RE: Order No. 19-075 – Customer Comment on Portland General Electric’s Green Future Impact Product

To Whom it May Concern,

The City of Milwaukie is proud to have signed a 15-year commitment to Green Future Impact, the green tariff product offered by Portland General Electric. We’re equally appreciative for the support that the Oregon Public Utility Commission provided to PGE as they developed the product.

With the adoption of the Milwaukie Community Climate Action Plan, the City of Milwaukie formalized its commitment to reducing greenhouse gas emissions and becoming a leader in climate action. The Climate Action Plan established goals of reaching carbon neutrality from electricity by 2035, and carbon neutrality community-wide by 2050. Milwaukie was delighted to hear of the opportunity to decarbonize our city’s operations with 100% renewable energy, bringing us further to reaching our community’s climate goals. Green Future Impact also provides many other advantages in addition to supporting our greenhouse gas reduction targets:

- 100% of the renewable energy is sourced from a local facility, supporting development of local infrastructure and providing Oregonians with jobs in a sustainable field.
- It will benefit Oregon more broadly by contributing to cleaner energy for our future and the health of our green energy economy.
- It makes economic sense for our community and provides a predictable price for a desired term.

The city’s participation in Green Future Impact allows us to align economic and environmental values, and lead by example to encourage other businesses and industries to participate in renewable energy programs. PGE has been a great partner in this process, working closely with our staff to collaborate on sustainable energy solutions that meet the needs of the community. The city is delighted to work with PGE to achieve Milwaukie’s climate goals through the provision of a clean and resilient energy product.

We support Green Future Impact and encourage the Oregon Public Utility Commission to approve of PGE's engagement with customers and the way that it worked to find an appropriate renewable resource that met our specific needs.

Sincerely,
