# BEFORE THE PUBLIC UTILITY COMMISSION OF THE STATE OF OREGON 

OPENING TESTIMONY OF JUSTIN BIEBER

ON BEHALF OF
FRED MEYER STORES

OCTOBER 25, 2021

## OPENING TESTIMONY OF JUSTIN BIEBER

## Introduction

## Q. Please state your name and business address.

A. My name is Justin Bieber. My business address is 111 E Broadway, Suite 1200, Salt Lake City, Utah 84111.

## Q. By whom are you employed and in what capacity?

A. I am a Senior Consultant at Energy Strategies, LLC. Energy Strategies is a private consulting firm specializing in economic and policy analysis applicable to energy production, transportation, and consumption.

## Q. On whose behalf are you testifying in this proceeding?

A. My testimony is being sponsored by Fred Meyer Stores and Quality Food Centers ("Fred Meyer"), divisions of The Kroger Co. Kroger receives most of its service from Portland General Electric ("PGE") under rate Schedule 485.

## Q. Please describe your professional experience and qualifications.

My academic background is in business and engineering. I earned a Bachelor of Science in Mechanical Engineering from Duke University in 2006 and a Master of Business Administration from the University of Southern California in 2012. I am also a registered Professional Civil Engineer in the state of California.

I joined Energy Strategies in 2017, where I provide regulatory and technical support on a variety of energy issues, including regulatory services, transmission and renewable development, and financial and economic analyses. I have also filed
and supported the development of testimony before various state utility regulatory commissions.

Prior to joining Energy Strategies, I held positions at Pacific Gas and Electric Company as Manager of Transmission Project Development, ISO Relations and FERC Policy Principal, and Supervisor of Electric Generator Interconnections. During my career at Pacific Gas and Electric Company, I supported multiple facets of utility operations, and led efforts in policy, regulatory, and strategic initiatives, including supporting the development of testimony before and submittal of comments to the FERC, California ISO, and the California Public Utility Commission. Prior to my work at Pacific Gas \& Electric, I was a project manager and engineer for heavy construction bridge and highway projects.

## Q. Have you testified previously before this Commission?

A. Yes, I have testified in PGE's 2018 general rate case, UE 335. I also testified in PacifiCorp's 2020 general rate case, UE 374.
Q. Have you filed testimony previously before any other state utility regulatory commissions?
A. Yes. I have testified before state utility commissions in Colorado, Indiana, Kentucky, Michigan, Montana, Nevada, New Mexico, North Carolina, Ohio, Utah, Virginia, and Wisconsin.

## Overview and Conclusions

## Q. What is the purpose of your opening testimony in this proceeding?

A. My testimony addresses PGE's proposed Customer Impact Offset (CIO).

## Q. What are your primary conclusions and recommendations?

A. The Commission should reject the CIO as proposed by PGE. PGE's proposed CIO has a disproportionate impact on Direct Access Schedule 485 customers and would result in an effective rate increase of $15.6 \%$ for Schedule 485, more than three times the system average. This is not a reasonable result, especially given that absent the CIO, PGE's own Marginal Cost of Service Study indicates that Schedule 85 should receive a rate decrease. I recommend modifications to the CIO and system usage charge rate design for Schedules $85 / 485$ that will help mitigate these disproportionate impacts to Schedule 485 customers.

## Customer Impact Offset (CIO)

Q. How does PGE allocate costs among the different rate schedules?
A. PGE rate design witnesses Robert Macfarlane and Teresa Tang explain that PGE uses the Marginal Cost of Service Study to inform the allocation of functional revenue requirements in the rate-spread process. ${ }^{1}$

[^0]Q. Does PGE propose to mitigate the rate impact to certain rate schedules that would otherwise result from a complete alignment between rate-spread and the Marginal Cost of Service Study?
A. Yes. Mr. Macfarlane and Ms. Tang explain that the Company proposes to utilize the CIO to limit the rate increase to certain rate schedules. The proposed CIO would limit the rate increase to Schedule 7 and 32 customers while increasing costs relative to the cost of service for Schedules 85/485/585/89/489/589. According to Mr. Macfarlane and Ms. Tang, after the CIO, Schedule 32 is limited to twice the proposed overall increase and Schedules 85 and 89 will not receive an increase or a decrease. PGE proposes to implement the CIO by decreasing the distribution charges for Schedules 7 and 32 and increasing the system usage charges for Schedules 85/485/585/89/489/589. ${ }^{2}$
Q. PGE claims that the proposed CIO does not result in an increase for Schedules 85 and 89. ${ }^{3}$ After PGE's proposed CIO is applied, what would be the impact to Direct Access customers on Schedules 485?
A. After the proposed CIO and excluding changes to Schedule 129 Long-Term Transition Cost Adjustment revenues, Direct Access customers on Schedule 485 would receive an increase of $15.6 \%$, which is more than three times the system average. The detailed rate impacts by class, excluding the Public Purpose Charge ("PPA"), Low Income Assistance ("LIA"), and Schedule 129 revenues are presented in Exhibit FM/101 and summarized in Table JB-1 below.

[^1]Table JB-1
PGE Proposed Rate Impacts by Rate Schedule Excluding PPC, LIA, and Schedule 129 Revenues
Rate

| Residential | 7 | $6.5 \%$ |
| :--- | :---: | :---: |
| General Service | $32 / 38$ | $7.7 \%$ |
| Irrig. \& Drain. Pump. | $47 / 49$ | $7.2 \%$ |
| General Service 31-200 kW | 83 | $4.4 \%$ |
| General Service 201-4,000 kW | 85 | $0.0 \%$ |
| Schedule 89 > 4 MW | 89 | $0.0 \%$ |
| Schedule 90 | 90 | $-3.2 \%$ |
| Lighting | $15 / 91 / 92 / 95$ | $12.7 \%$ |

| Direct Access Service 201-4,000 kW | 485 | $15.6 \%$ |
| :--- | :---: | :---: |
| Direct Access Service > 4 MW | 489 | $1.7 \%$ |
| New Load Direct Access Service | 689 | $-8.4 \%$ |
|  |  |  |
|  | TOTAL | $\mathbf{4 . 6 \%}$ |

Q. Please explain why you have excluded Schedule 129 revenues from PGE's proposed rate impacts.
A. Long-term Direct Access customers are subject to transition cost adjustment charges under Schedule 129 for a transition period after becoming a Direct Access customer. Based on PGE's filed case, there would be a reduction of $\$ 5.7$ million in Schedule 129 revenues from schedule 485 customers. However, the large majority of this reduction, $\$ 4.2$ million, is due to the fact that 2017 Vintage Schedule 485 customers will no longer be subject to transition charges. Thus the decrease in Schedule 129 revenues for these customers is completely unrelated to PGE's general rate case and would occur regardless of what PGE proposes in this instant proceeding. Further, the majority of Schedule 485 customers are no longer subject to transition cost adjustment charges and will not experience any decrease
in revenues resulting from changes to Schedule 129 rates. Table JB-2 below summarizes the reduction in Schedule 129 revenues from customers on Schedule 485.

Table JB-2
PGE Proposed Change in Schedule 129 Revenues From Customers on Schedule 485

|  | Sch 129 Price ( $¢ / \mathrm{kWh}$ ) |  | Sch 129 |
| :---: | :---: | :---: | :---: |
|  | Current | Proposed | $\underline{\text { Rev Delta }}$ |
| Schedule 485-S V2017 | 2.85 | 0.00 | (\$2,362,750) |
| Schedule 485-S V2018 | 3.07 | 2.25 | $(\$ 445,554)$ |
| Schedule 485-S V2019 | 2.97 | 2.15 | $(\$ 249,447)$ |
| Schedule 485-S V2020 | 2.38 | 1.55 | $(\$ 82,984)$ |
| Schedule 485-P V2017 | 2.80 | 0.00 | (\$1,862,523) |
| Schedule 485-P V2018 | 3.03 | 2.24 | (\$110,092) |
| Schedule 485-P V2019 | 2.96 | 2.17 | $(\$ 190,168)$ |
| Schedule 485-P V2020 | 2.36 | 1.57 | (\$184,079) |
| Schedule 485-P V2021 | 3.14 | 2.35 | $(\$ 225,372)$ |
| Total Decrease in Sch 129 Revenue |  |  | (\$5,712,969) |
| Decrease Resulting from End of Opt-Out Period |  |  | (\$4,225,273) |

Q. Do you have concerns with PGE's proposed CIO for Schedule 85/485 customers?
A. Yes, I do. The proposed CIO for Schedule 85/485 customers has a disproportionate impact on Direct Access customers. PGE proposes to levy a CIO on Schedules 85 and 89 so that those schedules do not receive a rate decrease. However, the proposed CIO would result in Schedule 485 customers receiving a $15.6 \%$ increase, more than three times the system average. At the same time, the rate schedules that would receive the subsidy being paid by Schedule 485 customers
would get a rate increase that is less than half the rate increase of Schedule 485. This is not a reasonable result, especially given that absent the CIO, PGE's own Marginal Cost of Service Study indicates that Schedule 85 should receive a rate decrease.

## Q. What do you recommend to mitigate this unreasonable rate impact to Schedule 485 customers?

A. I recommend that the Schedule 85/485 system usage charge rate design should be modified to include a percent of bill component to recover the proposed CIO. PGE's proposed system usage charge for Schedule $85 / 485$ would include a CIO component of $1.64 \mathrm{mills} / \mathrm{kWh}$. I recommend that this energy-based CIO rate component be eliminated and replaced with a new system usage charge component equal to $1.925 \%$ of a Schedule $85 / 485$ customer's bill. Note that I am only recommending a change to the portion of the system usage charge that would recover the CIO. I am not recommending any changes to the energy-based system usage charge rate component that is designed to recover Franchise Fees and Other costs.

I also recommend that the CIO allocation to Schedules $85 / 485 / 585$ be reduced from $\$ 6.0$ million to $\$ 4.7$ million in order to maintain a near zero class rate impact for Schedule 85. This can be accomplished with a corresponding revenue neutral offset to the Schedule 7 CIO , resulting in a Schedule 7 CIO credit of 0.48 mills/kWh. The revenue verification for my proposed modifications to the CIO is presented in Exhibit FM/102.
Q. Have you calculated the rate impacts to the different rate schedules that would result from your recommended changes to the CIO?
A. Yes, the rate impacts resulting from my recommended changes to the CIO compared to PGE's proposed rate impacts are presented in Exhibit FM/103 and summarized in Table JB-3 below.

Table JB-3<br>Rate Impacts by Rate Schedule at Kroger Recommended CIO Compared to PGE Proposed Rate Impacts at PGE Proposed Revenue Requirement Excluding PPC, LIA, and Schedule 129 Revenues

| Rate | Schedule | $\begin{gathered} \text { PGE } \\ \text { \% Change } \end{gathered}$ | $\begin{gathered} \text { Kroger } \\ \text { \% Change } \end{gathered}$ | Difference |
| :---: | :---: | :---: | :---: | :---: |
| Residential | 7 | 6.5\% | 6.6\% | 0.1\% |
| General Service | 32/38 | 7.7\% | 7.7\% | 0.0\% |
| Irrig. \& Drain. Pump. | 47/49 | 7.2\% | 7.2\% | 0.0\% |
| General Service 31-200 kW | 83 | 4.4\% | 4.4\% | 0.0\% |
| General Service 201-4,000 kW | 85 | 0.0\% | -0.1\% | -0.1\% |
| Schedule 89 > 4 MW | 89 | 0.0\% | 0.0\% | 0.0\% |
| Schedule 90 | 90 | -3.2\% | -3.2\% | 0.0\% |
| Lighting | 15/91/92/95 | 12.7\% | 12.7\% | 0.0\% |
| Direct Access Service 201-4,000 kW | 485 | 15.6\% | 6.5\% | -9.1\% |
| Direct Access Service > 4 MW | 489 | 1.7\% | 1.7\% | 0.0\% |
| New Load Direct Access Service | 689 | -8.4\% | -8.4\% | 0.0\% |
|  | TOTAL | 4.6\% | 4.6\% | 0.0\% |

As can be seen in Table JB-3, my recommended modifications would result in a $6.5 \%$ increase to Schedule 485 while at the same time having only a $0.1 \%$ impact to Schedules 7 and 85 relative to PGE's proposed rate-spread. My recommended modifications would not have any impact on the other rate schedules.
Q. Your recommended modifications result in a $\mathbf{0 . 1 \%}$ increase to Schedule 7 relative to PGE's proposed rate-spread. Can you please explain why you are recommending a modification to the CIO that impacts Schedule 7?
A. Under PGE's proposed CIO and rate-spread, Schedule 7 is the beneficiary of subsidy payments from Schedules $85 / 485$. One of PGE's stated objectives for the CIO is to increase costs for Schedule 85 relative to the cost of service so that Schedule 85 does not receive a rate increase or decrease. In order to be consistent with this objective, my recommended change to the CIO rate design for Schedules $85 / 485$ requires an adjustment to the amount of the CIO, resulting in a $0.1 \%$ impact to Schedule 7, relative to PGE's proposed rate-spread.

Given that my recommended modifications to the CIO would still provide $\$ 3.6$ million in CIO subsidy credits to Schedule 7, while also accomplishing PGE's objective that Schedule 85 does not receive a rate increase or a decrease, I believe that my recommended modifications to the CIO achieve a reasonable result. However, to the extent that the Commission determines that it is appropriate for Schedule 7 to receive additional CIO revenues, then those additional subsidy credits can be funded by increasing my recommended percent of bill system usage charge component for Schedules $85 / 485$. Increasing my recommended CIO charge from $1.925 \%$ to $2.452 \%$ of a Schedule $85 / 485$ customer's bill would provide the necessary amount of CIO funding to maintain PGE's proposed $\$ 4.7$ million of CIO subsidy credits to Schedule 7.
Q. Have you prepared a bill impact analysis for your recommended changes to the system usage charge rate design for Schedule 85 ?
A. Yes. My rate impact analysis is presented in Exhibit FM/104 and illustrates the bill impacts to Schedule 85 customers that would result from my recommended modifications to the CIO. As can be seen in Exhibit FM/104, the bill impacts from my recommended modifications do not vary substantially relative to the bill impacts for the various Schedule 85 load profiles proposed by PGE.
Q. Your proposed modifications to the CIO were calculated at PGE's proposed revenue requirement. How should your proposed modifications be adjusted if the Commission adopts a base rate revenue requirement that is different than PGE's request?
A. I do not recommend any adjustments to my recommended CIO if the Commission approves a revenue requirement that is less than PGE's request. To the extent that the Commission approves a revenue requirement that is lower than PGE's request, that will result in smaller rate impacts for all rate schedules. The CIO would already provide a reasonable rate mitigation to Schedules 7 and 32 at PGE's proposed revenue requirement. It would not be necessary to further increase the inter-class subsidies provided through the CIO at a lower revenue requirement.
Q. Does this conclude your opening testimony?
A. Yes, it does.

)

Justin Bieber, being first duly sworn, deposes and states that:

1. He is a Senior Consultant with Energy Strategies. L.L.C., in Salt Lake City, Utah;
2. He is the witness who sponsors the accompanying testimony entitled "Opening Testimony of Justin Bieber;"
3. Said testimony was prepared by him and under his direction and supervision;
4. If inquiries were made as to the facts and schedules in said testimony he would respond as therein set forth; and
5. The aforesaid testimony and schedules are true and correct to the best of his knowledge, information and belief.

Subscribed and sworn to or affirmed before me this $25^{\text {th }}$ day of October, 2021, by Justin Bieber.
