RE: Withdrawal of Tariff Advice No. 20-13  
Schedule 89 – Commercial and Industrial Energy Efficiency and New Cost-  
Effectiveness Exceptions

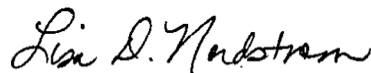

Attention Filing Center:

On December 11, 2020, Idaho Power Company (“Idaho Power” or “Company”) filed Tariff Advice No. 20-13 – modifications to Schedule 89, Commercial and Industrial Energy Efficiency and New Cost-Effectiveness Exceptions. The modification to Schedule 89 proposed changes to the prescriptive Retrofits lighting measures through measure additions, removal, or modification, and one administrative housekeeping change. In its filing, Idaho Power requested also new cost-effectiveness exceptions for certain measures under the commercial and industrial sector.

Following a recent discussion with Oregon Public Utility Commission Staff, at this time, the Company is requesting to withdraw its filing. The Company intends to resubmit a filing, requesting modifications to Schedule 89 and any potential requests for cost-effectiveness exceptions, at a later date.

If you have any questions regarding this withdrawal, please contact Regulatory Consultant Paul Goralski at (208) 388-2608 or [pgoralski@idahopower.com](mailto:pgoralski@idahopower.com).

Sincerely,

Lisa Nordstrom
