Hi Kimberly :

Please submit this @ the hearing.

Expenses need to be paid,
Improvements happen,
We all work for a profit.

No business doubles it's price overnight. Either the improvements are greater than needed or the increases are designed to show a higher profitable business in a short amount of time for resale at our expense.

I hope an increase is not rubber stamped. When an average bill per year is \$440 and increases to \$880 per year, something is wrong. This is a mixed neighborhood of families with kids, seniors, some working & some not, mobile homes & stick built homes. Incomes (I'm guessing) are in the low end of middle class.

Hopefully, your decision is fair and reasonable to all.

Thankyou

Tim Rietveld
