RE: Advice No. 20-07

At the public meeting on August 25, 2020, the Commission adopted Staff's recommendation in this matter docketed as ADV 1144. The Staff Report, a receipted copy of the sheets in your advice filing, and a signed LSN are attached.

Nolan Moser

Chief Administrative Law Judge

Public Utility Commission of Oregon

(503) 378-3098

should approve the utilities' request that the changes go into effect with less than 30 days' statutory notice.

Applicable Rule or Law

ORS 757.205 requires public utilities file to all rates, rules, and charges with the Commission.

ORS 757.210 establishes a hearing process to address utility filings and requires rates be fair, just and reasonable.

ORS 757.220 authorizes the commission, for good cause shown, to allow changes to a utility's tariff without requiring the 30 days' notice of the filing.

ORS 757.386(2)(a) directs the Commission to establish a program that provides electricity customers the opportunity to share the costs and benefits of electricity generated by a community solar energy system.

ORS 757.386(7)(d) specifies that CSP participants bear ongoing costs incurred during the continued administration of the program.

ORS 757.386(7)(c) provides all start-up costs prudently incurred during the development or modification of the program established under this section are recoverable in the rates of an electric company.

On June 29, 2017, in Order No. 17-232, the Commission adopted formal rules for the CSP under OAR Division 88 of Chapter 860.

In accordance with OAR 860-880-0190, on December 17, 2019, in Order No. 19-438, the Commission adopted the Community Solar Program Implementation Manual (PIM) and the program policies and procedures therein.

OAR 860-088-0160 instructs that the recovery of ongoing costs associated with the program administrator and low-income facilitator to be collected from participants.

OAR 860-088-0120(3) directs electric companies to develop and obtain Commission approval of an on-bill payment model that assesses and remits CSP participation fees on the CSP participant's electricity bill.

OAR 860-088-0120(4) requires electric companies to obtain Commission approval of any applicable tariffs required by the CSP rules.

OAR 860-022-0025 requires that filings revising tariffs include statements showing the change in rates, the number of customers affected and resulting change in annual revenue, and the reasons for the tariff revision.

Analysis

Background

The electric companies submitted advice filings pursuant to OAR 860-088-0120(4), ORS 757.205, ORS 757.210, and OAR 860-022-0025. Initially, all three utilities made their filings on or prior to July 2, 2020, and requested an effective date of July 29, 2020. All three utilities filed two supplemental filings at Staff's request addressing issues identified by Staff and to allow more time for review. IPC filed its Second Supplemental Advice No. 20-07 on August 10, 2020; PAC filed its second supplement to Advice No. 20-007 on August 11, 2020; and PGE filed its Second Supplemental Advice No. 20-16 on August 7, 2020. All three filings now have effective dates of August 26, 2020.

Each utility's Advice Filing establishes a new rate schedule that defines the relationship between the utility and CSP participants (CSP rate schedule). These filings include the bill credits and the utility and administrative fees that CSP participants will see on their electricity bills. The CSP rate schedules supplement, but do not supersede, the CSP rules, procedures, and participation requirements set forth in the PIM.

The Advice Filings result from agreements reached between Staff, the utilities, and the Project Administrator (PA) during weekly CSP design and development meetings since March 2019. Staff appreciates the PA's and utilities' participation in this lengthy, collaborative effort to establish the terms of participation in the CSP, and to design and implement a monthly data exchange between the PA and utilities that will allow the utilities to provide on-bill transactions for CSP participants.

Utility Billing of Participants

The on-bill CSP transactions described in the CSP rate schedules include both credits to and payments from the CSP participant. The utilities must credit the CSP participant's monthly electric bill for the monthly electricity generated by the participant's share of the CSP project and deduct fees approved by the Commission.¹

In Order No. 19-392, the Commission adopted a per-kWh bill credit rate for each utility equal to that utility's retail residential rate.² Each utility's bill credit rate appears in that

¹ OAR 860-088-0120(2)-(3).

² Commission Order No. 19-392, at 3, Nov. 8, 2019.

utility's CSP rate schedule and is applicable only to the interim tier of projects.³ Table 1, below, lists the bill credit rates for each utility.

Table 1. Bill credit rate amounts by utility for the Interim Tier.

Utility	Bill credit rate (\$/kWh)
IPC	\$0.08480
PAC	\$0.09770
PGE	\$0.11234

The fees the utilities must deduct from CSP participants' bills are 1) subscription fees owed by the participant to the Project Manager; 2) program administration fees owed by the participant to the Program Administrator; and, 3) additional fees collectible from participants by Commission order, such as the utility administration fee.⁴ These fees are explained in greater detail below.

- 1) **The subscription fee** is the means by which the Project Manager recovers its capital and operating costs from participants in its Community Solar Project with a reasonable rate of return. The fee amount is set by the Project Manager and varies by project. The subscription fee amount for each project is published and visible to prospective CSP participants on the CSP website under the project details. The utility's collection of the subscription fee is described in the utility's CSP rate schedule, but the amount of the subscription fee is not listed in the CSP rate schedule.
- 2) **The program administration fee** covers ongoing program implementation costs of the PA and Low Income Facilitator (LIF). In Order No. 19-392, the Commission set the program administration fee at \$0.85/kW-month for participants in the initial program capacity tier. This program administration fee appears in each utility CSP rate schedule.
- 3) **The utility administration fee** is the mechanism for a utility to cover its costs to facilitate the CSP. The utility administration fee is a per-kW-month amount determined by the utility. This fee is described in more detail in the next section. The utility administration fee is included in the utility's CSP rate schedule and is subject to Commission approval as part of the utility's tariff filing.

³ *Id.*, at 4. The interim capacity tier is set at 50 percent of the initial program capacity tier for PAC and PGE, and at 100 percent of the initial program capacity tier for IPC. OAR 860-088-0060(2) states: "The initial program capacity tier for each electric company is equal to 2.5 percent of the electric company's 2016 system peak." The CSP initial program capacity in MW for each electric company is shown in Table 2.

⁴ OAR 860-088-0120(3).

Utility Administration Fee Amounts

To establish the utility administration fee amounts, in November 2019 Staff asked each utility to develop a categorized estimate of the annual ongoing costs it would incur to implement the CSP. These ongoing costs include, for example, IT and billing support, customer service support and training, finance and accounting activities, and corporate communications.⁵ Staff reviewed those costs with Staff from the Energy Rates and Finance Division and determined that the estimated costs were reasonable and similar to utility costs presented in other dockets.

The utilities, Staff, and PA then agreed to convert these annual cost estimates to a \$/kW-month utility administration fee that matches the structure of the program administration fee.⁶ Each utility calculates their utility administration fee separately. At Staff's and the PA's request, the utilities set their utility fees at a level that will fully reimburse the utilities' ongoing costs once the program has fully subscribed its initial capacity allocation of 161 MW. Following the same structure as the program administration fee, Staff recommends that, prior to full program subscription, the uncovered portion of the utility administration costs be treated as start-up costs and be recoverable from non-participating ratepayers.

The utility administration fee calculation assumes that 1) 10 percent of the program capacity will be subscribed by low-income customers who are exempt from these fees;⁷ and 2) 90 percent of the program capacity will be subscribed by non-low-income participants from whom the fees will be collected in proportion to the participant's share of capacity. The amount of each utility's administration fee was calculated by converting the utility's annual costs to monthly costs and dividing by the 90 percent of program capacity expected to be subscribed by fee-paying participants.

The utilities' estimated utility administration fees were posted to the CSP website in December 2019 to help Project Managers assess the economic viability of their prospective CSP projects.⁸ In August 2020, Staff asked the utilities to review their initial estimated ongoing costs and update them as appropriate. After reviewing their original estimated costs, IPC reduced its costs by more than half, PAC lowered its costs by more than 15 percent, and PGE determined that its original cost estimate is still accurate and did not make any adjustments.

⁵ *In the Matter of Public Utility Commission of Oregon, Community Solar Program Implementation* (UM 1930), Order No. 19-392 (The Commission requires the utilities to send at least one communication per year that informs all customers of the CSP opportunity and directs customers to 1) the list of available projects on the CSP website, and 2) the PA's contact information.)

⁶ *Id.*

⁷ *Id.*

⁸ ORCSP Website, <https://www.oregoncsp.org/>, Project Managers, Project Manager Resources, "Billing and Payments Guide for Project Managers" at 1.

Table 2 below summarizes for each utility the utility’s program capacity in MW, updated estimated annual costs, and the resulting utility administration fees. Staff finds that the utility administrative fee amount presented in each utility’s tariff is an accurate estimate of each utility’s costs of administering the CSP.

Table 2. Calculated utility administration fees.

Utility	CSP initial program capacity tier (MW)	90% of total CSP capacity (MW)	Estimated annual ongoing utility administrative cost	Resulting utility administration fee (\$/kW-month)
IPC	3.28	2.95	\$16,900	\$0.48
PAC	64.6	58.14	\$158,426	\$0.23
PGE	93.15	83.84	\$110,500	\$0.11

Use of Ratepayer Funds to Cover Utility Administration Fees

The decision whether it is appropriate to establish utility administrative fees at a level that could shift costs from CSP participants to ratepayers in this case is similar to the Commission’s decision in Order No. 19-392 in this docket. Order No. 19-392 includes two decisions that shifted some program costs to non-participants in order to incentivize program participation and support successful program launch.

1. It establishes the bill credit rate for the designated interim tier at current residential retail electricity rates instead of the resource value of solar. This results in a higher credit for the CSP participant.⁹
2. It establishes program fees based on full subscription of the program’s initial capacity tier instead of the interim capacity tier opened at program launch. This results in a lower fee for the CSP participant.¹⁰

The Commission stated that its decision in Order No. 19-392 “represents a balance that must occur between the two primary requirements of CSP implementation. The first is incentivizing customer participation.” The second is “minimizing cost-shifting to non-participants.”¹¹

Staff believes the proposed utility fees also strike the balance between incentivizing participation and minimizing cost shifting.

⁹ Commission Order No. 19-392, at 3.

¹⁰ *Id.*, at 3.

¹¹ *Id.*, at 2.

If the Commission approves the utility fees proposed by the utilities, PGE and PacifiCorp have a deferral and balancing account mechanism in place that will allow them to defer the variance between their annual costs and amounts collected annually from participants and recover the variance through an automatic adjustment mechanism. IPC does not have such a mechanism, but notes in its Advice Filing that prior to incurring any ongoing administration costs, the Company will request approval of a balancing account mechanism in a future filing to track actual ongoing utility administration costs and the amount recovered from participants.¹²

Conclusion

Staff finds that the CSP rate schedules filed by IPC, PAC, and PGE are accurate and contain all the elements necessary to define the utility-customer relationship for CSP participants. Staff finds that the utility administration fee amount proposed by each utility in its CSP rate schedule is reasonable. Staff also finds there is good cause to waive the requirement in ORS 757.220 that a utility provide the Commission thirty days' notice before a tariff is allowed to become effective. As noted above, the utilities made changes to their Advice Filings to address Staff's concerns. Staff believes it is important that they become effective soon for participants in the CSP. Accordingly, Staff recommends Commission approval of the advice filings of IPC, PAC, and PGE with less than statutory notice.

PROPOSED COMMISSION MOTION:

The Commission should:

1. Approve the IPC, PGE, and PAC advice filings establishing the terms under which qualifying customers may participate in the CSP; and
2. Approve the request to allow these filings to become effective with less than statutory notice.

¹² Idaho Power Company 2nd Supplemental Tariff Advice No. 20-07, p. 1.

SCHEDULE 101
COMMUNITY SOLAR PROGRAM
(OPTIONAL)

PURPOSE

The operation of the Community Solar Program is pursuant to Oregon Administrative Rule 860-088-0005 through 860-088-0190, which establish rules governing implementation of a community solar program under Oregon Laws 2016, chapter 28, section 22.

AVAILABILITY

This schedule is applicable to Participants that hold evidence of a subscription or an ownership to the electric output of a portion of a certified community solar project in Idaho Power's Oregon service area.

APPLICABILITY

The Community Solar Program is available to Residential, General Service, Large Power and Irrigation Service customers.

DEFINITIONS

Annual Billing Period means the period beginning on the first day of the April billing month and running through the close of the March billing month, unless the Company and Project Manager agree otherwise.

Bill Credit means the amount in dollars that Participants receive from their electric utility for the electricity generated from their Participant Interest in a Project.

Bill Credit Rate is the rate, reflected as a dollars per kilowatt-hour ("kWh") value, at which the Company will provide credits to a Participant for the energy produced by their Participation Interest in a Project. The Public Utility Commission of Oregon ("Commission") will assign a Bill Credit Rate to each Project at the time of Project pre-certification. The Bill Credit Rate will remain fixed for the term of the 20-year period covered by a Project Manager's Community Solar Power Purchase Agreement.

Company means Idaho Power Company.

Eligible Expenses are all utility charges and on-bill Participant and Program Fees. Bill credits cannot offset non-utility charges, which are collected on the utility bill, but are passed on to third parties.

Low-Income Participant is defined as a residential customer whose gross annual household income is less than or equal to 80 percent of the Oregon State median family (or household) income. Income verification will be conducted by the Low-Income Facilitator.

Low-Income Facilitator means the entity responsible for serving as a liaison among Low-Income residential customers and affiliated organizations and Project Managers to help meet Low-Income capacity requirements in accordance with OAR 860-088-0080(2) or as determined by the Commission.

Participant means an owner or subscriber of a Project as defined in OAR 860-088-0010(6) and (15).

Participant kWh Share is the amount of kWh generation from the Project that is attributed to the Participant based on the Participation Interest.

SCHEDULE 101
COMMUNITY SOLAR PROGRAM
(OPTIONAL)
(Continued)

DEFINITIONS (Continued)

Participation Fees means the ownership or subscription fees charged by the Project Manager that may be listed on a Participant's utility bill, or may be off-bill, reflecting monthly cost to own or subscribe to a Project. Participation Fees are based on the terms of each Participant's contract with the Project Manager.

Participation Interest means a Participant's proportional share of a Project, defined on a kilowatt ("kW") capacity basis, and based on the terms of each Participant's contract with the Project Manager.

Program Administrator means the third-party entity directed by the Commission to administer the Community Solar Program.

Program Administrator Fee means the fee that the Company collects on each Participant's utility bill to fund the Program Administrator and Low-Income Facilitator, in accordance with OAR 860-088-0120(3)(b).

Program Fees are fees that the Company collects on each Participant's utility bill to fund the administration of the Community Solar Program in accordance with OAR 860-088-0160(2) and the Program Implementation Manual. Program Fees include a Program Administrator Fee and a Utility Administration Fee. Program Fees, expressed in terms of \$/kW/month, are subject to Commission approval and adjusted annually. Low-income Participants are exempt from Program Fees.

Program Implementation Manual means the set of guidelines and requirements for implementing the Community Solar Program adopted by the Commission in Order No. 19-438, as may be periodically amended.

Project or Community Solar Program ("CSP") Project means a solar photovoltaic energy facility used to generate electric energy on behalf of Participants and for which Participants receive credit on their electric bills as provided in OAR Chapter 860, Division 88, and the Program Implementation Manual.

Project Manager is the entity having responsibility for managing the operation of a Project, as defined in ORS 757.386(1)(d).

Utility Administration Fee means the fee that the Company collects on each Participant's utility bill to fund the Company's administration of the Community Solar Program, in accordance with OAR 860-088-0160(2).

BILLING

A Participant's monthly bill will include charges for retail electric service and as directed by OAR 860-088-0120(3)(a)-(c) the utility will collect on a Participant's electricity bill: ownership or subscription fees, fees owed to fund the Program Administrator and Low-Income Facilitator, and additional fees collectible imposed by Commission order. A Participant will also receive Bill Credits as provided in OAR 860-088-0170.

August 26, 2020

SCHEDULE 101
COMMUNITY SOLAR PROGRAM
(OPTIONAL)
(Continued)

BILLING (Continued)

Bill Credit

The Company will apply a credit to each Participant's monthly utility bill in accordance with the process and calculations set forth in ORS 757.386(6), OAR 860-088-0170, and the Program Implementation Manual. The Program Administrator will calculate the value of a Bill Credit based on the Participant's kWh Share multiplied by the Project's Bill Credit Rate. The Bill Credit can be used to offset all Eligible Expenses on a Participant's monthly utility bill. A Participant may not cash out Bill Credits.

Bill Credit Rate

The Commission will establish a Project's Bill Credit Rate at the time of Project pre-certification. The Commission has adopted the following Bill Credit Rates based on the capacity of pre-certified projects to come online in the Company's Oregon Service area:

- 1) \$0.0848/ kWh – applies to first 3.27 MW of Program capacity for the Company's Oregon service area

Participation Fees

The Company will apply Participation Fees, if applicable, to each Participant's utility bill in the amounts determined by the Program Administrator.

Program Fees

The Company will apply Program Fees, if applicable, to each Participant's utility bill. Program Fees will be based on each Participant's Participation Interest in the Project. Program fees (both Utility Administration and Program Administrator fees) are updated on an annual basis and posted on the www.oregoncsp.org website.

Current Program Fee Amounts:

Program Administrator Fee:	\$0.85 /kW/month
Utility Administration Fee:	\$0.48 /kW/month
<hr/>	
Program Fees (total):	\$1.33 /kW/month

Excess Credit

If a Participant accrues Bill Credits that exceed the Eligible Expenses on their monthly utility bill, the excess Bill Credit amount will be carried forward and applied to the Participant's subsequent utility bills through the end of the Annual Billing Period. In accordance with the Program Implementation Manual, a Participant may not cash out excess Bill Credit amounts.

Annual Bill Credit Reconciliation

Under OAR 860-088-0090(2) and OAR 860-088-0170(4), a Participant is not permitted to receive Bill Credits for more energy than they consume on an annual basis. If a Participant's Participation Interest in a Project generates more energy than their annual usage, the Company will apply an adjustment charge to the Participant's next monthly bill in accordance with the process set forth in the Program Implementation Manual. This adjustment may appear on a Participants bill 30-60 days after the end of Annual Billing Period depending on a Participant's bill cycle. Participant's annual excess generation will be calculated based on the Participant's usage and their share of Project generation during the Annual Billing Period. The Excess Credits as determined during the Annual Bill Credit Reconciliation will be donated to the Company's low-income program and valued at the as-available avoided cost rate contained in the then applicable Schedule 100, or other successor tariff schedule.

SCHEDULE 101
COMMUNITY SOLAR PROGRAM
(OPTIONAL)
(Continued)

BILLING (Continued)Timing

In accordance with the Program Implementation Manual, the Company will post a Participant's Bill Credit to their account on the ninth calendar day of each month, unless the ninth calendar day is a Sunday or holiday, in which case the Bill Credit will post on the following calendar day. If a Participant's billing period ends after the ninth calendar day of the month, their bill will reflect their Bill Credit for the previous month. If a Participant's billing period ends before or on the ninth calendar day of the month, their bill will reflect a one-month lag in the application of the Bill Credit.

Nonpayment and Underpayment

In accordance with the Program Implementation Manual, the Company will recover any unpaid Participation or Program Fees on the Participant's next monthly utility bill. At the direction of the Program Administrator, the Company will suspend the application of Bill Credits or terminate a Participant's Participation Interest for failure to pay Participation and Program Fees in full.

Utility Disconnection

Utility disconnection may result in the early termination of a Participant's Participation Interest, subject to the terms of a Participant's agreement with the Project Manager. If the Company disconnects a Participant's utility service temporarily, the Company will apply the Bill Credits, Participation Fees and Program that accrue during a period of disconnection to the Participant's next monthly utility bill in accordance with the Program Implementation Manual and if the utility service agreement isn't terminated.

SPECIAL CONDITIONSPortability

A Participant may retain their Participation Interest in a CSP Project if they re-locate to another site within the Company's Oregon service area in accordance with the terms of the Program Implementation Manual and, if applicable, their agreement with the Project Manager.

Transferability

A Participant may transfer their Participation Interest in a CSP Project to another eligible customer of their choosing in accordance with the terms of the Program Implementation Manual and, if applicable, their contract with the Project Manager. Any fees assessed by the Project Manager for the transfer of a Participant's Participation Interest will not be reflected on the Participant's utility bill. Low-income Participants are exempt from these fees. Bill Credits and Participation Fees may take up to sixty (60) days to be removed from a Participant's monthly utility bill. A Participant may not cash out any accumulated Bill Credits or any excess Bill Credits.

Changes

A Participant may change their Participation Interest in accordance with the terms of the Program Implementation Manual and, if applicable, their agreement with the Project Manager. Any fees assessed by the Project Manager to change the size of a Participant's Participation Interest will not be reflected on the Participant's utility bill. Low-Income Participants are exempt from these fees.

SCHEDULE 101
COMMUNITY SOLAR PROGRAM
(OPTIONAL)
(Continued)

SPECIAL CONDITIONS (Continued)

Early Termination

A Participant or Project Manager may terminate a Participation Interest before the end of the contract term, in accordance with the terms of the Program Implementation Manual, and, if applicable, their agreement with the Project Manager. Any early termination fees assessed by the Project Manager will not be reflected on the Participant's utility bill. When a Participant or Project Manager terminates a Participation Interest, the Company will donate any Excess Credit amounts associated with the Participant's Participation Interest, valued at the as-available avoided cost rate contained in the then applicable Schedule 100, or other successor tariff schedule, to the Company's low-income program.

Completion

A Participant's Participation Interest is complete when the final Bill Credit amounts are applied to the Participant's monthly utility bill and the Program Administrator completes the final Bill Credit reconciliation according to OAR 860-088-0170(4).

Term

This Schedule will apply for the term agreed to between a Participant and the Project Manager, not to extend beyond the end date of the Annual Billing Period following the termination of the Project Manager's CSP Purchase Agreement.

RULES AND REGULATIONS

Service under this Schedule will be in accordance with the standard Rules and Regulations of the Company as on file with the Public Utility Commission of Oregon.
