Subject: UM1930 Supporting Neighborhood Power Community Solar Projects
Date: Friday, May 1, 2020 9:45:43 AM

Ladies and Gentlemen of the Public Utility Commission:

I am sending this message today to express how enthusiastically my support for solar energy investment and actual project completion is on a community basis. Please approve the projects Neighborhood Power has done, is planning for the near future, and those to come in supporting local renewable power during these times. As an older, semi-retired professional engineer, watching time go by, and seeing little action on global warming and the like, I worry about the younger generations and children. The pushback toward old damaging energy sources by federal leadership, and general efforts of new sources tending to be mostly talk, I am truly grateful to see impetus from Neighborhood Power come to pass in Oregon. These are not small investments in Oregon's future, and go a long way toward turning the tide to renewable, safe energy for the future. We should be very enthusiastic in supporting such efforts going forward. Thank you for your consideration,

Shaw West Co.
