

## Compare your options

### Basic Service

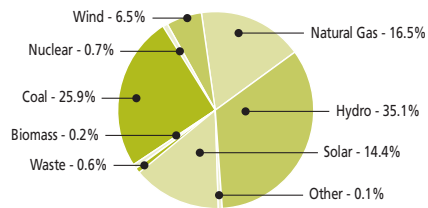

### Green Source

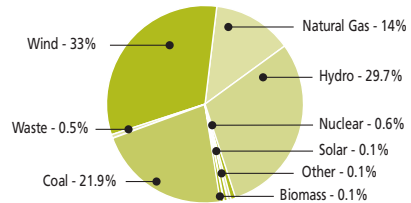

### Green Future Solar

Chart represents PGE's Basic Service mix plus one block of Green Future Solar.

### Clean Wind

Chart represents PGE's Basic Service mix plus one block of Clean Wind.

2012 data for Basic Service, the latest available. All charts use the average PGE renewable customer's monthly energy use of 726 kWh. All percentages are approximate and may not add up to 100% due to rounding. "New" refers to power generated from facilities that began commercial operation within the last 15 years. Your purchase of renewable energy certificates (RECs) is supporting electricity production in the Northwest. For every unit of renewable electricity generated, an equivalent amount of RECs is produced. The purchase of RECs helps offset conventional electricity generation in the region where the renewable electricity generator is located. The purchase also helps build a market for renewable electricity and may have other local and global environmental benefits such as reducing global climate change and regional air pollution. For more information about RECs, please visit [www.green-e.org](http://www.green-e.org).

## Where does PGE get the renewable power?

Renewable energy credits for Green Source come from a mix of new wind, new geothermal and new solar power from Oregon, Washington, Idaho or Wyoming. Green Future Solar RECs come from a new solar energy project in Oregon and Clean Wind RECs come from new wind energy generated in Oregon or Washington.

Specific locations can be found at [PortlandGeneral.com/Renewable](http://PortlandGeneral.com/Renewable).

Sign up today and we'll mail you this sticker to proudly place on your home or car window.

## Go green, save green

As a PGE renewable power customer, you'll have access to exclusive coupons from local businesses who are also part of our growing green community.

## The symbol of excellence

Green Source, Green Future Solar and Clean Wind are Green-e Energy certified. The Green-e Energy logo helps consumers easily identify environmentally superior renewable energy options. For more information on Green-e Energy certification requirements, visit [www.green-e.org](http://www.green-e.org).

## Frequently asked questions about renewable power.

**Q: Why are there special programs for renewable energy? Why isn't it just provided to everyone?**

**A:** While the price gap between renewable energy and conventional generation is narrowing, some renewables are still more expensive than Basic Service power. PGE is supporting more renewable projects all the time, and customer participation supports bringing additional renewables on-line. Oregon Senate Bill 1149, passed in 1999, requires us to offer renewable options.

**Q: Is there a governing body that oversees PGE's renewable power transactions?**

**A:** In addition to these options being Green-e® Energy certified, PGE submits annual reports on program administration and marketing with the Oregon Public Utility Commission, which are on file with the OPUC. PGE does not profit from the sale of these renewable energy options.

**Q: Who is Green Mountain Energy Company?**

**A:** Green Mountain Energy Company ([www.greenmountain.com](http://www.greenmountain.com)) was selected in a competitive process to help PGE offer renewable products through 2016.

Chart represents PGE's Basic Service mix plus one block of Green Future Solar.

**Clean Wind**

Chart represents PGE's Basic Service mix plus one block of Clean Wind.

2015 estimated data for Green Source and Green Future Solar, 2013 data for Basic Service and Clean Wind, the latest available. All percentages are approximate and may not add up to 100% due to rounding. "New" refers to power generated from facilities that began commercial operation within the last 15 years. Your purchase of renewable energy certificates (RECs) is supporting electricity production in the Northwest. For every unit of renewable electricity generated, an equivalent amount of RECs is produced. The purchase of RECs helps offset conventional electricity generation in the region where the renewable electricity generator is located. The purchase also helps build a market for renewable electricity and may have other local and global environmental benefits such as reducing global climate change and regional air pollution. For more information about RECs, please visit [www.green-e.org](http://www.green-e.org).

**Where does PGE get the renewable power?**

Renewable energy credits for Green Source come from a mix of new wind, new geothermal and new solar power from Oregon, Washington, Idaho or Wyoming. Green Future Solar RECs come from a new solar energy project in Oregon and Clean Wind RECs come from new wind energy generated in Oregon or Washington. Specific locations can be found at [PortlandGeneral.com/Renewable](http://PortlandGeneral.com/Renewable).

**Reduce your environmental impact**

The average renewable power customer using 1,395 kWh monthly can avoid more than 22,000 lbs of CO<sub>2</sub> per year, which is the same as not driving more than 25,000 miles or like planting more than 2 trees annually.

**Go green, save green**

As a PGE renewable power customer, you'll have access to — and the opportunity to offer — mobile coupons from local businesses like yours.

# Announcing Green Future<sup>SM</sup> Solar

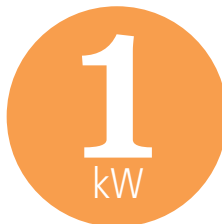

A new limited-time renewable power option from PGE

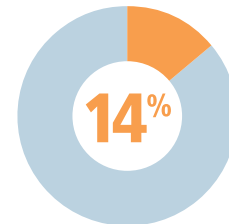

Despite its rainy reputation, Oregon ranks average in the nation\* for the amount of solar energy it receives. If you rent your home or apartment, have been told your location doesn't qualify for solar, or can't afford the upfront expense of installation, you can still get solar power.

=

or

## When you purchase a "block" of Green Future Solar,

each block equals 1 kW of solar energy, about the same as 4 average panels on an Oregon-based array, or about 14 percent of your monthly energy use.\*

You can track the actual energy generated by Green Future Solar online. The energy generated will vary during the year based on weather, but the average output per block is an estimated 1,250 kWh per year and has the same environmental benefit as not driving more than 1,869 miles. We'll send you an annual report that shows how much of your energy was offset with solar power and how it reduced your carbon footprint.

This is a limited offer, with only 2,935 blocks available to purchase from this local Oregon solar project. Sign up today—now you can support solar no matter where you live!

Find out more at [PortlandGeneral.com/Renewable](http://PortlandGeneral.com/Renewable) or call 503-228-6322 or 800-542-8818 outside the Portland area.

\*Average compared to the lower 48 U.S. states. Claims based on the average PGE renewable energy customer using 726 kWh per month. You will not have renewable energy delivered directly to your home, but the amount of Green Future Solar you purchase will be put back into the regional electricity grid.

Choose **Green Future<sup>SM</sup> Solar**—it's the easiest way to enjoy solar power in our community.

**Green Future Solar is generated from a local solar project in Willamina, Oregon. Your support of renewable energy makes projects like this possible.**

## Quick Facts

**Q: If I choose this option, can I opt out?**

Yes, there is no contract length and you can opt out any time by contacting PGE.

**Q: How much does it cost?**

Each block of Green Future Solar costs just \$5 extra per month.

**Q: Will I lower my energy bill with this option?**

No, your energy bill will not decrease by purchasing Green Future Solar.

**Q: Will this change how my power is delivered or measured?**

No, you will still receive the same safe, reliable energy from PGE.

**Q: Why are there only 2,935 blocks available? What happens when it sells out?**

The solar project in Willamina, Oregon has a capacity of 2,935 kW of solar energy. When the capacity sells out, it will be closed to new enrollments.

**Q: How long will this option be available?**

If you sign up for Green Future Solar, you will remain on this option until Dec. 31, 2022, unless you choose to cancel. At that time the option will end and you may choose another one of PGE's renewable power options.

Green Future Solar is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org).

# The power to make a difference.

Do you want your company to help build a sustainable energy future in Oregon? Buying cleaner, renewable energy is one of the most important steps you can take. More than 120,000 customers have made the move to PGE's renewable power program, making it No. 1 in the nation.\* Show your customers and employees that your business is doing its part for the environment by joining this growing community and showing your support for cleaner energy in Oregon.

## Why buy renewable power for your business?

**Environmental benefits** — Purchasing renewable energy minimizes the impact your company has on the environment. You'll help encourage the development of new, local renewable energy sources.

**Promotional benefits** — Publicize your support and civic leadership to your community. Your demonstrated commitment can attract and retain customers, employees, vendors and other partners. When given the choice, customers prefer to patronize like-minded businesses.

**Tools** — Upon enrollment you will receive a number of tools to promote your commitment, including:

- Renewable energy decals for your windows and doors
- Access to an online tool kit that contains photos, messages and web graphics you can use to create additional promotional materials.

\*Latest NREL ranking

## What other businesses are saying

*"We are proud to be part of the PGE Renewable Community and have enjoyed payback in concrete and intangible ways. Our customers appreciate our efforts."*

Jeana Edelman  
Co-Owner, Hot Lips Pizza

*"We recognize the need to preserve and enhance our environment and we have a genuine commitment to make a difference. We grew up here, went to school here, and work here. So it's important to us that we help take care of this place. It's as simple as that."*

Ed Tonkin  
Ron Tonkin Family of Dealerships

*"For us, sustainable practices do not stop in the vineyards. By attaining renewable power from PGE, we are able to contribute to the preservation of our community for future generations."*

Barbara Gross  
Cooper Mountain Winery

**Don't forget to proudly display your window decal. Ask us if you'd like more!**

# Easy renewable choices

All options are available to residential and small business (Schedule 32) customers and are as reliable as your current service.\*

Green Source<sup>SM</sup> is based on matching 100 percent of your actual energy use with renewable power; with Clean Wind<sup>SM</sup> you purchase small blocks of renewable energy for a set fee. Green Future<sup>SM</sup> Solar is a new option in our community that lets you buy solar power no matter where you live.

Choose an Option	How it Works	Renewable Price	Additional Monthly Cost Based on Your Energy Use		
			1500 kWh	3000 kWh	4500 kWh
<b>Green Source</b>  All of the energy you pay for is from 100% new renewable sources.	100% of your monthly usage is matched with a mix of new wind, new geothermal and new solar power.	Your regular PGE energy rate plus an additional \$0.008 per kWh.  About \$11 more for a typical PGE customer**	\$12	\$24	\$36
<b>Green Future Solar</b> <i>New limited offer!</i>  Solar energy from a new facility near Willamina, Oregon. One block purchased is equivalent to the output of four solar panels from a large Oregon-based array.	New solar power available in 1 kW blocks (each block represents about 7.5% of your monthly usage**)  <b>Only 2,935 blocks available.</b>	Your regular PGE energy rate plus an additional \$5 per 1 kW block – you can purchase as many blocks as you wish until this option is sold out.  Customers can be enrolled in this option through Dec. 31, 2022.	\$5 per 1 kW block		
<b>Clean Wind</b>  \$1.50 of your payment goes toward developing new renewable resources in Oregon and \$1 goes to purchase new wind power from the Northwest.	New wind power available in 200 kWh blocks (each block represents about 14% of your monthly usage**)	Your regular PGE energy rate plus an additional \$2.50 per 200 kWh block – you can purchase as many blocks as you wish.	\$2.50 per 200 kWh block		

\*You will not have electricity from a specific generation facility delivered directly to your business, but the amount of electricity you consume will be replaced in the Western power grid by new renewable energy.

\*\*More per month than PGE's Basic Service rate as of January, 2015. Please check our website for the latest pricing information. Figures are based on a typical PGE schedule 32 small business customer's monthly electricity usage of 1,395 kWh; Green Future Solar and Clean Wind percentage assumes one block purchased. Your percentage or monthly cost may vary.

Costs shown are for the extra renewable energy portion of a bill added to your existing Basic Service or Time of Use rate. It does not include the energy rate charge (Basic Service or Time of Use) and other charges or fees assessed to every PGE customer.

## Habitat Support

No matter which renewable option you choose, you may also select to support stream habitat for salmon and other fish in our service territory by paying an additional \$2.50 per month, which goes directly to the Nature Conservancy. To date, Habitat Support customers helped restore more than 330 miles of stream habitat in our area.

## Portland General Electric Renewable power enrollment form

I want to help build a sustainable energy future for Oregon.

Select your option(s)\* and fill out the form below.

- Green Source** At your regular PGE rate plus an additional \$0.008/kWh.
- Green Future Solar** At your regular PGE rate plus an additional \$5 monthly fee per block.  
How many blocks? \_\_\_\_\_ (Default = 1)
- Clean Wind** At your regular PGE rate plus an additional \$2.50 monthly fee per block.  
How many blocks? \_\_\_\_\_ (Default = 1)

\* Choosing more than one option may result in purchasing more than 100% of your monthly energy usage.

**Habitat Support** (you must first select one of the options above) for an additional \$2.50 per month.

**Paperless Bill** Receive your bill online and receive an email notice when it's ready to view.

NOTE: within 10 business days of submitting this form, you'll receive an email from PGE. Please respond within 72 hours to confirm your paperless bill enrollment.
