RE: 73(2) PGE's 2013 Electricity Product Claim Reconciliation Report

Attached is PGE's annual Product Claim Reconciliation Report for calendar year 2013. It summarizes PGE's purchases and sales of renewable energy certificates on behalf of customers that subscribed to PGE's optional renewable portfolio programs in 2013. This filing complies with the annual reporting requirement in OAR 860-038-0300(10).

The sourcing and documentation for the Tradable Renewable Credits is again based on the column in the attachment that contains the Western Renewable Energy Generation Information System (WREGIS) Serial Number for the Credits. This eliminates the need to supply copies of green tag certificates and attestations for purchases and generation, as it is now possible to track the purchase or generation using the WREGIS reporting system.

We also note that the resource mix percentages for the Green Source renewable rate product are different than the target percentages. The target percentages are based on purchases made in 2012. The percentages calculated by the Reconciliation Report are based on purchases that occurred in 2013. PGE has updated our Web site and will update our labeling bill inserts in the next mailing to reflect the actual resource mix percentages listed in this report for the 2013 Green Source resource mix percentages.

If you have any questions about this filing, please contact Bruce Werner, (503) 464-7481.

All resources purchased for the retail programs are considered "new renewable energy resources" per ORS 757.600, placed in operation after July 23, 1999. Clean Wind customers do not receive solar RECs as a function of their monthly payments; these are RECs from projects partially funded by the Clean Wind Development fund and therefore RECs are retired on behalf of PGE's Clean Wind customers.
