Analysis Division of the Utility Program for the Public Utility Commission (Commission). My business address is 550 Capitol Street NE Suite 215, Salem, Oregon, 97301-2551.

Q. PLEASE DESCRIBE YOUR WORK EXPERIENCE AT THE OREGON PUBLIC UTILITY COMMISSION.

A. I have been with the Public Utility Commission of Oregon (Commission) since 1987 and have participated in over 100 water utility dockets involving rate filings, finance applications, property dispositions, exclusive service territories, adequacy of service investigations, water and wastewater rulemakings, formal complaints, and affiliated interest matters.

Q. WHAT IS THE PURPOSE OF STAFF'S TESTIMONY?

A. The purpose of Staff's testimony is to introduce and support the stipulation agreed to by the parties in Docket UW 149.

Q. WHO ARE THE PARTIES TO THE STIPULATION?

A. The parties are Crooked River Ranch Water Company (CRRWC), appearing by and through its attorney Tommy Brooks; Staff, appearing by and through its attorney Jason Jones; and Intervenors Steven Cook and Barbara Oakley (Intervenors) collectively referred to as the "Parties."

Q. DID YOU PREPARE AN EXHIBIT FOR THIS DOCKET?

A. Yes. I prepared Exhibit Staff/101, consisting of 12 pages:

Revenue Requirement	Staff/101, Willis/1
Staff Adjustments	Staff/101, Willis/2
Revenue Sensitive Costs	Staff/101, Willis/3
Plant and Depreciation	Staff/101, Willis/4-9
Stipulated Rates	Staff/101, Willis/10
Stipulated Rates Impact	Staff/101, Willis/11
Stipulated Rates Impact Graph	Staff/101, Willis/12

Q. HOW IS YOUR TESTIMONY ORGANIZED?

A. My testimony is organized as follows:

ISSUE 1, STAFF'S SUMMARY RECOMMENDATION

Q. BRIEFLY SUMMARIZE STAFF'S RECOMMENDATION.

A. Staff recommends that the Commission adopt the stipulation agreed to by the Parties. The Parties stipulated to a revenue requirement of $577,793 resulting in a 1.0 percent increase over adjusted test year revenue, a rate base of $541,052 with a zero percent rate of return. The table below summarizes certain line item totals from CRRWC's test year revenue requirement as filed; Staff's adjusted test year revenue, expenses, rate base; CRRWC's proposed revenue requirement; and the Stipulation revenue requirement:

Table 1 – Revenue Requirement Details

	CRRWC Test Year As Filed	Staff Adjusted Test Year	CRRWC Proposed	Stipulated Amounts
Revenues	590,324	572,348	652,819	577,793
Operating Expenses	563,636	518,863	592,173	518,877
Total Deductions	575,444		652,632	577,793
Net Income	14,880		187	0

ISSUE 2, CRRWC DESCRIPTION AND REGULATORY HISTORY

Q. PLEASE DESCRIBE CRRWC.

A. Crooked River Ranch Water Company (CRRWC or Company) is a non-profit, mutual benefit corporation with members, with the Company commonly referred to as an association. CRRWC provides water service to approximately 1,505 customers at Crooked River Ranch (CRR), Oregon. CRR is an unincorporated private resort community in southern Jefferson County with a small portion of the ranch in north Deschutes County. The 12,000-acre ranch has a population of approximately 5,000 and is located between the Deschutes River and the Crooked River near the south end of Lake Billy Chinook. It is west of U.S. Route 97 between Culver and Terrebonne.

Q. PLEASE DESCRIBE CRRWC'S REGULATORY HISTORY.

A. CRRWC is currently under the jurisdiction of the Public Utility Commission (Commission) pursuant to Commission Order No. 11-060 entered in Dockets WJ8, UW 120, UI 281, UI 282, and UCR 100 on February 18, 2011. The Commission has conducted several investigations of CRRWC over the years, including jurisdictional, customer complaints, affiliated interest, and rate issues as listed below:

UM 1036	No jurisdiction asserted, Order No. 03-116, issued February 13, 2003.
WJ 8	Jurisdiction by customer petitions.
UW 120	Rate investigation.
UI 281	Affiliated interest application with James Rooks.
UI 282	Affiliated interest application with Jacquie Rooks.
UCR 100	Refusal of service and connection charge complaints.
UW 149	Current rate case.

Each case previous to the current rate case, UW 149, presented contentious, difficult, and unique issues that revolved around CRRWC's former Board of Directors (Board), management, and employees. Eventually, a group of CRRWC customers filed a civil lawsuit against CRRWC that resulted in a complete change in CRRWC's Board, management, and employees. The issues surrounding the old Board, management, and employees were resolved.

In the following narrative of CRRWC's regulatory history, please note that some dockets were active for prolonged periods of time and overlapped each other. To avoid confusion, Staff will be referring to the "old Board" and the "new Board." The new Board took over operations and management in November 2010.

Docket WJ 8

In April 2006, under the old Board, over 20 percent of the customers petitioned the Commission for regulation of CRRWC's rate and service. The petitions were prompted by customer dissatisfaction with the old Board's management of the Company and its poor customer service. On May 24, 2006, CRRWC requested a hearing to dispute the petition. At the hearing, held on August 8, 2006, CRRWC argued that it was exempt from Commission regulation because

it had reorganized as a cooperative on July 5, 2006. After the hearing and legal briefs, the Commission found the customer petitions valid and asserted jurisdiction. The Commission held that CRRWC's attempt to reorganize as a cooperative was without legal effect. Order No. 06-642 was entered November 20, 2006.

CRRWC appealed the Commission's decision to the Oregon Court of Appeals (Court). The Court upheld the Commission's finding that it had received the sufficient number of petitions with valid signatures to meet the 20 percent threshold under ORS 757.063(1). The Court further concluded that the Commission erred in finding that its jurisdiction first became effective when the Commission had confirmed and verified its receipt of the threshold number of petitions with valid signatures. The Court held that, " . . . in light of the text, context, and legislative history of ORS 757.063, the legislature intended an association to be 'subject to regulation' only after the PUC issues an order pursuant to ORS 756.515 determining whether the 20 percent threshold had been satisfied." The Court remanded this matter to the Commission to ". . . complete the process contemplated by its notice in light of a correct interpretation of ORS 757.063."[1]

On July 13, 2010, in a matter presented to the Jefferson County Circuit Court, the cooperative corporate status of CRRWC was rejected. CRRWC abandoned its cooperative position.

[1] Commission Order No. 11-060, dated February 18, 2011.

Following the ruling in the Jefferson County Circuit Court, a partial settlement was reached. The Jefferson County Circuit Court approved the partial settlement in a “Limited Judgment" entered August 23, 2010. The partial settlement required a “fair” election for a new Board of directors. The election voted in a new Board. The new Board reversed the course taken by the old Board and previous management. The new Board solicited Commission regulation, and the Commission found sufficient grounds to reassert jurisdiction in Order No. 11-060 issued February 18, 2011.

Docket UW 120

As a result of the jurisdiction WJ 8 docket, the old Board was required to file a rate case. CRRWC filed its first rate case on April 23, 2007, which was docketed UW 120. In its application, CRRWC requested an increase in revenues of 8.13 percent. The Commission issued Order No. 07-527 on November 29, 2007, approving an interim rate reduction of 37.7 percent and eliminating a monthly special assessment to the customers. During the Court of Appeals stay of Commission jurisdiction, CRRWC's old Board raised the customers' rates.

Under UW 120, Order No. 08-177 entered March 24, 2008, required, in part, that CRRWC distribute $118,028 of the assessment fund to the current members. In Order No. 08-181, entered on March 28, 2008, the Commission granted a stay in the distribution of the assessment funds. On May 2, 2008, the Commission issued Order No. 08-243, reordering the distribution of the assessment fund balance of $130,656.26, to be returned to CRRWC current

members. All of these orders were subsequently vacated by Order No. 11-060 on February 18, 2011, when the Commission reasserted jurisdiction and released the special assessment fund back to CRRWC's new Board.

The Commission determined that CRRWC's financial condition should be resolved before setting final rates. The Company and Staff filed a Joint Financial Statement on May 16, 2011, setting forth the plan for resolving the Company's financial situation. The Commission approved the Joint Financial Statement in Order No. 11-181, issued June 1, 2011. The customer rates were allowed to remain as set by the old Board at a higher level in order to help CRRWC pay off legal expense associated with previous litigation. In addition, CRRWC was required to file a general rate case by February 18, 2012.

UCR 100

UCR 100 was a formal customer complaint. The Commission issued Order Nos. 08-379 and 08-383 entered on July 17, 2008, ordering CRRWC to connect a residential customer and to collect a specified connection charge. CRRWC appealed these orders to the Court of Appeals, arguing that the Commission had no jurisdiction to order the customer connected or to set the connection charge. After the required election, the new Board dismissed the Company's appeal of the orders. The customer has been connected and is receiving service. The matter of the connection charge was resolved. The two orders were also vacated by Order No. 11-060.

Dockets UI 281 and UI 282

In Dockets UI 281 and UI 282, the Commission approved the affiliated interest applications of James Rooks and Jacquie Rooks (employees of CRRWC). *See* Order Nos. 08-347, 08-375, 08-353, and 08-378. However, since these two individuals are no longer employed by CRRWC, the applications are moot, and the cases were vacated by Order No. 11-060.

ISSUE 3, CRRWC'S APPLICATION FOR A RATE INCREASE

Q. PLEASE DESCRIBE CRRWC'S CURRENT APPLICATION FOR A RATE INCREASE.

A. In compliance with Commission Order No. 11-181, CRRWC's new Board and management filed an application for a rate increase on February 15, 2012, using a January 1, 2011 to December 31, 2011 test year. CRRWC proposed an overall increase of 10.6 percent[2] or $62,495[3] increase over test period revenues of $590,324, resulting in an annual revenue requirement of $652,819. The Company proposed a total rate base of $709,491 with a zero percent rate of return.

Q. WHAT REASONS DID THE COMPANY GIVE FOR SEEKING A RATE INCREASE?

A. CRRWC stated in its application that it is seeking the change in rates because:

> *The current Board of directors took over in November of 2010. Before that time there was no PUC Regulation. The company*

[2] The Company's application shows a 13.16 percent increase; however, Staff calculated the percentage increase to be 10.6 percent.
[3] The Company's application shows an increase of $75,928; however, Staff calculated the increase at $62,495.

has now been under the PUC for 1 year and wants to be sure the rates are correct. In addition, the rate increase is necessary to cover administrative, operation, maintenance, and repair expenses and provide capital for improvements.

Q. WHY IS CRRWC ASKING FOR A ZERO PERCENT RATE OF RETURN?

A. CRRWC's application states that it is seeking a zero percent return on rate base due to the Company status as a nonprofit organization.

Q. WHAT ARE CRRWC'S CURRENT RATES?

A. CRRWC currently provides service to residential, commercial, and multi-unit dwelling customers; water haulers; and the Crooked River Ranch Homeowners Association (HOA). Although the community has a golf course, CRRWC does not provide irrigation water to the golf course. The current customer classes and rates are shown below:

Table 2 – CRRWC's Current Rates

	CURRENT	Base Rate	Commodity Rate
1	Residential/Commercial	$25.20 per meter + 300 cf	$0.80 per 100 cf
2	HOA Irrigation	$25.20 per meter + 300 cf	$0.80 per 100 cf
3	Nonprofit Multi-Metered	$25.20 per meter + 300 cf	$0.80 per 100 cf
4	Multi-Family Dwelling Unit	$25.20 per meter + 300 cf	$0.80 per 100 cf
5	Temporary Community Event	$25.20 per meter + 300 cf	$0.80 per 100 cf
6	Water Haulers	$25.20 per meter + 300 cf	$0.80 per 100 cf

CRRWC currently charges all customers a base rate of $25.20, which includes 300 cubic feet (cf) of water usage and a commodity rate of $0.80 per each 100 cf of water consumed above 300 cf. According to CRRWC, the average annual monthly bill is $29.54.

Q. WHAT WERE CRRWC'S PROPOSED RATES AND TARIFFS IN ITS INITIAL FILING?

A. CRRWC proposed the following rates and tariffs as listed below:

Table 3 – CRRWC's Proposed Rates

	PROPOSED	Base Rate	Commodity Rate
1	Residential/Commercial	$25.08 per meter	$0.90 per 100 cf
2	HOA Irrigation	none	$0.96 per 100 cf
3	Nonprofit Multi-Metered	$25.08 1st meter only	$0.96 per 100 cf
4	Multi-Family Dwelling Unit	$25.08 per meter	$0.90 per 100 cf
5	Temporary Community Event	none	$0.96 per 100 cf
6	Water Haulers	none	$0.96 per 100 cf

1. A residential/commercial metered tariff base rate of $25.08 and a commodity rate of $0.90 per 100 cf of water use. The Company proposed removing the 300 cf of water allowed with the current base rate;
2. An irrigation rate tariff for Crooked River Ranch Homeowners Association (HOA) with a commodity rate of $0.96 per each 100 cf of water use and no base rate. CRRWC believes that since the HOA has irrigation rights to 4.4 acres of water, permit No. G-2280 from the Oregon Water Resources Department, it should receive a reduced rate;
3. A nonprofit multi-metered customer tariff for the HOA with a base rate of $25.08 for the first meter only and a commodity rate of $0.96 per 100 cf of water used. The HOA has multiple meters;
4. A multi-family dwelling unit tariff with a base rate of $25.08 and a commodity rate of $0.90 per 100 cf of water use. This is the same rate as No. 1 above;

5. A temporary water service for community sponsored events tariff with a commodity rate of $0.96 per 100 cf of water use, with no base rate;
6. A water haulers tariff with a commodity rate of $0.96 per 100 cf of water use, with no base rate;
7. A cross connection control program and backflow prevention device service tariff;
8. A commodity power cost adjustment tariff;
9. A miscellaneous service charges tariff; and
10. CRRWC's rules and regulations.

Q. WHAT PROCEDURAL ACTIONS IN THIS DOCKET HAVE TAKEN PLACE SINCE CRRWC FILED ITS APPLICATION FOR A RATE INCREASE?

A. Since the filing of the application in February 2012, the following procedural actions have taken place:

1. An open house and prehearing conference were held on April 5, 2012, in Crooked River Ranch, Oregon;
2. A workshop was held in Crooked River Ranch, Oregon, on June 26, 2012; and
3. A settlement conference was held in Crooked River Ranch, Oregon, on July 30, 2012.

Q. WHAT WAS THE RESULT OF THE SETTLEMENT CONFERENCE?

A. The Parties reached a settlement of all issues in the case.

ISSUE 4, STAFF'S ANALYSIS OF CRRWC'S APPLICATION AND STAFF ADJUSTMENTS

Q. PLEASE EXPLAIN THE PURPOSE OF THIS PORTION OF TESTIMONY.

A. This portion of testimony provides a foundation of support for the Stipulation. It essentially adopts Staff's findings and recommendations except where expressly identified.

Q. PLEASE EXPLAIN WHY A RETURN ON RATE BASE IS NOT APPROPRIATE FOR CRRWC.

A. CRRWC requested and Staff recommended no return on CRRWC's rate base because the utility is a nonprofit, mutual benefit association with members. All customers of CRRWC are members, and CRRWC is owned by the membership. The members benefit from CRRWC's nonprofit status.

In two previous rate cases filed by nonprofit associations, Angler's Cove (UW 126) and Old Sheep Ranch (UW 129), the Commission approved a zero percent return on rate base due to the nonprofit status of the associations, Orders Nos. 08-389 and 08-514, respectively.

Q. HOW DOES A NONPROFIT ASSOCIATION ACQUIRE CAPITAL TO FUND MAJOR REPAIRS, EMERGENCIES, OR IMPROVEMENTS WITHOUT AN OPPORTUNITY TO EARN A RETURN ON RATE BASE?

A. In UW 126 and UW 129, the Commission approved a "System Program Fund" for each nonprofit association. The System Program Fund is a reserve account to collect funds set aside for major repairs, emergencies, and capital improvements.

Investor-owned water companies are allowed an opportunity to earn a return of and on their investments in order to obtain necessary capital. In Order 07-527 (UW 120) at 28, the Commission stated, "In the typical case, we balance the interests of ratepayers and investors in setting the return on equity at a rate that is: a) commensurate with the return on investments in other enterprises having corresponding risks; and b) sufficient to ensure confidence in the financial integrity of the utility, allowing the utility to maintain its credit and attract capital (ORS 756.040)."[4]

By contrast, nonprofit organizations are not allowed a return on their investments. When referring to nonprofit organizations, Commission Order No. 07-527 goes on to state:

> *In this case, the owners are not "investors" in that they receive no return on their investment that can be reclaimed. As a result, we find that the interest of the customer/owners is best served by setting the return on their capital at zero.*
>
> *With no long-term debt and the zero return on capital, the adopted rate of return is zero. This is the most favorable outcome for the customer/owners and is unique to this case*.[5]

Therefore, another means of raising capital must be allowed for nonprofit water systems in order to generate reserve funds to buffer the cost of major repairs and provide for capital expenditures. Small water systems, whether for

[4] Commission Order No. 07-257, dated February 29, 2007.
[5] Id.

profit or nonprofit, must have a means of obtaining capital due to the capital intensive nature of the infrastructure.

In addition to these sources, due to the difficulty of most small water systems to attract capital, ORS 757.355(2) allows the Commission to include in rates costs for specific capital improvements that are not presently used and useful.

Q. WHAT DOES STAFF RECOMMEND AS A MEANS FOR CRRWC TO OBTAIN CAPITAL FOR MAJOR REPAIRS, EMERGENCIES, AND CAPITAL IMPROVEMENTS?

A. Staff recommends the Commission approve a System Program Fund for CRRWC. CRRWC calls its System Program Fund a "Contingency Fund." Regardless of the name of the fund, it is a reserve fund. Hereafter, Staff will refer to CRRWC's reserve fund as the Contingency Fund. CRRWC's current Contingency Fund has a balance of $70,000.

The "Operating Reserve Policy Toolkit for Nonprofit Organizations" recommends at a minimum, a reserve fund for nonprofit organizations of three months of the organization's annual expense budget.[6] The publication went on to identify revenue and spending risk factors for nonprofit organizations. The more risk factors, the greater the need for a higher reserve fund, such as increasing the minimum reserve fund from three to six months of annual expenses.

[6] Operating Reserve Policy Toolkit for Nonprofit Organizations, First Edition, September 15, 2010, sponsored by the National Center for Charitable Statistics, Center on Nonprofit and Philanthropy at the Urban Institute, and United Way Worldwide, page 16-17.

Staff reviewed the risks and identified a majority of the risk factors applicable to CRRWC. Based on the applicable risk factors, Staff believes the optimum benchmark for CRRWC's reserve account should be at least six months of the annual operating expenses or $259,438.

In addition, Staff recommends the Commission approve an annual expense to help build the Contingency Fund to meet the optimum reserve for the water system.

Q. PLEASE EXPLAIN CRRWC'S "ASSESSMENT FUND."

A. CRRWC's Assessment Fund is a collection of customer surcharges put in place by CRRWC's old Board. The fund was identified in UW 120 and the surcharge was removed. The Assessment Fund has a current balance of $93,577.

Q. PLEASE EXPLAIN HOW CRRWC'S ASSESSMENT FUND SHOULD BE TREATED.

A. Staff recommends that CRRWC's Assessment Fund balance be transferred to CRRWC's Contingency Fund, creating one reserve account for CRRWC to manage. By combining the Assessment Fund balance of $93,577 with the Contingency Fund's current balance of $70,000; it results in a balance of $163,577. The difference between the proposed balance of the combined Contingency Fund and Staff's recommended optimum $259,438 Contingency Fund level is $95,861.

The combined Contingency Fund use would be limited to repairs, emergencies, and capital expenditures. However, since working cash is a

component of rate base, and it is not included in CRRWC's rates,[7] $43,240 of the Contingency Fund may be used as working cash for providing a cash flow to accommodate the lead/lag time issue of receiving revenues and paying bills. Working cash is a calculation of one month of annual operating expenses.

Staff recommends the Commission require CRRWC to report its annual expenditures from the Contingency Fund to the Commission in line item format showing the date, supplier, amount, and a brief description of the expenditure. Staff also recommends the Commission require CRRWC to annually report its monthly expenditures from the working cash component of the Contingency Fund separately. The reported information is to be attached to CRRWC's annual report.

The capital expenditures from the Contingency Fund will be considered as Contributions In Aid of Construction (CIAC) in future rate cases and will be disallowed in rate base as the costs have been paid for up front by the customers.

Q. PLEASE EXPLAIN WHAT CIAC IS, AND WHY IT IS NOT ALLOWED IN RATE BASE.

A. The Internal Revenue Service defines CIAC as any item or amount of money, services, or property received by a utility that is provided at no cost to the utility. It represents an addition or transfer to the capital of the utility, and is utilized to

[7] In ratemaking, working cash is a component of rate base that would normally earn a return. Because CRRWC has a zero percent rate of return, the Company does not earn a return on its working cash.

offset the acquisition, improvement, or construction costs of the utility's property, facilities, or equipment used to provide utility services to the public.

Q. IS IT STANDARD PRACTICE TO REMOVE CIAC FROM RATE BASE?

A. Yes. Oregon Administrative Rule 860-036-0756(3) specifically requires that CIAC be separated from utility plant and accounted for and depreciated on a separate schedule outside the ratemaking process.

Q. PLEASE DESCRIBE STAFF'S ADJUSTMENTS TO CRRWC'S TEST PERIOD REVENUES.

A. Staff's proposed adjustments to CRRWC's test period revenues are:

1. Staff reduced water sales by customer reimbursements and removed the reimbursements as a negative to revenues, and
2. Staff removed pass through costs that should not be included in revenues.

The effect of Staff's adjustments to test period revenues reduced CRRWC's filed test year revenue from $590,324 to $572,348.

Q. PLEASE DESCRIBE STAFF'S MAJOR ADJUSTMENTS TO CRRWC'S TEST PERIOD EXPENSES.

A. The majority of Staff's adjustments are the result of transferring expenses to their appropriate accounts. A summary of Staff's adjustments is shown in Staff/101, Willis/2. Below are Staff's more significant adjustments.

1. Wages: CRRWC requested an annual expense of $160,315 with a $97,590 test year expense. The test year expense was low because the full complement of staff at CRRWC did not work the entire 2011 year. Employees were brought on during the year. Staff adjusted wages to reflect

the current number of employees' annual cost, including a $5,000 raise to the manager, as approved by the new Board.

CRRWC asked for wages expense based on 2,180 annual hours per employee. On a weekly basis, this equates to 41.92 hours per week per employee. Staff has adjusted the annual hours to 2,080, which equates to 40 hours per week per employee. This is the standard work week in the United States. CRRWC pays employees every second week (as opposed to bi-monthly), which affects the specific number of weeks in any given year. The rate case process is used to determine the expenses in a typical year, and the average numbers of weeks in a typical year are 52. Staff recommended a total annual wage expense of $159,840.

2. Benefits: In its application, CRRWC did not seek employee benefits. As the case progressed, the new Board approved a resolution to provide an additional four percent of wages to employees as benefits. The benefits are schedule to take effect in January 2013. Staff recommended a total annual employee benefits expense of $6,394 or four percent of wages.
3. Debt Service Expense: Since CRRWC does not receive a return on its investment, Staff moved the annual payments for two vehicle loans to an annual expense. Although Staff could have allowed CRRWC a return on debt, it appeared simpler and more accurate to establish a debt service account. Staff has requested that CRRWC be required to file a rate case to coincide with the completion of the two loans. Staff recommended a total annual debt service expense of $11,446.

4. Telecommunications: CRRWC requested an annual expense of $13,200 with a test year expense of $18,799. As CRRWC's new Board began setting up its communication equipment during 2011, several communication contracts were executed and later terminated. Staff made adjustments to reflect the three-year amortization of the one-time fees. Staff recommended a total annual telecommunication expense of $9,329.
5. Office Supplies, Repairs, and O&M: Most of Staff's adjustments were to move the line items in and out of these three accounts to record them in the proper account. A few line items were capitalized and moved to Utility Plant. In the table below, Staff shows the Company's proposed annual expense, the Company's test year expense, and Staff's proposed annual expense. The totals of the three accounts show that although Staff moved line items in and out of the three accounts, Staff's total proposed annual expense exceeds CRRWC's proposed annual expense. This is because line items were also removed from other accounts and recorded in one of these three accounts, and CRRWC provided verifiable invoices and receipts for amounts greater than its original proposed annual expense. The table below shows CRRWC's proposed expenses, CRRWC's test year expenses, and Staff's recommended annual expenses for the three accounts.

Table 4 – Office Supply, O&M, and Repairs Accounts

Account	CRRWC Proposed	CRRWC Test Year	Staff Proposed
Office Supply	$6,188	$5,601	$19,824
O&M	$30,000	$3,877	$14,023
Repairs	$7,000	$6,717	$19,197
TOTALS	**$43,188**	**$16,195**	**$53,044**

6. Legal Expense: CRRWC requested $40,000 in annual legal expense with a test year expense of $155,961. During 2011, the majority of legal expense was related to litigation brought about by the old Board and old management. Pursuant to the Joint Financial Statement filed by CRRWC and Staff, CRRWC was permitted to keep rates higher than it would normally be allowed in order to give the Company excess revenue to pay off litigation fees. The Joint Financial Statement approved by the Commission in Order No.11-181, states, "Part 3 of the plan provides that 'Crooked River' will continue to charge its current rates as establish by the Company until filing a general rate case application."

   Staff found $18,900 in CRRWC's 2011 legal fees that did not appear to be associated with the previous litigation. Staff amortized these legal fees over three years and added $2,000 for ongoing legal fees. Staff recommended a total annual legal expense of $6,725.

7. Contract Services-Labor: CRRWC requested an annual expense of $18,759 with a test year annual expense for the same amount. CRRWC provided documentation verifying $55,585 in expense. However, Staff disallowed most

of the line items since they had already been recorded in other accounts. The remaining items Staff capitalized or relocated them to either O&M or Repairs. Staff's adjustments resulted in a zero annual expense to this account.

8. Contract-Labor Other: CRRWC requested $500 in annual expense with a test year expense of $34,742. At CRRWC's request, Staff made a negative adjustment of ($34,742) bringing the account to zero. Staff did not object to the Company's request. Staff recommended a zero annual expense to this account.
9. Contract Services-Professional: CRRWC requested a total annual expense of $6,500, with a test year expense of $15,396. Staff adjustments included three-year amortizations of expenses associated with Global Spatial Intelligence, an electronics contract that was later terminated. In addition, Staff capitalized one line item and moved another line item to Office Supplies. Staff recommended an annual contract services-other expense of $3,094.
10. Double Check Valve Assembly (DCVA) Installation Program: CRRWC requested a $70,000 annual expense with a $0.0 test year expense for a 10-year cross connection control device installation plan. Staff disallowed the total $70,000 annual expense for the program for reasons described below. Staff recommended a zero annual expense to this account.

Q. PLEASE EXPLAIN WHAT A DCVA IS AND WHY IT IS NECESSARY.

A. DCVA stands for Double Check Valve Assembly, which is a type of back-flow prevention device. The DCVA protects a water system's supply from cross

connection contamination resulting from back pressure or back siphonage through the customers' water facilities.

The Oregon Health Authority, Drinking Water Section (DWS) requires water systems to implement a Cross Control Prevention Program. DWS rules require the water utility to identify customers with potential cross connection hazards and require a protection device be installed. The standard of what presents a potential hazard is determined by each water system. The water system must notify each customer with a potential cross connection hazard that a protection device must be installed, maintained, repaired or replaced when necessary, and the customer is responsible for all required testing. This does not preclude the water system from offering these services.

Q. PLEASE DESCRIBE CRRWC'S CROSS CONNECTION PROTECTION POLICY.

A. CRRWC has determined that all connections represent a potential health hazard to the water supply and requires all customers to have a DCVA installed on their service lines. It is unreasonable for CRRWC to require all customers to install DCVAs at the same time; therefore, CRRWC proposes to systematically notify the customer of the DCVA requirement over a 10-year period. CRRWC currently has 400 customers who have already installed and paid for their DCVAs.

Q. PLEASE DESCRIBE CRRWC'S PROPOSED DCVA INSTALLATION PROGRAM.

A. CRRWC proposed a $70,000 annual expense to provide for the systematic installation of DCVAs on 120 customer lines per year for 10 years. The capital

project is intended to complete all remaining DCVA installations at a total cost of $700,000. The project would be funded through rates and CRRWC would own all DCVAs it installs.

Q. WHAT IS STAFF'S RECOMMENDATION SINCE STAFF'S ADJUSTMENT TO CRRWC'S DCVA INSTALLATION PROGRAM DISALLOWED THE ENTIRE EXPENSE?

A. Staff believes that CRRWC can achieve the same result it is seeking in its proposed DCVA Installation Program through a separate tariff. Rather than expensing the capital project and including the cost in rates, which would be charged to all customers over the next 10 years, Staff's proposal would have the customers pay directly for their DCVAs purchase and installation.

DWS rules require that a customer is free to employ whomever they choose to install the protection device. Therefore, if CRRWC is going to provide installation service, it must offer the customers a choice whether to use its service or not.

Q. PLEASE EXPLAIN STAFF'S DECISION TO REJECT CRRWC'S DCVA INSTALLATION PLAN AND REPLACE IT WITH A TARIFF WHERE CUSTOMERS PAY UP FRONT FOR THE DCVA INSTALLATION.

A. If a rate-regulated investor-owned water utility were to install DCVAs for all customers, the cost would be recorded above-the-line in the water utility's plant. When the water utility files a rate case, the new plant would be included in rate base and the water utility is given an opportunity to earn a return of and on its investment.

Under CRRWC's proposed plan, CRRWC would realize no benefit from investing funds to pay for the DCVAs and associated costs due to its nonprofit status. CRRWC would not have the opportunity to earn a return on the investment; therefore, it is more reasonable for CRRWC to require its customers to pay up front.

CRRWC proposed putting the cost of the DCVA Installation Program into expenses; thus, all customers would pay the program's cost through rates. This would be unfair to the 400 customers that already installed their DCVAs and to the customers who choose to purchase and install a DCVA themselves. Staff believes a DCVA Installation Program tariff where the customer is charged for the cost to purchase and install the DCVA is better suited to CRRWC's nonprofit status.

Q. HOW WOULD STAFF'S PROPOSED DCVA TARIFF WORK?

A. Staff's proposed tariff would have CRRWC offer the DCVA Installation Program to customers through an Opt-Out tariff. CRRWC would systematically notify customers of the DCVA requirement. The customer can then choose to use CRRWC's DCVA Installation Program or not. The customer is under no obligation to use CRRWC's service. If the customer does not want CRRWC to purchase and install the DCVA, the customer must sign the opt-out form and return it to CRRWC within 30 days of receipt of the notice.

Otherwise, CRRWC will install a DCVA in the customer's meter box and bill the customer at CRRWC's cost. The labor will be done by CRRWC employees that have been trained and certified to install and test DCVAs. CRRWC has

confirmed to Staff that it has the work force to accommodate the installations within employee wages; therefore, the labor is not billed to the customer.

When CRRWC installs a customer's DCVA, the customer is agreeing to donate the DCVA to CRRWC as CIAC. The DCVA becomes the property of CRRWC. As such, CRRWC will be responsible for the DCVA maintenance, repair or replacement, and will conduct all required testing.

Q. WHAT HAPPENS TO THE CUSTOMER WHO CHOOSES TO OPT OUT OF STAFF'S PROPOSED DCVA INSTALLATION PROGRAM TARIFF?

A. If a customer signs the DCVA Installation Program opt-out form and returns it to CRRWC as required, the customer must install a DCVA within 60 days of receiving CRRWC's DCVA requirement notice. The customer can contract with whoever is qualified to install the DCVA. By so doing, ownership of the DCVA remains with the customer; thus, the customer is responsible for the maintenance, repair, replacement, and testing as required by law. The customer is required to annually submit its DCVA information and testing results to CRRWC.

Q. DOES STAFF HAVE ANYTHING ELSE TO ADD CONCERNING DCVAS?

A. Yes, CRRWC proposed an opt-out tariff for DCVA Maintenance, Repair, and Testing Services (Services) for all customers. However, because CRRWC will own (through customer donation) the DCVAs CRRWC installs, Staff believes it is CRRWC's responsibility to then maintain, repair, replace, and test the DCVAs. Therefore, Staff recommends that CRRWC's DCVA Maintenance, Repair, and

Testing Services be offered only to those customers who opt out of the DCVA Installation Program or own their own DCVAs.

Under the DCVA Maintenance, Repair, and Testing Services agreement, a customer who owns a DCVA would automatically be enrolled in this service unless the customer signs the opt-out form and returns it to CRRWC as required. If CRRWC does not receive an opt out form, CRRWC will provide the annual maintenance, repair, and testing services for the customer (but not the replacement), for a direct charge of either $2.76 per month or an annual charge of $33.12, separately identified on the customer's bill. The customer may choose the method of payment.

CRRWC's proposed DCVA Maintenance, Repair, and Testing Services is modeled after Avion Water Company's (Avion) Cross Connection Control Program Tariff previously approved by the Commission. Avion offers its customers backflow prevention device testing, maintenance, and repair services on an opt out basis. The customer is under no obligation to use Avion's services and is free have another service provider perform the service.

Staff recommends the Commission approve CRRWC's DCVA Maintenance, Repair, and Testing Services tariff with Staff's modifications.

Q. GIVEN STAFF'S RECOMMENDATION THAT CUSTOMERS PAY FOR THEIR DCVAS, WHAT IS STAFF'S RECOMMENDATION CONCERNING WHO PAYS FOR WATER METERS?

A. Staff recommends that the cost of the water meter be included in CRRWC's service connection charge paid by the customer. A water meter is required on

every customer connection to measure the customer's usage and determine the monthly bill. Replacement and repair of the meter is the responsibility of the Company.

Q. WATER METERS ARE NORMALLY PAID FOR BY THE UTILITY. WHY IS STAFF RECOMMENDING THAT CRRWC'S CUSTOMERS PAY FOR THE WATER METERS?

A. Typically, a utility pays for customer water meters because the cost is included in rate base, giving the utility an opportunity to earn a return of and on its investment. As previously discussed, CRRWC is a nonprofit association and is not allowed to earn a return on its investment. In recommending that the customer pay for meters, Staff applied the same reasoning as described above regarding DCVAs.

In addition, prior to being regulated, CRRWC's customer water meters were paid for by the customers and accounted for in CIAC. It is equitable and consistent to have CRRWC's customers continue to pay for their water meters and the Company to record the cost in CIAC.

In a similar situation, Old Sheep Ranch Water Association (UW 129) had charged its customers for the cost of water meters prior to regulation. The Commission allowed the inclusion of the meter cost in the service connection charge due to the nonprofit status of the association and to continue the equitable practice for future customers.

Q. DOES THE STIPULATION INCLUDE THE COMPANY'S REQUEST FOR AN AUTOMATIC POWER COST ADJUSTMENT CLAUSE?

A. No. CRRWC is not contesting Staff's analysis that concluded a power cost adjustment clause was not necessary because:

1. CRRWC's purchased power was less than 12.05 percent of its total operating cost in 2011;
2. Automatic adjustment clauses are generally used for things that are consistent and regular, which Pacific Power rate cases are not;
3. A potential rate increase could be offset by lower usage (wet year). If Pacific Power receives a rate increase, it is likely to only have a minimal effect on CRRWC's revenue requirement;
4. Avion has a Commission approved automatic power cost adjustment clause; however, it was approved years ago during the energy crises that caused the rolling blackouts in California and circumstances in the present are not similar. Avion has never had to charge customers a non-zero tariff rate; and
5. Staff accounted for power cost increases by escalating the annual power expense by 2.28 percent.

Q. DID STAFF MAKE ANY ADJUSTMENTS TO CRRWC'S UTILITY PLANT?

A. Staff thoroughly investigated CRRWC's utility plant records, bringing the Company's plant and depreciation up to date. Staff also moved appropriate capital expenditures from expenses to utility plant and removed CIAC, including CIAC determined in UW 120.

ISSUE 5, RATE SPREAD AND RATE DESIGN

Q. PLEASE DESCRIBE STAFF'S RECOMMENDED REVENUE SPLIT BETWEEN THE BASE RATE AND THE COMMODITY RATE.

A. Staff generally allocates the revenue requirement at 60 percent to the base rate and 40 percent to the commodity rate in typical water rate cases. In CRRWC's case, Staff recommended a 63.09 percent allocation of revenue to the base rate and a 36.91 percent allocation to the commodity rates. This rate design reflects the high seasonality of customer usage, which occurs much more heavily in the summer months than in the winter. The rate design allows CRRWC to recover sufficient revenues in the winter months to pay their expenses. The rate design also encourages conservation by removing the allotment of 300 cf from the base rate.

Q. PLEASE DESCRIBE STAFF'S RECOMMENDED RATE DESIGN.

A. Staff recommends a simple rate design composed of three customer classes: 1) Metered Customers, 2) Temporary Event, and 3) Water Haulers.

1. **METERED CUSTOMERS**

Staff proposed a Metered Customer class that includes all residential, commercial, multi-family units, HOA irrigation, and nonprofit-multi-metered customers. This classification does not include water haulers and temporary community events.

The HOA irrigation should be included in the Metered Customer classification because although the HOA has water rights to the water in CRRWC's well; it should participate in the cost of the transmission of the

water from the well to the HOA. It does not cost less for CRRWC to provide the irrigation water to the HOA than it does the other Metered Customers.

2. **TEMPORARY/EVENT**

Staff proposed a temporary community event tariff be offered that does not include a base rate.

3. **WATER HAULERS**

Staff proposed a water haulers tariff be offered that does not include a base rate.

Q. PLEASE DESCRIBE STAFF'S CONCLUSION REGARDING THE SPECIAL RATE PROPOSED BY CRRWC FOR THE NONPROFIT MULTI-METERED CUSTOMER.

A. Staff recommends that the HOA be included in the Metered Customer classification. As such, the base rate would apply to the HOA's additional meters. The nonprofit status of the HOA has no affect on the cost of delivering water to the HOA's meters. There is no difference in the cost of delivery of water to the HOA than to the other Metered Customers.

In addition, in UW 136 and UW 151, the Commission approved water base rates to Charbonneau Water Company's nonprofit homeowner associations (customers) on all installed meters. *See* Commission Orders No. 10-061 and Order No. 12-340, respectively.

Q. PLEASE DESCRIBE HOW STAFF DETERMINED THE APPROPRIATE RATE DESIGN.

A. Staff's recommended rate design was crafted keeping the following principles in mind:

1. Reducing the base rate and increasing the variable rate encourages conservation;

2. Introducing a two-tiered increasing block rate also encourages conservation;

3. Having a high ratio of base rate to variable rate reflects the high degree of seasonal usage and allows CRRWC to pay its expenses during the low usage winter months;

4. Having a high tier threshold of 6,000 cf causes a lesser impact on high usage customers than a lower threshold would cause; and

5. Having a relatively small cost difference between the two tiers results in a lesser impact to high usage customers, yet still sends a price signal.

Q. PLEASE DESCRIBE HOW STAFF DETERMINED THE APPROPRIATE BASE RATES.

A. The principle consideration in determining the appropriate base rate was ensuring that CRRWC would generate enough revenues during the low usage winter months to cover its expenses.

CRRWC felt strongly that each customer should pay the base rate regardless of the meter size. CRRWC informed Staff that the differential in meter sizes ranged from 3/4 by 5/8 inch to approximately 2 inches. According to CRRWC, not all meters were sized appropriately for each service. If various base rates were to be imposed based on meter size, it is highly probable that customers with larger meters would request CRRWC install a smaller meter

based on the justification that the meter was not originally properly sized. The cost of replacement would fall on CRRWC.

Generally, Staff uses the American Water Works Associations (AWWA) standard capacity factors[8] to help determine base rates. In lieu of using the AWWA capacity factors, Staff recommends a single base rate for all meter sizes and a two-tiered, increasing block commodity rate.

Q. PLEASE DESCRIBE HOW STAFF DETERMINED THE COMMODITY RATE.

A. The primary goal of Staff in proposing a two-tiered, increasing block commodity rate is to implement a rate design that encourages conservation. Staff designed the rates so the typical water user would not be significantly affected by the second tier, but high-end users would pay a higher rate for using a greater proportion of water. Using a high initial threshold and a small cost differential between the tiers would allow customers to become accustomed to a two-tier billing system without a significant rate impact on the customers' monthly water bills.

Staff proposed a 6,000 cf threshold based on customer usage trends over the past three years. Although this threshold may appear high compared to thresholds set in other water cases, it takes into account that there are currently no constraints on the water supply. Staff used consumption data from 2011, as

[8] The AWWA capacity factors are based on the percentage relationship of the maximum rate of use to the average rate of use. The capacity factors recognize the particular service requirements for total volume of water and peak rates of use. This is especially important when the capacity of the water supply is limited. However, CRRWC verified that there are no current constraints upon its water system.

adjusted to remove obvious outlier data that indicated a billing or meter reading error, to calculate tier one and tier two rates to ensure the revenue generated would meet the revenue requirement.

Staff proposed a first tier commodity rate of $0.90 per 100 cf up to 6,000 cf per month. The second tier commodity rate proposed by Staff is $1.00 per 100 cf charged for usage above 6,000 cf per month.

ISSUE 6, THE STIPULATION

Q. PLEASE EXPLAIN THE STIPULATED REVENUE REQUIREMENT.

A. The Parties agreed to and support the following:

1. The Parties agreed that it is reasonable that CRRWC share the income generated by the cell towers with the HOA. The cell towers are located on CRRWC's reservoir, but the reservoir is located on HOA property. The HOA does not charge CRRWC a rental fee for use of the land. The Parties agreed to and support that the cell tower income be allocated at 50 percent to the HOA and 50 percent to CRRWC.
2. The Parties agreed to and support an annual legal expense of $12,000. (The $18,900 in 2011 legal expenses Staff recommended be amortized over three years is not included as a component of the $12,000 annual legal expense.)
3. The Parties agreed to and support an annual transportation expense of $8,713.
4. The Parties agreed to and support an annual Repairs expense of $22,000.

5. The Parties agreed to and support an annual Contingency Fund expense of $20,000. CRRWC provided documentation that its 20-year master plan estimates total build out of 2000 customers with additional infrastructure to cost approximately $3.5 million. This will also help CRRWC to achieve and maintain an optimal reserve.

Q. WHAT WAS THE EFFECT OF THE STIPULATED CHANGES TO THE REVENUE REQUIREMENT?

A. The stipulated changes increased the Company's proposed annual revenue requirement, resulting in a one percent increase to CRRWC's adjusted test year revenues. The stipulated revenue requirement also increased CRRWC's rate base from $538,785 to $541,052. The rate of return on rate base remained at zero percent.

Q. DID CRRWC AND THE INTERVENORS AGREE TO STAFF PROPOSED RATE SPREAD AND RATE DESIGN?

A. Yes. Although the stipulated changes to the revenue requirement changed the actual rates, Staff's recommended rate spread and rate design are agreed to and supported by the Parties with the following change. The Parties stipulated to a revenue requirement allocation of 72.50 percent to the base rate and 27.50 percent revenue allocated to the commodity rate. Staff/101Willis/10, 11, and 12 show the stipulated rates, rate design, and rate impact on customers. The stipulated rates are summarized in the table below:

Table 6 –Stipulated Rates

	Customer Class	Base Rate (per meter)	Commodity Rate up to 6,000 cf (per 100 cf)	Commodity Rate over 6,000 cf (per 100 cf)
1	Residential/Commercial	$23.00	$0.83	$0.93
2	HOA Irrigation	$23.00	$0.83	$0.93
3	Nonprofit Multi-Metered	$23.00	$0.83	$0.93
4	Multi-Family Dwelling Unit	$23.00	$0.83	$0.93
5	Temporary Community Event	none	$0.93	$0.93
6	Water Haulers	none	$0.93	$0.93

The stipulated monthly rates for metered customers are a base rate of $23 with a two-tiered, increasing block commodity rate. The first tier commodity rate is $0.83 per 100 cf up to 6,000 cf per month. The second tier commodity rate is $0.93 per 100 cf charged for usage above 6,000 cf.

Q. DOES THE MONTHLY BASE RATE OF $23.00 ENSURE THAT THE REVENUE GENERATED WILL MEET THE LOW USAGE WINTER MONTHS' EXPENSES?

A. Yes. The Parties reviewed CRRWC's revenue requirement expenses to estimate the minimum amount of revenue necessary to meet CRRWC's monthly expenses and agreed on approximately $39,000. The Parties agreed that a base rate of $23.00 per customer per month satisfied CRRWC's low usage winter months' expense needs.

Q. PLEASE EXPLAIN THE IMPACT OF STAFF'S RATE DESIGN UPON CUSTOMERS.

A. The impact of Staff's recommended rates is shown in Staff/101, Willis/11 and 12. As indicated in the exhibit, the monthly bill will actually decrease a small percentage compared to previous rates if the customer uses less than 300 cf

of water in a given month. Customers who use more than 300 cf will have their monthly bill increase by a greater percentage the more water they use. A customer using 5,000 cf will pay a three percent higher bill under the stipulated rates, and a customer using 10,000 cf will pay a seven percent increase.

Q. DID ALL THE PARTIES AGREE TO AND SUPPORT THE RATES RESULTING FROM THE STIPULATION?

A. Yes.

Q. DID THE PARTIES AGREE TO AND SUPPORT AN EFFECTIVE DATE FOR THE NEW RATES?

A. Yes. The Parties agree to and support the rates being effective for service rendered on and after December 21, 2012.

Q. DID ALL THE PARTIES AGREE TO AND SUPPORT THE STIPULATION IN RESOLUTION OF ALL ISSUES IN THE CASE?

A. Yes.

Q. DID THE PARTIES STIPULATE TO ANY CONDITIONS?

A. Yes. The Parties agreed to and support the following conditions:

1. CRRWC will file a rate case with the Commission on or before January 5, 2016.
2. Within 30 days of the date of the order approving the Stipulation, CRRWC is required to transfer its Assessment Fund balance into the Contingency Fund, creating one reserve account to be dedicated to repairs, improvements, and emergencies with the following exception: $43,240 may be used as working

cash. Working cash may be used to buffer the time difference between the receiving of revenues and the payment of expenses.

3. CRRWC will provide to the Commission on an annual basis a report listing all Contingency Fund yearly expenditures in line items format showing the date, the supplier, the amount, and a description of the item or project. In addition, CRRWC will annually provide to the Commission a report indicating the working cash component used by CRRWC for each month of the preceding year, broken out separately from the Contingency Fund expenditure listing referred to above. Both reports are to be attached to and filed with CRRWC's annual report.

Q. ARE THE RESULTING RATES FAIR AND REASONABLE?

A. Yes.

Q. WHAT IS STAFF'S RECOMMENDATION?

A. Staff recommends the Commission receive the Stipulation into the UW 149 record and adopt the Stipulation in its entirety. Staff also recommends the Commission order CRRWC to comply with the Stipulation's recommended conditions.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes.
