Subject: Docket @ UW 186

To whom it may concern:

This email is to contest Docket UW 186, the rate increase that Sunriver Water LLC/Environmental LLC. As I discussed via phone in late August 2021 with Tim Smith, increasing my water rate at 42% more than it is now, is so way out of line as to be inconceivable. Tim Smith continued saying on our phone conversation, that they installed new piping or something of that order and needed to cover the costs. Wait a minute, it's called a Budget, and they need to do a future forecast of needs, then just maybe a minor increase that can be maintained within that budget. It is not up to the home owners & businesses of Sunriver, many of whom are seniors on a fixed income, because this utility company has overspent their budget. And by 42%, where is the common sense

Who is running the Sunriver Water LLC, to think it is okay to spend money first then say, oh who's going to pay for this, Sunriver owners? We are a very small community, I must already pay \$140 per month, whereas ½ mile away, in Winter Wonderland, their water bill is ¼ the amount that I pay. When does it stop? When we are forced to move from our retirement home, because of continued price increases from Utility companies?

So, this this I am requesting that UW 186 be denied.

Best regards,
Linda Anzellotti
