The Coalition was established in 2009 and is comprised of nearly forty members who own and operate over fifty qualifying facilities (“QFs”) or are attempting to develop new QF projects in Oregon, Idaho, Washington, Utah, Montana and Wyoming. The Commission’s investigation into the treatment of network upgrade costs will impact many of the Coalition’s Oregon members because they are also interconnection customers which purchase goods and services from Oregon utilities.

The Coalition has participated in numerous regulatory proceedings intended to promote appropriate interconnection procedures, competitive markets, PURPA, renewable energy, and diversity of generation ownership, including all the recent major proceedings regarding qualifying facility contract and rate eligibility. The Coalition’s executive director, John Lowe, participated in Docket No. AR 521 through which the Commission adopted the current small generator interconnection rules. Since those rules were adopted, the Coalition has monitored their implementation and can provide the Commission with a small QF perspective regarding how well the process is working and

what issues QFs experience. The Coalition's intervention will assist the Commission in resolving the issues and will not unreasonably broaden the issues, burden the record, or delay this proceeding. Finally, the Coalition's interest is not adequately represented by any other party in this proceeding.

WHEREFORE, the Coalition respectfully requests that the Commission grant its petition to intervene with full party status in this proceeding and to appear and participate in all matters as may be necessary and appropriate; and to present evidence, call and examine witnesses, cross-examine witnesses, present argument, and to otherwise fully participate in the proceedings.

Dated this 8th day of October 2019.

Respectfully submitted,

---
