RE: RE 79 PGE Unused Energy Report for Net Metering Facilities and Solar Payment Option (SPO) Net Metering Customers in 2022

Portland General Electric Company (PGE) hereby submits, pursuant to Oregon Administrative Rule (OAR) 860-039-0060(3), this summary report detailing the total number of unused kilowatt-hour (kWh) credits accumulated by net metering customers (PGE Schedule 203) at the close of the annual billing cycle. In addition, the report confirms the dollar value associated to these kWh credits at the applicable average annual avoided cost tariff rate (PGE Schedule 201) that is being transferred to low income energy assistance.

Although not required in the rule, and consistent with OAR 860-084-0360(1), the solar payment option (SPO) customers participating in the Solar Payment Net Metering Option program (PGE Schedule 215 and 216) also agree to have their excess generation donated to low income energy assistance. That is also included in this report.

At the end of the billing year that concluded March 31, 2023, the unused net metering kWh credits totaled 3,150,863 kWh with a dollar value of \$209,847.89, which was calculated at the average annual avoided cost rate of 6.660 cents/kWh. PGE identified 27 accounts that had a rebilling that occurred which resulted in a change in the excess generation from the 2021-2022 time period and included the difference for payout with this year of unused net metering kWh credits of 272,437 with a dollar value of 3.419 cents/kWh for a total \$9,314.62.

At the end of the billing year that concluded March 31, 2023, the unused SPO kWh credits totaled 195,138 kWh with a dollar value of \$12,996.20, which was calculated using the average annual avoided cost rate of 6.660 cents/kWh.

PGE proposes to transfer the amount of \$232,158.71¹ to Oregon Energy Services, the organization that provides energy assistance to low income customers, within 45 days of this letter.
