To whom it may concern,

SCW has not cleaned up metal shavings, hydraulic fluid, piles of pipes a broken-down truck parked in front of our entrance to saddleback. Even thou we have asked multiple times to clean up and remove the vehicle. SCW has a timer on the other well, which constantly is overflowing and damaging the road and driveway of some homeowners. SCW does not seem to want to repair the telemetry system so the well operates properly. SCW has sent us an email that we will need to conserve water this Fall and Summer because of the above reasons. The Deschutes Basin Watermaster is issuing a NOV to SCW because of the overflow problem.

Thank you,

S [REDACTED] R [REDACTED]
