P.O. Box 1088  
201 High Street SE, Suite 100  
Salem, Oregon 97308-1088

**Re: Docket No. PCN-5 – In the Matter of Idaho Power Company's Petition for Certificate of Public Convenience and Necessity.**

Attention Filing Center:

Attached for filing in the above-captioned docket is Idaho Power Company's Supplemental Direct Testimony of Lindsay Barretto (Idaho Power, Barretto/300-302). Confidential material in support of the filing will be provided to qualified parties under Protective Order No. 22-309 via encrypted zip file.

Please contact this office with any questions.

Sincerely,

A handwritten signature in blue ink that reads "Suzanne Prinsen".

Suzanne Prinsen  
Legal Assistant

In the Matter of )  
IDAHO POWER COMPANY'S )  
PETITION FOR A CERTIFICATE OF )  
PUBLIC CONVENIENCE AND )  
NECESSITY. )  
\_\_\_\_\_ )

**IDAHO POWER COMPANY  
SUPPLEMENTAL DIRECT TESTIMONY  
OF  
LINDSAY BARRETTO**

**Redacted**

**December 30, 2022**

- 1 Q. Please state your name and business address.
- 2 A. My name is Lindsay Barretto. My business address is 1221 West Idaho Street, Boise,  
3 Idaho 83702.
- 4 Q. Are you the same Lindsay Barretto that previously filed direct testimony in this  
5 matter?
- 6 A. Yes.
- 7 Q. What is the scope and purpose of your supplemental direct testimony?
- 8 A. My supplemental direct testimony will update the Boardman to Hemingway  
9 transmission line ("B2H project") cost estimate based on a more recent forecast dated  
10 December 2022, which is detailed in Confidential Exhibit Idaho Power/301. In addition,  
11 I will discuss updates to Attachment 10 to the Petition, pages 1 through 7, that includes  
12 the names and addresses of all persons who have known interests in the land that  
13 may be physically impacted or traversed by the B2H project, as well as a column  
14 identifying whether or not the Company has obtained rights-of-way associated with the  
15 property. The updated pages 1 through 7 of Attachment 10 to the Petition  
16 supplements and replaces the original Attachment 10 filed on September 30, 2022,  
17 pages 1 through 7, and is being filed along with this testimony.
- 18 Q. Why is Idaho Power providing a revised B2H project cost estimate?
- 19 A. The B2H project cost estimate included with my Direct Testimony filed on September  
20 30, 2022, was based on the most recent forecast at the time, which was approximately  
21 \$ [REDACTED], including a contingency, overheads, Allowance for Funds Used During  
22 Construction (AFUDC) and property taxes. The Company estimated local  
23 interconnection costs of approximately \$ [REDACTED], for total B2H project costs of  
24 \$ [REDACTED]. The cost estimate was based on a 30 percent detailed design package.  
25 In December 2022, Idaho Power developed an updated cost estimate based on a 60  
26 percent detailed design package.

1   **Q. How has this design progressed?**

2   A. The engineering design for a transmission line project starts with an indicative design  
3   based on available data and as additional information is made available, such as  
4   detailed topography captured by LiDAR, the design progresses. With more site-  
5   specific data, detailed engineering progresses and economization occurs based on  
6   on-the-ground data. The indicative design, for which the B2H cost estimate used in  
7   modeling of the 2021 IRP was based, included selection of a standard tower series  
8   and conductor, the Oregon Department of Energy Application for a Site Certificate  
9   proposed route location and length, preliminarily sited towers and access roads, and  
10   identified primary station equipment.

11   **Q. How does the detailed design/indicative design translate to a cost estimate?**

12   A. Based on the indicative design, Owner's Engineer HDR, Inc. ("HDR") utilized their  
13   utility and industry experience with current market values for materials, equipment,  
14   and labor plus their experience with the specific BPA towers and conductor that the  
15   B2H project is using to arrive at the B2H estimate. HDR accomplished a partial  
16   material take off for all major items (towers, conductors, foundations, roads, rights-of-  
17   way, etc.).

18                 In 2021, Idaho Power hired the firm Leidos Engineering, LLC ("Leidos"), to  
19   provide engineering services to develop a detailed transmission line design for the  
20   project. In 2022, the Company hired the firm Quanta Infrastructure Solutions Group  
21   ("QISG") as the constructability consultant for the project. QISG has significant  
22   experience overseeing and managing construction of high-voltage transmission  
23   projects. Leidos completed the 30 percent detailed design package, providing an  
24   engineering design criteria, the project alignment with structure locations based on  
25   LiDAR, and structure tower class development for all structures required for the line.  
26   With this 30 percent detailed design package, QISG performed a constructability

1 review of the design and provided a revised cost estimate for the transmission line  
2 component of the project based on their expertise, for which the B2H cost estimate  
3 provided on September 30, 2022, in this proceeding was based. Since filing of the  
4 Company's Petition, Idaho Power has received a 60 percent design package from  
5 Leidos.

6 **Q. How does the 60 percent design package differ from the 30 percent design  
7 package?**

8 A. The 60 percent design package includes more site-specific constraints to meet height  
9 limitations, as well as right-of-way considerations. At this point, the transmission line  
10 structure locations are generally confirmed, structure types and class are finalized,  
11 and access roads are nearly finalized. With this 60 percent detailed design package,  
12 QISG performed a constructability review of the design and provided a revised cost  
13 estimate for the transmission line component of the B2H project based on their  
14 expertise, for which the December 2022 cost estimate update provided in Exhibit 301  
15 is based.

16 **Q. Are the varying percentage levels of detailed design indicative of the percentage  
17 accuracy of the cost estimate?**

18 A. No. The difference between preliminary design and the levels of detailed design are  
19 some of the areas around which assumptions must be made about project  
20 requirements. As with any large project, the goal is to increase certainty over time and  
21 reduce contingencies and unknowns as the project matures. The design percentage  
22 is indicative of the unknowns that have been eliminated. Therefore, the B2H project  
23 estimate has included a budget with cost estimates and contingency for those various  
24 unknowns since the beginning.

25 **Q. Does the cost estimate resulting from the 60 percent detailed design reflect any  
26 increased costs due to inflation?**

1 A. Yes. The cost estimate reflects increased material and labor costs due to inflation and  
2 supply chain issues. Idaho Power's revised B2H project cost estimate is approximately  
3 \$ [REDACTED], including a contingency, overheads, AFUDC and property taxes, with  
4 local interconnection costs of approximately \$ [REDACTED], for total B2H project costs  
5 of \$ [REDACTED]. Confidential Exhibit Idaho Power/301 to my testimony presents the  
6 December 2022 B2H project cost estimate by cost category. In addition, it includes all  
7 the B2H cost estimates prepared during the 2018 through 2022 time period, by cost  
8 category, for comparison purposes.

9 Q. **With an increase of \$ [REDACTED] in total B2H project costs, would the December  
10 2022 B2H project cost estimate impact the results of the 2021 IRP preferred  
11 portfolio?**

12 A. No. As explained in the Direct Testimony of Mr. Ellsworth, the difference between the  
13 2021 IRP preferred portfolio, and the best alternative portfolio that did not include B2H  
14 was approximately \$266 million on a net present value ("NPV") basis. Additionally,  
15 IRPs are based on comparing portfolios, and the best alternative portfolio that did not  
16 include B2H included the Gateway West project, another 500-kV transmission project.  
17 An increase in B2H costs would likely mean that there would be a comparable increase  
18 to Gateway West costs. Therefore, B2H costs could increase significantly, and the  
19 project would remain cost effective.

20 Q. **OAR 860-025-0030(2)(j) requires the Company provide an estimate of the  
21 levelized annual revenue requirement of the B2H project costs as a percentage  
22 of Idaho Power's estimated annual revenue requirement. Has the Company  
23 updated this estimate using the December 2022 B2H project cost estimate?**

24 A. Yes. As indicated in the Petition, the estimated revenue requirement associated with  
25 total B2H project costs of \$ [REDACTED], is approximately \$ [REDACTED], or [REDACTED]  
26 percent of the Company's estimated total Oregon jurisdictional annual revenue

1 requirement. Using the December 2022 B2H project cost estimate of \$ [REDACTED],  
2 results in an estimated revenue requirement of approximately \$ [REDACTED], or [REDACTED]  
3 percent of the Company's estimated total Oregon jurisdictional annual revenue  
4 requirement.

5 **Q. What changes have been made to Attachment 10 pages 1 through 7 filed with  
6 the Petition and included with this filing as Idaho Power/302?**

7 A. Idaho Power filed the Petition in this docket on September 30, 2022, because a final  
8 decision from the Commission by June 30, 2023, is critical to allowing the Company  
9 to construct the Project in time to meet the 2026 resource deficit. To begin construction  
10 in 2023, Idaho Power will need access to the affected parcels. However, subsequent  
11 to filing of the Petition, the Company continued its efforts negotiating with landowners  
12 in good faith to obtain options for easements, executing an additional 22 easement  
13 option agreements, for a total of 51 parcels under contract. In addition, Idaho Power  
14 has identified 34 parcels on the landowner list that do not contain project features and  
15 therefore no access/easement option is required. The revised pages 1 through 7 of  
16 Attachment 10 to the Petition note the changes.

17 **Q. Are there any other changes reflected on the revised pages 1 through 7 of  
18 Attachment 10?**

19 A. Yes. There are eleven parcels with records indicating a new owner, with several  
20 parcels being owned by the same landowner, resulting in a total of four additional  
21 landowners. Of those four, the deeds for two of the landowners were signed in  
22 September 2022, one landowner whose deed was signed in January 2022 but Idaho  
23 Power's records indicated the previous landowner, and one landowner who has been  
24 under contract to purchase since 2014 but the transaction has not been executed.

25 **Q. Has the Company contacted the four landowners to notify them of the  
26 proceeding in this case?**

1 A. Yes. Idaho Power has provided notice to all four landowners of this proceeding.

2 Q. **Does this conclude your testimony?**

3 A. Yes, it does.
