

September 3, 2013

Oregon Public Utilities Commission
3930 Fairview Industrial Drive SE
Salem, OR 97302

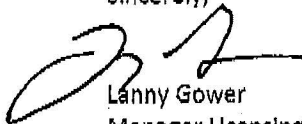

To whom it may concern:

Con-way Freight is a national Trucking operation with our administrative offices in Portland employing over 1,000 workers and operating over 500 tractors in the state of Oregon.

Con-way Freight supports various solutions to reduce greenhouse gas emissions by the Freight Transportation Industry. Natural gas is one of the alternatives that our company has been testing to fuel our fleet of vehicles. One of the biggest current barriers to the use of natural gas in our fleet is the extremely limited number of fueling stations for these vehicles. Until this problem has been addressed, we are unable to convert any portion of our fleet over to natural gas.

Con-way Freight strongly supports Advice No. 13-10 as a positive step toward providing fueling stations that would better allow the Oregon Trucking Industry to utilize clean burning natural gas vehicles in our fleet. We respectfully ask that the Commission approve Advice No. 13-10.

Sincerely,

Lanny Gower
