Appendix P

# Benchmark Submission

2023 All-Source RFP

# Portland General Electric's Benchmark Submission

## Bid Descriptions

PGE currently intends to submit several benchmark resources into the 2023 RFP to meet both PGE's renewable needs and non-emitting capacity needs. Benchmark bids currently under evaluation include wind, solar, hybrid and stand-alone energy storage resources.

## Utility Controlled Bid Elements

Certain assets controlled by the utility are under consideration for use in support of Benchmark Resources or an Affiliate bid. Utility assets presently evaluated include:

- Land in Northeast Oregon owned by the utility in support of a solar resource.
  - Approximately 300-600 acres located at the following coordinates: 45.696, -119.797

This property is contiguous with current PGE operations. Due to physical and cyber-security risks associated with co-location, PGE will only be making this property available to third-party developers under a utility owned commercial structure as to avoid unacceptable risks associated with multiple entity operation within the site perimeter.
