Re: Supplement to Tariff Advice No. 20-04
Update the Substation Allowance contained within Schedule 19, Large Power Service

Attention Filing Center:

Idaho Power Company ("Company") herewith transmits for filing a supplement to Tariff Advice No. 20-04, pursuant to conversations between Regulatory Analyst Grant Anderson and Commission Staff Member Mitch Moore. As requested by Mr. Moore, the Company is submitting a revised Schedule 19 reflecting the change of the requested effective date to April 22, 2020, after the next public meeting.

Enclosed is a revised Tariff Sheet No. 19-6 reflecting the above-mentioned revision and because this supplemental filing is not within 30 days of the requested effective date of April 22, 2020, an L.S.N. is also enclosed.

If you have any questions regarding this supplement, please contact Regulatory Analyst Grant Anderson at 388-6498 or ganderson@idahopower.com.

Sincerely,

Lisa D. Nordstrom

SCHEDULE 19
LARGE POWER SERVICE
 (Continued)

SPECIAL ARRANGEMENTS FOR SUBSTATION ALLOWANCES

Definitions

Substation Allowance is the portion of the cost of the Substation Facilities funded by the Company.

Substation Facilities include those facilities and related equipment that transform the voltage of energy from a 44 kilovolt or higher rating to a 34.5 kilovolt or lower rating.

Substation Allowance

If a Schedule 19 Customer's request for service requires the installation of new or upgraded transformer capacity in Substation Facilities, the following considerations will be included in the separate agreement between the Customer and the Company:

The Customer will initially pay for the cost of new or upgraded Substation Facilities required because of the customer's request. The Customer will be eligible to receive a Substation Allowance based upon subsequent sustained usage of capacity by the Customer.

a. Substation Allowance: The maximum possible allowance will be determined by multiplying the customer's actual increase in load by \$49,253 per MW, but will not exceed the actual cost of the Substation Facilities funded by the Customer. (R)

b. Substation Allowance Refunds: The Substation Allowance will be refunded to the Customer over a five-year period, with annual payments based on the Customer's Basic Load Capacity at the time of refund. The first refund will be paid one year following the first month energy is delivered through the new Substation Facilities, and will equal the per MW Substation Allowance times the new or added load as measured in MW, with the product divided by five.

The Substation Allowance for the subsequent years will equal the Substation Allowance from the previous year if there is no change in load from the previous year. If there is a change in load from the previous year, the refund will be based on the following adjustment, which will be added to or subtracted from the Substation Allowance received in the previous year:

$$\frac{(\text{Change in load from the previous year as measured in MW}) \times (\text{Substation Allowance per MW})}{\text{Number of Substation Allowance Refunds remaining in five-year period}}$$

The Customer's annual refunds will be made in accordance with the Substation Allowance amount stated in the separate construction agreement between the Customer and the Company. The Company may, at its sole discretion, provide the full Substation Allowance as an upfront lump sum to the Customer.

LESS THAN STATUTORY NOTICE APPLICATION
