ADV 1391 PACIFICORP'S ADVICE NO. 22-005 EXEMPTION FOR MASTER METERING

Workshop Announcement

This announcement describes Oregon Public Utility Commission (OPUC) Staff's plan to host a stakeholder workshop regarding ADV 1391/ Advice No. 22-005 on **July 20, 2022 from 2:30-4:30 PM PDT**.

Overview

PacifiCorp has filed a request for an exemption process to allow qualifying projects to install non-individually metered services in certain residential buildings. The exemption is to PacifiCorp's Rule 8, Metering, which is in place due to the Public Utility Regulatory Policies Act (PURPA) passed in 1978. PURPA 16 USC §2625(b) identifies policy goals that master metering be prohibited or restricted. To qualify for an exemption under the Company's proposal, the following conditions must be met:

1. The required exemption to individual metering as required by the Oregon State building code has been obtained by the builder.
2. The units are not sub-metered.
3. HVAC is provided through central systems to each individual residential unit, or if an all-electric building, HVAC may be provided by individual or shared heat pumps supplying both heating and cooling to each individual residential unit.
4. Electric load within each unit that is controlled by the tenant, excluding any individual load from item 3, will be less than kWh per month

Staff Workshop

The goal of the workshop is to first provide a forum for information, discussion, and questions with the Utility and stakeholders. Staff further hopes to elicit feedback from interested stakeholders on concerns or issues they may have. Staff has asked the PacifiCorp to provide a brief overview of the request, but recommends stakeholders review the filing prior to the workshop so that stakeholders can get the most out of the time provided.

- **Date:** July 20, 2022
- **Time:** 2:30 – 4:30 PM
- **Location:** Microsoft Teams Meeting
