ADV 1539 Schedule Announcement

This announcement provides a proposed schedule to bring ADV 1539 to a public meeting. Staff intends to hold a workshop with the Company and stakeholders, provide a period for written comments, and reserve time for a second workshop if needed.

Background

On September 15, 2023, Idaho Power filed ADV 1539/Advice No. 23-09, which proposes changes to its Oregon Schedule 84 that contains the Company's Oregon Net Metering program. This update would go into effect on January 1, 2024. The Company's proposed changes to its Oregon Net Meter program mimics its Idaho offering, which is being updated in Idaho docket IPC-E-23-14 with the same effective date as Oregon.

Schedule information

Staff recognizes that a lot of discussion around the Company's net metering reform has taken place in Idaho. Although the Company's Oregon net metering offering has traditionally mimicked its Idaho offering in compliance with ORS 757.300, Staff feels that it is valuable to allow Oregon stakeholders to understand the evolution of the conversation in Idaho and its application in Oregon. Staff intends to hold a stakeholder workshop as well as a written comment period, and present Staff's recommendation at the December 12 or December 28 public meeting. Staff's full schedule is proposed below:

Event	Date
Workshop	November 20, 2023, noon-1pm Pacific time
Written comment deadline	November 30, 2023
Public meeting date	December 12 or December 28, 2023

Login information for the workshop is included at the end of this this document. Written comments from stakeholder organizations can be submitted to puc.filingcenter@puc.oregon.gov. Written comments from members of the public can be submitted to puc.publiccomments@puc.oregon.gov or submitted through the "Submit Public Comment" button on the ADV 1539 docket page [here](#).
