Other: Please explain.

**Coordinated Installation without Cooperative Testing (for DS1) Amendment  
to the Interconnection Agreement  
between  
Qwest Corporation  
and  
Advanced Telcom, Inc.  
for the State of Oregon**

This is an Amendment ("Amendment") to the Interconnection Agreement between Qwest Corporation ("Qwest"), a Colorado corporation, and Advanced Telcom Inc. ("CLEC"), a Delaware corporation.

**RECITALS**

WHEREAS, the Parties entered into an Interconnection Agreement, for service in the State of Oregon, that was approved by the Oregon Public Utility Commission on November 20, 1998, as referenced Docket/Order No. 98-485 ("Agreement"); and

WHEREAS, the Parties wish to amend the Agreement by adding the terms and conditions contained herein.

**AGREEMENT**

NOW THEREFORE, in consideration of the mutual terms, covenants and conditions contained in this Amendment and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

**Amendment Terms**

The Agreement is hereby amended by adding the terms, conditions and rates for Coordinated Installation without Cooperative Testing (for DS1), as set forth in Attachment 1 and Exhibit A, attached hereto and incorporated herein.

Rates in Exhibit A shall be updated to reflect legally binding decisions of the Commission and shall be applied on a prospective basis from the effective date of the legally binding Commission decision, unless otherwise ordered by the Commission.

**Effective Date**

The Parties agree to implement the provisions of this Amendment upon execution; however, this Amendment shall be deemed effective March 1, 2005.

**Amendments; Waivers**

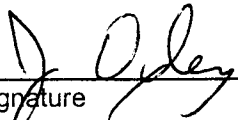

Except as modified herein, the provisions of the Agreement shall remain in full force and effect. Except as provided in the Agreement, this Amendment may not be further amended or altered, and no waiver of any provision thereof shall be effective, except by written instrument executed by an authorized representative of both Parties.

**Entire Agreement**

Other than the publicly filed Agreement and its Amendments (including this Agreement and its Attachment 1), the Parties have no agreement or understanding, written or oral, relating to the terms and conditions for CLEC's purchase of Coordinated Installation without Cooperative Testing (for DS1), in the State of Oregon.

The Parties intending to be legally bound have executed this Amendment as of the dates set forth below, in multiple counterparts, each of which is deemed an original, but all of which shall constitute one and the same instrument.

**ATTACHMENT 1****Coordinated Installation without Cooperative Testing (for DS1)**

1.0 Provisioning Options. Provisioning options are available for Unbundled Loop elements. Charges for Provisioning options vary depending on the type of Loop requested. Rates for the Coordinated Installation without Cooperative Testing option are contained in Exhibit A of this Amendment. Testing parameters are described below and in Qwest Technical Publication 77384.

1.1 **Coordinated Installation without Cooperative Testing.** Coordinated Installation without Cooperative Testing may be ordered for new or existing service. For both new and existing service, CLEC must designate a specific "Appointment Time" when it submits the LSR. On the Due Date (DD), at the CLEC designated "Appointment Time", the Qwest Implementor/Tester contacts CLEC to ensure CLEC is ready for installation. If CLEC is not ready within thirty (30) minutes of the scheduled appointment time, then CLEC must reschedule the installation by submitting a supplemental LSR. If Qwest is not ready within thirty (30) minutes of the scheduled appointment time, Qwest will waive the nonrecurring charge for the installation option and the Parties will attempt to set a new appointment time on the same Day and, if unable to do so, Qwest will issue a jeopardy notice and a FOC with a new Due Date.

1.1.1 For an existing Unbundled Loop this Coordinated Installation without Cooperative Testing is a "lift and lay" procedure without a dispatch that offers CLEC the ability to coordinate the conversion activity. The Qwest Implementor advises CLEC when the "lift and lay" procedure is complete.

1.1.2 For new Unbundled Loops, Qwest may dispatch a technician to terminate the new circuit at the end user premises. This dispatch is included by the non-recurring charge. The Field Technician will not remain on the premises to perform the coordinated installation once the circuit is in place. The COT completes the installation in the Central Office, and the COT and Implementor/Tester complete the required performance tests to ensure that the new circuit meets required parameter limits. CLEC will not receive test results. When installation is complete, Qwest will notify CLEC.

2.0 Although agreeing to the language in Section 1 for the limited purposes of this Amendment, CLEC reserves its right to assert that different language should be used in other contexts. Qwest will not refer to, or otherwise use, CLEC's agreement to Section 1 of this Amendment in any proceeding (other than as necessary to file and obtain approval of this Amendment).
