RE: 2018 Unused Energy Report for Net Metering Facilities and Solar Payment Option (SPO) Net Metering Customers in 2017

As required by OAR 860-039-0060(3), adopted in Public Utility Commission of Oregon (OPUC) Order No. 07-319, Portland General Electric, Company (PGE) hereby submits this summary report detailing the total number of unused kilowatt-hour (kWh) credits accumulated by net metering customers (i.e., PGE Schedule 203) at the close of the annual billing cycle. In addition, the report confirms the dollar value associated to these kWh credits at the applicable average annual avoided cost tariff rate (i.e., PGE Schedule 201) that is being transferred to low income energy assistance.

Although not required in the rule, and consistent with OAR 860-084-0360(1), the solar payment option (SPO) customers participating in the Solar Payment Net Metering Option program (i.e., PGE Schedule 215 and 216) also agree to have their excess generation donated to low income energy assistance. That is also included in this report.

At the end of the billing year that concluded March 31, 2018, the unused net metering kWh credits totaled 2,136,690 kWh with a dollar value of \$52,764, which was calculated at the average annual avoided cost rate.¹

At the end of the billing year that concluded in March 31, 2018, the unused SPO kWh credits totaled 275,614 kWh with a dollar value of \$6,765, which was calculated using the average annual avoided cost rate of 2.456 cents/kWh.

Absent hearing from the Commission to the contrary, and consistent with prior practice, PGE proposes to transfer the amount of \$59,529 to Oregon Energy Services (formerly known as Oregon Heat, HEAT Oregon, or Oregon Energy Fund), the organization that provides energy assistance to low income customers, within 60 days of this letter.

¹ Due to a rate change during the billing period, there were two average annual avoided cost rates used: Unused Net Metering kWh for 2017-2018 is 60,465 X \$0.02530 = \$1,529.71; and Unused Net Metering kWh for 2017-2018 is 2,076,225 X \$0.02468 = \$51,234.50.
