Subject: Sunriver Water LLC Expansion
Date: Thursday, June 17, 2021 8:29:19 PM

Hello: I filed a protest to this application and was told that I would receive regular notification of events. But I have not. When is the next public hearing on this issue? Where can I see the engineering studies regarding the aquifer's current capacity and the impact of the drought on the level available. Is your agency aware of the water features planned in Caldera Springs? When is the next public hearing? I and many others would like to attend. Especially those from three rivers and La Pine who are discovering that their wells are not performing as in the past.

Regards,
